

000-356 eserver Certified Specialist IBM iseries system command operations v5r2

Practice Exam: 000-356 Exams

Exam Number/Code: 000-356

Exam Name: iseries system command operations v5r2

Questions and Answers: 128 Q&As

([eserver Certified Specialist](#))

Exam : [000-356](#)

"iseries system command operations v5r2", also known as 000-356 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 128 Q&As to your 000-356 Exam preparation. In the 000-356 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the 000-356 Exam TestInside Practice Exams for IBM **eserver Certified Specialist** Certification 000-356 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-356 Exam.

000-356 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the eserver Certified Specialist product experts, included the current newest 000-356 examination questions.

3. 100% Guarantee to Pass Your eserver Certified Specialist exam and get your eserver Certified Specialist Certification.

If you do not pass the IBM Certification 000-356 exam (iseries system command operations v5r2) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 000-356 Q&A ensure you pass the exam at your first try.

TestInside professional provide eserver Certified Specialist 000-356 the newest Q&A, completely covers 000-356 test original topic. With our complete eserver Certified Specialist resources, you will minimize your eserver Certified Specialist cost and be ready to pass your 000-356 tests on Your First Try, 100% Money Back Guarantee included!

[IBM 000-356](#) Test belongs to one of the eserver Certified Specialist certified test, if needs to obtain the eserver Certified Specialist certificate, you also need to participate in other related test, the details you may visit the [eserver Certified Specialist](#) certified topic, in there, you will see all related eserver Certified Specialist certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 000-356 exam

000-356 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-356 exam questions updated on regular basis

Same type as the certification exams, 000-356 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-356 exam demo before you decide to buy it in Test-Inside.com.

Exam : IBM 000-356

Title : Iseries system command operations v5r2

1. USERJOBA and USERJOB B were both submitted to a single threaded job queue BATCH1. USERJOBA went active immediately and is a very long running job. The operator needs to move USERJOB B to job queue BATCH2 so it will start running immediately. Which command will accomplish this task?

- A. TFRJOB JOB(USERJOB B) OUTQ(*LIBL/BATCH2)
- B. CHGJOB JOB(USERJOB B) OUTQ(*LIBL/BATCH2)
- C. TFRJOB JOB(USERJOB B) JOBQ(*LIBL/BATCH2)
- D. CHGJOB JOB(USERJOB B) JOBQ(*LIBL/BATCH2)

Answer: D

2. Which of the following commands is used to save user profiles to a save file in a library that does not exist in the library list?

- A. SAVSECDTA DEV(*SAVF) SAVF(SAVF1)
- B. SAVSECDTA DEV(*SAVF) SAVF(ABC/SAVF1)
- C. SAVSECDTA DEV(*SAVF) SAVF(*LIBL/SAVF1)
- D. SAVSECDTA DEV(*SAVF) SAVF(*CURLIB/SAVF1)

Answer: B

3. In preparation to add a new workstation, an operator needs a list of all local workstations currently attached to controller CTL01. Which command should be used?

- A. PRTCTLADR CTLD(CTL01)
- B. PRTCTLDEV CTLD(CTL01)
- C. PRTDEVADR CTLD(CTL01)
- D. DSPDEVADR CTLD(CTL01) OPTION(*PRINT)

Answer: C

4. An operator has been asked to prepare a backup tape to be restored on another iSeries server. Which SAVLIB parameter is used to prepare the tape for the broadest number of iSeries systems?

- A. CLEAR(*ALL)
- B. ACCPTH(*YES)
- C. DTACPR(*YES)
- D. USEOPTBLK(*NO)

Answer: D

5. Press the exhibit button to view the exhibit. Which of the following can be determined from the job description?

- A. What user profile submitted the job
- B. The library list associated with the job
- C. The output queue where the output will be sent
- D. The job queue from which the job will be selected to run

Answer: D

6. Which of the following commands will save a directory stored in the IFS?

- A. SAV
- B. SAVOBJ
- C. SAVDLO
- D. SAVLIB

Answer: A

7. Based on the following message:

Message... : Load form type '*STD' device ITHPLJ4 writer ITHPLJ4. (G B I H R C)

What is the correct response to process this file and continue using standard forms for future jobs?

