

000-134 IBM certifications I IBM Rational Business Developer

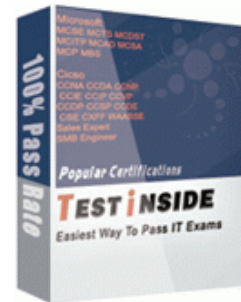

Practice Exam: 000-134 Exams

Exam Number/Code: 000-134

Exam Name: Rational Business Developer

Questions and Answers: 68 Q&As

([IBM certifications I](#))

Exam : [000-134](#)

"Rational Business Developer", also known as 000-134 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 68 Q&As to your 000-134 Exam preparation. In the 000-134 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the 000-134 Exam TestInside Practice Exams for IBM **IBM certifications I** Certification 000-134 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-134 Exam.

000-134 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the IBM certifications I product experts, included the current newest 000-134 examination questions.

3. 100% Guarantee to Pass Your IBM certifications I exam and get your IBM certifications I Certification.

If you do not pass the IBM Certification 000-134 exam (Rational Business Developer) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 000-134 Q&A ensure you pass the exam at your first try.

TestInside professional provide IBM certifications I 000-134 the newest Q&A, completely covers 000-134 test original topic. With our complete IBM certifications I resources, you will minimize your IBM certifications I cost and be ready to pass your 000-134 tests on Your First Try, 100% Money Back Guarantee included!

[IBM 000-134](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I certificate, you also need to participate in other related test, the details you may visit the [IBM certifications I](#) certified topic, in there, you will see all related IBM certifications I certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 000-134 exam

000-134 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-134 exam questions updated on regular basis

Same type as the certification exams, 000-134 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-134 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : IBM 000-134

Title : Rational Business Developer

1. Which statement about building and generating is FALSE?

- A. Build Automatically causes EGL to perform a build whenever you save a file.
- B. Clean causes all parts in all files to be built regardless of whether they have changed.
- C. Auto generate enables you to specify which types of generatable parts EGL will automatically generate whenever you save them.
- D. Build before generate enables you to specify which types of generatable parts EGL will always build before generating them.

Answer: D

2. Which validation property runs last?

- A. inputRequired
- B. validatorDataTable
- C. validatorFunction
- D. validValues

Answer: C

3. Which situation requires that an import statement be specified when using an EGL record part as a type definition for a variable?

- A. when the variable is declared outside of the file that the record was created in
- B. when the variable is declared outside of the package that the record was created in
- C. when the variable is declared outside of the project that the record was created in
- D. every time a variable is declared regardless of where the record was created

Answer: B

4. Consider the following source code:

```
sourceTimeStamp TIMESTAMP (MMdd);  
targetTimeStamp TIMESTAMP (yyyyMMddHHmmss)  
sourceTimeStamp = "0615";  
targetTimeStamp = sourceTimeStamp;
```

If this statement runs on March 10, 2008 at 2:38:40 AM, what is the resulting value for targetTimeStamp?

- A. 00000310000000
- B. 00000615000000
- C. 20080615000000
- D. 20080615023840

Answer: C

5. Which EGL move statement is valid?

- A. move RECORDA to RECORDB byByte;
- B. move RECORDA to RECORDB byPosition;
- C. move RECORDA to RECORDB with VAGenCompat;
- D. move RECORDA to RECORDB for INDEX1 to INDEX2;

Answer: B

6. Which choice is a valid stereotype for a record?

- A. Array
- B. CSV
- C. ExternalType
- D. Form

Answer: B

7. How must a function be defined in the corresponding JSF handler for it to be listed in the Page Data view?

- A. public with no parameters
- B. public with at least one parameter
- C. private with no parameters
- D. private with at least one parameter

Answer: A

8. Which choice is NOT a category of preferences that can be set for the EGL Editor using Window > Preferences > EGL > Editor?

- A. Folding
- B. Formatter
- C. Source Styles
- D. SQL Database Connections

Answer: D

9. Which EGL statement is used to send a text form to a user, receive input from the user, and always return to the same program?

- A. show statement
- B. converse statement
- C. forward statement
- D. display statement

Answer: B

10. One of several programs in an EGL project requires a different build descriptor option from the other programs in the same project. What is the BEST way to specify the different build descriptor option?

- A. generate the program using Generate With Wizard and override the build descriptor option in the wizard
- B. use a master build descriptor plugin.xml file to control which build descriptor part is used for each program
- C. move the program to a different project so that all programs in each project use the same default build descriptor part
- D. create a build descriptor part for the program and specify it in the EGL Default Build Descriptors for the program

Answer: D

11. With respect to EGL projects, which technique allows ProjectA to use code from ProjectB during development and also at runtime for generated Java programs?

- A. ProjectB must be added to the EGL Build Path for ProjectA.
- B. ProjectA must be added to the EGL Build Path for ProjectB.
- C. ProjectB must be added to the EGL Build Path and the Java Build Path for ProjectA.
- D. ProjectA must be added to the EGL Build Path and the Java Build Path for ProjectB.

Answer: C

12. Which primitive type provides the best performance for a counter used to control a loop with maximum iterations of 1000?

- A. DECIMAL
- B. INT
- C. NUM
- D. SMALLINT

Answer: D
