

000-719 IBM certifications I IBM InfoSphere Warehouse V9.5

Practice Exam: 000-719 Exams

Exam Number/Code: 000-719

Exam Name: InfoSphere Warehouse V9.5

Questions and Answers: 101 Q&As

([IBM certifications I](#))

Exam : [000-719](#)

"InfoSphere Warehouse V9.5", also known as 000-719 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 101 Q&As to your 000-719 Exam preparation. In the 000-719 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the 000-719 Exam TestInside Practice Exams for IBM **IBM certifications I** Certification 000-719 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-719 Exam.

000-719 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the IBM certifications I product experts, included the current newest 000-719 examination questions.

3. 100% Guarantee to Pass Your IBM certifications I exam and get your IBM certifications I Certification.

If you do not pass the IBM Certification 000-719 exam (InfoSphere Warehouse V9.5) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 000-719 Q&A ensure you pass the exam at your first try.

TestInside professional provide IBM certifications I 000-719 the newest Q&A, completely covers 000-719 test original topic. With our complete IBM certifications I resources, you will minimize your IBM certifications I cost and be ready to pass your 000-719 tests on Your First Try, 100% Money Back Guarantee included!

[IBM 000-719](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I certificate, you also need to participate in other related test, the details you may visit the [IBM certifications I](#) certified topic, in there, you will see all related IBM certifications I certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 000-719 exam

000-719 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-719 exam questions updated on regular basis

Same type as the certification exams, 000-719 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-719 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : IBM 000-719

Title : InfoSphere Warehouse V9.5

1. When connecting an Output Port of a Table Source to the Names Port of a Sequences Operator, what are two valid methods of mapping columns? (Choose two.)

- A. by Name
- B. by Index
- C. by Position
- D. by Attribute
- E. by Key

Answer: AC

2. Which statement is true about Rational Data Architect (RDA) integration with the Design Studio for data modeling?

- A. Design Studio integrates both logical and physical data modeling capabilities from RDA.
- B. The full RDA can be installed into the Design Studio platform for logical and physical data modeling.
- C. Design Studio includes the physical data modeling component to help you implement your physical model.
- D. Design Studio is based on IBM Data Server Developer Workbench and a full set of RDA components.

Answer: C

3. A control flow requires the use of a variable that seldom changes after deployment.

Which phase should be considered?

- A. EXECUTION_INSTANCE
- B. DEPLOYMENT
- C. DEPLOYMENT_PREP
- D. RUNTIME

Answer: D

4. If you roll-in daily and roll-out monthly, which approach reduces the number of table partitions and eases the DBA administrative tasks?

- A. Specify a MDC on day and a table partition key for day.
- B. Specify a MDC on day and a table partition key for month.
- C. Specify a MDC on month and a table partition key for month.
- D. Specify a MDC on month and a table partition key for day.

Answer: B

5. Relational database and a database model that is often a star or snowflake schema are characteristics of which engine storage structure?

- A. MOLAP
- B. ROLAP
- C. Multidimensional cubing
- D. Proprietary

Answer: B

6. Which two functions can the Design Studio perform? (Choose two.)

- A. Run the Optimization Advisor and analyze whether the recommended MQTs will be used given a predefined workload.

- B. Drop cube models from the InfoSphere Warehouse metadata database.
- C. Move and transform data.
- D. Rebuild an OLAP cube's member cache.
- E. Add an OLAP cube to the cube server.

Answer: BC

7. Which two InfoSphere Warehouse components are included in the logical group for the Application Server? (Choose two.)

- A. IBM Data Server Client
- B. Intelligent Miner Visualization
- C. WebSphere Application Server
- D. Workload Management plug-in
- E. Design Studio

Answer: AC

8. Which two functions can the SQW tool perform for a data flow? (Choose two.)

- A. business processes such as secure command and secure FTP
- B. range partitioning for staging tables
- C. filtering and sorting for operator properties such as table columns
- D. operators for row compression, roll-in, and roll-out
- E. parallel process execution

Answer: BC

9. You can use the Admin Console to add, remove, start, stop, or restart cubes.

For which other purpose can the Admin Console be used?

