

000-207 IBM certifications I IBM High End Taps Solutions Version 5

Practice Exam: 000-207 Exams

Exam Number/Code: 000-207

Exam Name: High End Taps Solutions Version 5

Questions and Answers: 152 Q&As

([IBM certifications I](#))

Exam : [000-207](#)

"High End Taps Solutions Version 5", also known as 000-207 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 152 Q&As to your 000-207 Exam preparation. In the 000-207 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the 000-207 Exam TestInside Practice Exams for IBM **IBM certifications I** Certification 000-207 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-207 Exam.

000-207 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the IBM certifications I product experts, included the current newest 000-207 examination questions.

3. 100% Guarantee to Pass Your IBM certifications I exam and get your IBM certifications I Certification.

If you do not pass the IBM Certification 000-207 exam (High End Taps Solutions Version 5) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 000-207 Q&A ensure you pass the exam at your first try.

TestInside professional provide IBM certifications I 000-207 the newest Q&A, completely covers 000-207 test original topic. With our complete IBM certifications I resources, you will minimize your IBM certifications I cost and be ready to pass your 000-207 tests on Your First Try, 100% Money Back Guarantee included!

[IBM 000-207](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I certificate, you also need to participate in other related test, the details you may visit the [IBM certifications I](#) certified topic, in there, you will see all related IBM certifications I certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 000-207 exam

000-207 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-207 exam questions updated on regular basis

Same type as the certification exams, 000-207 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-207 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : IBM 000-207

Title : High End Taps Solutions Version 5

1. Which IBM tape interface architecture has the best performance and distance characteristics?

- A. SCSI
- B. ESCON
- C. FireWire
- D. Fibre Channel

Answer: D

2. A customer has an IBM TotalStorage VTS Model B20 with maximum cache, four FICON channels, and eight IBM 3592 drives installed. While overall performance is excellent, it degrades significantly during the later stages of batch processing when tape output peaks. It has been determined that the bandwidth requirement during this time exceeds the peak data rate of the VTS. Which upgrade is most likely to resolve this problem?

- A. add four IBM 3592 Tape Drives
- B. add four FICON channels to the VTS
- C. replace IBM 3592 Tape Drives with IBM TS1120 Tape Drives
- D. replace and migrate the VTS with an IBM TS7700 Virtualization Engine

Answer: D

3. What will NOT prevent an existing B20 VTS from being directly upgraded to an IBM TS7700 Virtualization Engine?

- A. The B20 only has 3592 family back-end drives.
- B. The B20 has 3590 cartridges in its inventory.
- C. The B20 only has 3590 family back-end tape drives.
- D. The B20 has both 3590 and 3592 family back-end drives.

Answer: A

4. A customer is adding a TS3500 Tape Library to an existing tape environment. Which statement is true about the necessity of a Systems Assurance Product Review in this situation?

- A. A Systems Assurance Product Review must be performed before installation, providing it is the first TS3500 the customer installs
- B. A Systems Assurance Product Review must be performed before installation, providing it is indicated in the SAPR trigger criteria.
- C. It is not necessary to perform a Systems Assurance Product Review before installation, providing the customer already has a TS3500.
- D. It is not necessary to perform a Systems Assurance Product Review before installation, providing the customer's management approves it.

Answer: B

5. What is a symptom of IBM TS7700 Virtualization Engine throttling?

- A. high RMF pend time
- B. high channel utilization
- C. increased job elapsed time
- D. increased physical mount time

Answer: C

6. What should be done to validate a newly installed IBM System Storage TS3500 Tape Library?
- A. check with the IBM SSR to ensure that everything was done correctly
 - B. verify that the client has all the SMS and library definitions correctly specified
 - C. run a set of test cases that exercise the various components of the library and host attachment
 - D. check the installation documentation that the IBM SSR used to verify that the SSR marked completion of each task

Answer: C

7. A customer installed an IBM Systems Storage TS3500 Tape Library with native IBM TS1120 Tape Drives, and an IBM TS7700 Virtualization Engine with four drives. What should be done to increase scratch mount performance?
- A. define Fast Ready categories
 - B. define an Inhibit Reclaim Schedule
 - C. define Logical Volume Expiration Time
 - D. increase the number of defined logical volumes

