### IBM IBM Tivoli Storage Manager V5.5 Implementation

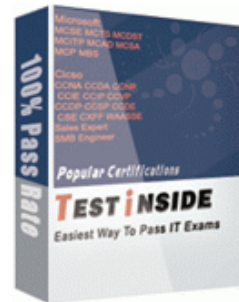

**Practice Exam:** 000-433 Exams

**Exam Number/Code:** 000-433

**Exam Name:** IBM Tivoli Storage Manager V5.5 Implementation

**Questions and Answers:** 266 Q&As

( [IBM certifications III](#) )

Exam : [000-433](#)

"IBM Tivoli Storage Manager V5.5 Implementation", also known as 000-433 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 266 Q&As to your 000-433 Exam preparation. In the 000-433 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the 000-433 Exam TestInside Practice Exams for IBM **IBM certifications III** Certification 000-433 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

#### **TestInside provide the professional Q&A.**

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-433 Exam.

000-433 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the IBM certifications III product experts, included the current newest 000-433 examination questions.

3. 100% Guarantee to Pass Your IBM certifications III exam and get your IBM certifications III Certification.

If you do not pass the IBM Certification 000-433 exam (IBM Tivoli Storage Manager V5.5 Implementation) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

#### **use TestInside 000-433 Q&A ensure you pass the exam at your first try.**

TestInside professional provide IBM certifications III 000-433 the newest Q&A, completely covers 000-433 test original topic. With our complete IBM certifications III resources, you will minimize your IBM certifications III cost and be ready to pass your 000-433 tests on Your First Try, 100% Money Back Guarantee included!

[IBM 000-433](#) Test belongs to one of the IBM certifications III certified test, if needs to obtain the IBM certifications III certificate, you also need to participate in other related test, the details you may visit the [IBM certifications III](#) certified topic, in there, you will see all related IBM certifications III certified subject of examination.

#### **TestInside Testing Engine Features**

Comprehensive questions and answers about 000-433 exam

000-433 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-433 exam questions updated on regular basis

Same type as the certification exams, 000-433 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-433 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : IBM 000-433

Title : IBM Tivoli Storage Manager V5.5 Implementation

1. What is the result of issuing the command set access backup /Users/user3/proja/ nodeB from the Tivoli Storage Manager (TSM) client CLI for the TSM client of serverA?

- A. It allows the TSM client nodeB to access the database records of serverA.
- B. It gives nodeB the authority to restore all files in the /Users/user3/proja directory.
- C. It permits the TSM client nodeB to backup any file in the path /Users/user3/proja/ on serverA.
- D. It allows the TSM client nodeB to access the Tivoli Storage Manager (TSM) client on serverA remotely.

Answer: B

2. Which command should you use to review the status of the administrative scheduled tasks?

- A. query event \* type=administrative
- B. query schedule \* type=administrative
- C. query actlog search=admin begintime=-1
- D. actlog schedule all type=administrative

Answer: A

3. As a Tivoli Storage Manager (TSM) administrator, you have configured a Disaster Recovery Plan using the disaster recovery manager (DRM) function of TSM.

When faced with the need to perform a recovery, where do you locate the information on the type of devices needed to restore the TSM database and client data?

- A. recovery plan file
- B. volume history file
- C. TSM Administrator's Guide
- D. Query drmedia command output

Answer: A

4. A customer is having problems with certain servers backing up several times per day. They need to limit the number of times a file is backed up to a maximum of one time per day.

Which option is best used accomplish this within IBM Tivoli Storage Manager (TSM)?

- A. with File Frequency
- B. with Copy Frequency
- C. with Image Frequency
- D. with Backup Frequency

Answer: B

5. Which installation authority is required to install the Tivoli Integrated Solutions Console on the AIX platform?

- A. bin user
- B. root user
- C. non-root user
- D. administrative user

Answer: B

6. What does the MIGDELAY attribute of a storage pool do?

- A. specifies the maximum number of days the migration process can run continually

- B. specifies a delay in days where the migration process remains paused when the MIGMAX threshold is reached
- C. specifies the minimum number of days a file must remain in a storage pool before it becomes eligible for migration
- D. specifies the maximum number of days a file can remain in a storage pool before an immediate migration is forced for this file

Answer: C

7. A customer has the following requirements: use of the existing AIX TSM server instance, nightly backups, seven Exchange servers, three UNIX servers, four terabytes total data, 10% nightly change, and 30% annual growth. You have been asked to recommend the appropriate Tivoli Storage Manager (TSM) V5.5 software environment to meet these requirements.

Which two TSM components are required? (Choose two.)

- A. TSM for Mail
- B. TSM for SharePoint
- C. TSM Extended Edition
- D. TSM for Space Management
- E. TSM for System Backup and Recovery

Answer: AC

8. A new management team informs you that they have new Service Level Agreements. The team would like to review the current retention settings, such as how many versions there are and how long certain files are kept.

How is this accomplished?