- A. to rebuild a cubes member cache
- B. to empty the member cache for a cube
- C. to populate the member cache using a specified MDX query
- D. to delete the files on the file system that are holding the member cache data

Answer: A

10. During which installation and configuration process can user groups be mapped to each role?

- A. the installation of InfoSphere Warehouse Server for the Administration node
- B. the installation of InfoSphere Warehouse Server for Data node
- C. the installation of WebSphere Application Server
- D. the execution of the InfoSphere Warehouse Configuration Tool

Answer: D

11. A customer needs to merge unstructured repositories with a traditional data mining solution for a production environment.

Which edition of InfoSphere Warehouse should they buy?

- A. InfoSphere Warehouse Base
- B. InfoSphere Warehouse Intermediate
- C. InfoSphere Warehouse Enterprise
- D. InfoSphere Warehouse Developer

Answer: C

12. What does a Data Design Project within Design Studio contain?

- A. physical data model
- B. SQW work flows
- C. data mining flows
- D. logical data model

Answer: A

13. When using InfoSphere Warehouse, in which two occasions is it appropriate to run the InfoSphere Warehouse configuration tool? (Choose two.)

- A. any time you need to do reverse engineering
- B. immediately before installation
- C. any time after installation to modify your configuration
- D. immediately after installation
- E. any time after a new user is added to the warehousing solution

Answer: CD

14. What are two reasons for a combination of database and front-end tool based analytic architectures in a data warehouse implementation? (Choose two.)

- A. Less data is moved across the network, making queries run faster.
- B. The database can provide consistent analytic calculations and query speed for common queries.
- C. The combination of architectures will ensure fast query performance.
- D. Multidimensional queries cannot be processed in SQL by the database engine so it must be done using a front-end tool.
- E. The front-end tool allows for additional and more complex algorithms specific to applications that use that tool.

Answer: BE

15. What is meant by "Information as a Service"?

- A. expanding a traditional data warehouse with XML capabilities for the data
- B. extending the traditional data warehouse by providing business context layers to the data
- C. accessing a traditional data warehouse with a Web-based application for the data
- D. storing all analytical data in a multidimensional cube instead of a traditional data warehouse

Answer: B

16. Which two tools should an InfoSphere Warehouse developer use to perform SQL Warehousing design tasks? (Choose two.)

- A. WebSphere Administration Console
- B. InfoSphere Warehouse Design Studio
- C. InfoSphere Warehouse Admin Console
- D. SQL Warehousing Tool
- E. IBM Data Studio

Answer: BD

17. In a three node configuration, which two servers can contain InfoSphere Warehouse Intelligent Miner components? (Choose two.)

- A. Data Server
- B. Mining Server
- C. Client
- D. Web Server
- E. WebSphere Administration Server

Answer: AC

18. What is a benefit of using warehouse based analytics?

- A. It provides more functions in the available calculation set.
- B. It ensures the user response time will always be fast.
- C. It provides end users the ability to add additional calculations at report time.
- D. It provides a common pool of analytic methods to produce consistent answers across all users.

Answer: D

19. A customer wants to evaluate deep data compression in an AIX development environment. Which edition of InfoSphere Warehouse should they buy?

- A. InfoSphere Warehouse Base
- B. InfoSphere Warehouse Intermediate
- C. InfoSphere Warehouse Advanced
- D. InfoSphere Warehouse Developer

Answer: D

20. A customer wants to include analysis of product sales for their locations at various levels of their product lines and various levels of their geography.

Which two schema considerations are necessary to satisfy the requirement? (Choose two.)

- A. a product dimension with location attributes
- B. a product dimension with product line hierarchies
- C. a location dimension with product attributes
- D. a location dimension with geography hierarchies
- E. a product dimension with geography hierarchies

Answer: BD