Answer: A

8. When migrating workload from a 3592-J1A to an IBM TS1120 in a z/OS environment, what must be checked for device support?
- A. DFSMSHsm and EREP only
 - B. DFSMSHsm and DFSMSdss only
 - C. DFSMSHsm, DFSMSdss and EREP
 - D. DFSMSHsm, DFSMSdss and ICKDSF

Answer: C

9. Which construct is used to select the media type for the IBM System Storage TS7700 Virtualization Engine allocations?
- A. Data Class
 - B. Storage Class
 - C. Storage Group
 - D. Management Class

Answer: A

10. A customer is considering installing IBM TS1120 Tape Drives attached to a single IBM 3592-C06 Tape Controller in their IBM TS3500 Tape Library. The TS1120 Tape Drives will connect to the z/OS hosts with two FICON Express channels. What is the MINIMUM number of TS1120 Tape Drives that, when writing uncompressed data, can fully utilize the channel bandwidth?
- A. 2
 - B. 4
 - C. 6
 - D. 8

Answer: B

11. A customer wants to connect two libraries to a single modem. Which feature is required to accomplish this?
- A. Remote Support Switch
 - B. Remote Support Facility
 - C. Remote Support Manager
 - D. Remote Console Facility

Answer: A

12. A customer using a TS3500 Tape Library wants to add a z/OS application to his tape environment. What is the best resource to find the supported TS3500 firmware level?
- A. FTS specialist
 - B. z/OS Support Web site

- C. TS3500 Support Web site
- D. Tape Library Specialist Web interface

Answer: C

13. Your customer purchased an IBM TS3500 Tape Library and 3953 Library Manager. You need to provide the customer with the detailed worksheets to complete for the installation. In which resource do you find these worksheets?

- A. 3953 Tape System SAPR Guide
- B. 3953 Introduction and Planning Guide
- C. TS3500 Introduction and Planning Guide
- D. IBM TS3500 Tape Library with System z Attachment Guide

Answer: A

14. What is the most complete source of information for power, cooling, and floor space requirements for IBM tape products?

- A. Redbook
- B. Sales Manual
- C. Product Brochure
- D. Introduction and Planning Guide

Answer: D

15. A client wants to establish a long-term archiving solution, using the IBM DR550 starting with a one frame TS3500 Tape Library. What is the most important factor limiting the ability to scale the storage capacity?

- A. the maximum capacity of the TS3500 Tape Library
- B. the processing power of the built-in System p controller
- C. the size limitation of the Tivoli Storage Manager database
- D. the number of disk expansion units that can be attached to the disk controller

Answer: A

16. What is used to identify LTO Ultrium 3 WORM-capable drives?

- A. serial number of the drive
- B. logo at the front of the drive
- C. label on the back of the drive
- D. level of code the drive contains

Answer: D

17. Which software component is necessary to update the Tape Configuration Database in a system-managed tape environment?

- A. ACS routines
- B. Library Manager
- C. Object Access Method
- D. Basic Tape Library Support

Answer: C

18. A System z customer has installed a new TS3500 Tape Library and wants to integrate it into the existing Tivoli Storage Manager environment. Which resource provides the most comprehensive information about implementing this solution?

- A. www.ibm.com/tivoli
- B. www.ibm.com/partnerworld
- C. www.redbooks.ibm.com/storage
- D. www.ibm.com/systems/education

Answer: C

19. When can piping, sensors, and cabling be run from frame to frame in an IBM System Storage TS3500 Tape Library?

- A. when there is an RPQ to support this configuration
- B. when there is a fire sprinkler system in the data center
- C. when they are placed as prescribed by the Library Planning Guide
- D. when they are within a shielded waterproof conduit in the data center

Answer: C

20. The IBM TS7700 Virtual Tape Server is experiencing performance problems during certain time periods. The customer has determined that the compression ratio during these periods is less than 2:1. What is the most likely cause of the poor compression ratio?

- A. The data sets are too small.
- B. The block sizes are too small.
- C. The tape volume cache is full.
- D. The segments are compressed individually.

Answer: D