- A. Query Ret f=d
- B. Query Copy f=d
- C. Query Mgmt f=d
- D. Query Policy f=d

Answer: B

9. How can you stop the distribution of a profile from the configuration manager to the managed system?

- A. delete profileassociation on the configuration manager for the target managed system
- B. delete subscription issued on the configuration manager for the target managed system
- C. delete subscription for the configuration manager issued on the target managed system
- D. delete profilesubscription for the configuration manager issued on the managed system

Answer: C

10. What is a limitation of the Tivoli Storage Manager (TSM) Operational Reporting stand alone package?

- A. Web link summary options are not available to check operational reports about the server.
- B. The stand alone package does not support TSM servers running on non-Windows platforms.
- C. If a TSM server requires attention, the message may not provide a recommendation for getting it running again.
- D. If you install the stand alone version and later decide to install the TSM server on Windows, you must first uninstall the stand alone console.

Answer: D

11. When should compression of client data be considered on the Tivoli Storage Manager (TSM) client to reduce backup times?

- A. when backing up highly compressible database data
- B. when backing up more than 1 GB of data each day from the TSM client
- C. when backing up data that will be retained for an extended period of time
- D. when network bandwidth constraints exist between the TSM client and TSM server

Answer: D

12. A customer needs to increase the extra inactive versions of data they keep.

Which policy setting do they need to modify in order to satisfy their new service level agreement?

- A. Versions Data Exists

- B. Retain Extra Versions
- C. Retain Active Versions
- D. Retain Inactive Versions

Answer: A

13. A customer has a requirement to reduce the costs of their off-site vaulting. The customer wants to eliminate costs associated with the manual labor of moving tapes with secure data to a second site.

How can Tivoli Storage Manager (TSM) V5.5 best meet the customers requirement?

- A. by using electronic vaulting of the TSM data
- B. by creating the secondary tapes and leaving them on-site
- C. by using a hardware disk solution to mirror the client data to the remote location
- D. by using TSM to restore the data that was backed up in the primary site to the secondary site

Answer: A

14. A Tivoli Storage Manager (TSM) V5.5 client has been successfully installed on a Windows 2003 server. The administrator has configured Logical Volume Snapshot Agent (LVSA) function for Open File Support (OFS) through the wizard. The customer has the following requirements:

The Windows 2003 server must use VSS (Volume Shadowcopy Services).

Drive C: must be processed with OFS.

Drive D: must not be processed with OFS.

Which options must be defined in the dsm.opt file to meet these requirements?

- A. include.fs c: snapshotproviderfs=vss  
include.fs d: snapshotproviderfs=none
- B. include.fs c: snapshotproviderfs=yes  
include.fs d: snapshotproviderfs=none
- C. include.fs c: imagetype=dynamic  
include.fs d: imagetype=static
- D. include.fs c: snapshotproviderfs=dynamic

Answer: A

15. A companys objectives for data storage are to have a copy of data on-site and a copy of data off-site, as well as to ensure quick restore times of data.

Which storage pool configuration should you use to meet these objectives?

- A. random access primary storage pool, sequential LTO copy storage pool, sequential FILE active-data pool
- B. random access primary storage pool, sequential LTO primary storage pool, sequential LTO copy storage pool
- C. sequential FILE primary storage pool, sequential LTO primary storage pool, sequential LTO copy storage pool
- D. sequential File primary storage pool, sequential LTO primary storage pool, sequential FILE copy storage pool

Answer: A

16. What is the correct sequence of daily actions required for a Disaster Recovery Manager (DRM) plan to be valid?

- A. 1. back up client files  
2. back up the primary storage pools  
3. back up the database (for example, a database snapshot backup)  
4. move the disaster recovery media using the move DRMedia command  
5. generate the Disaster Recovery Plan  
6. send the backup volumes and Disaster Recovery Plan file to the vault
- B. 1. back up the database (for example, a database snapshot backup)  
2. back up client files  
3. back up the primary storage pools  
4. move the disaster recovery media using the move DRMedia command  
5. send the backup volumes and Disaster Recovery Plan file to the vault  
6. generate the Disaster Recovery Plan
- C. 1. back up client files

2. back up the primary storage pools
3. back up the database (for example, a database snapshot backup)
4. generate the Disaster Recovery Plan
5. move the disaster recovery media using the move DRMedia command
6. send the backup volumes and Disaster Recovery Plan file to the vault

D. 1. back up client files

Answer: A

17. How can a Tivoli Storage Manager (TSM) administrator ensure that there is sufficient free space in the primary storage pools?

- A. by using a scheduled task to migrate the primary storage pools automatically
- B. by deleting primary storage pools regularly using administrative scheduling
- C. by scheduling a daily migration of the TSM server activity log, so the database does not consume space
- D. by asking the TSM backup archive user to use journal based backup or subfile backups instead of incremental or full backups

Answer: A

18. Which two options can be used in the backup-archive client option files for Windows and AIX to specify the location for the storage of the encryption key? (Choose two.)

- A. passworddir
- B. securelocation
- C. passwordlocation
- D. encryptkeylocation
- E. encryptkey generate

Answer: AE

19. A customer wants to retain the last backup of a file that has been deleted.

Which policy setting do they need to have configured in their environment?

- A. Retain=On
- B. Retain=Yes
- C. Retain Last Version
- D. Retain Only Version

Answer: D

20. When is implementation of LAN-free backup recommended?

- A. when excess storage capacity exists on the SAN
- B. when backing up client systems, which contain sensitive information
- C. when the need to offload backup traffic from the LAN to the SAN exists
- D. when there are client systems with a large number of small files to back up

Answer: C