- A. G
- B. I
- C. C
- D. H

Answer: A

8. The iSeries server was powered down while electrical maintenance work was performed on the data center UPS.

What mode must be displayed on the control panel to power up the system without further operator intervention?

- A. Auto
- B. Manual
- C. Secure
- D. Normal

Answer: D

9. A cumulative PTF package needs to be loaded and applied to the primary partition. Which of the following is recommended prior to IPLing the primary partition?

- A. Power down all secondary partitions
- B. Allocate all processor resources to the primary partition
- C. End all interactive subsystems on the secondary partitions
- D. Disable the virtual LAN connections between the partitions

Answer: A

10. Installing an operating system PTF which of the following would be impacted?

- A. IBM supplied object(s)
- B. User created object(s)
- C. Newly installed object(s) on the system
- D. Changes the authority of object(s) on the system

Answer: A

11. An operator performed a backup of all changed objects. Which command would be used to restore SLS092502 to the ACCOUNT02 library from this backup?

- A. RSTOBJ OBJ(SLS092502) SAVLIB(ACCOUNT02) DEV(TAP01)
- B. RSTOBJ OBJ(SLS092502) SAVCHG(ACCOUNT02) DEV(TAP01)
- C. RSTCHGOBJ OBJ(SLS092502) SAVLIB(ACCOUNT02) DEV(TAP01)
- D. RSTCHGOBJ OBJ(SLS092502) SAVCHG(ACCOUNT02) DEV(TAP01)

Answer: A

12. What information is displayed when viewing all job queues?

- A. Status of the job queues Subsystem assigned to the job queue
- B. Number of jobs currently in each job queue Time each job was submitted
- C. Status of the subsystems assigned to each job queue Status of each job queue
- D. Number of jobs currently in each job queue Time each job is scheduled to run

Answer: A

13. A writer is running and the associated printer is printing. How can an operator determine how many spooled files have not yet printed?

- A. Check the writer's status.
- B. Check the output queue's status.
- C. Check the printer's status messages.
- D. Check the jobs in the spool subsystem.

Answer: B

14. A job named "USERJOB1" has been running for an unusually long period of time and is utilizing a large amount of CPU resources. Which command will immediately end the job and delete all spool files produced by the job?

- A. ENDJOB(USERJOB1) OPTION(*IMMED) SPLFILE(*NO)
- B. ENDJOB(USERJOB1) OPTION(*IMMED) SPLFILE(*YES)
- C. ENDJOB(USERJOB1) OPTION(*IMMED) SPLFILE(*DLT)
- D. ENDJOB(USERJOB1) OPTION(*IMMED) SPLFILE(*ALL)

Answer: B

15. When changing the job priority for a job that is waiting in a JOBQ, what are the valid values that can be used?

- A. Valid values range from 0 through 9, where 0 is the highest priority and 9 is the lowest priority.
- B. Valid values range from 0 through 9, where 9 is the highest priority and 0 is the lowest priority.
- C. Valid values range from "A" through "Z", where "Z" is the highest priority and "A" is the lowest priority.
- D. Valid values range from -100 through -999, where -999 is the highest priority and -100 is the lowest priority.

Answer: A

16. An operator accidentally deleted a spool file before it was printed. What must the operator do to recover the spool file?

- A. Rerun the job that created it.
- B. Use the IBM-supplied RSTSPLF command.
- C. Restore the spool file from the last backup tape.
- D. Use iSeries Navigator to restore the file from the recycle bin.

Answer: A

17. In the intermediate assistance level, how can an operator learn more about what a message means or how to respond to it?

- A. Go to the Messages menu
- B. Put the cursor on the message and press the F1 (Help) key
