

000-743 IBM certifications I IBM Storage Sales, Version 7

Practice Exam: 000-743 Exams

Exam Number/Code: 000-743

Exam Name: IBM Storage Sales, Version 7

Questions and Answers: 158 Q&As

([IBM certifications I](#))

Exam : [000-743](#)

"IBM Storage Sales, Version 7", also known as 000-743 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 158 Q&As to your 000-743 Exam preparation. In the 000-743 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the 000-743 Exam TestInside Practice Exams for IBM **IBM certifications I** Certification 000-743 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-743 Exam.

000-743 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the IBM certifications I product experts, included the current newest 000-743 examination questions.

3. 100% Guarantee to Pass Your IBM certifications I exam and get your IBM certifications I Certification.

If you do not pass the IBM Certification 000-743 exam (IBM Storage Sales, Version 7) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 000-743 Q&A ensure you pass the exam at your first try.

TestInside professional provide IBM certifications I 000-743 the newest Q&A, completely covers 000-743 test original topic. With our complete IBM certifications I resources, you will minimize your IBM certifications I cost and be ready to pass your 000-743 tests on Your First Try, 100% Money Back Guarantee included!

[IBM 000-743](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I certificate, you also need to participate in other related test, the details you may visit the [IBM certifications I](#) certified topic, in there, you will see all related IBM certifications I certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 000-743 exam

000-743 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-743 exam questions updated on regular basis

Same type as the certification exams, 000-743 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-743 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : IBM 000-743

Title : IBM Storage Sales, Version 7

1. An IBM storage specialist is talking to a client regarding their current tape library and backup strategy. Which of the following would be most appropriate to identify the customer's business challenges?

- A. What tape technology is currently being used?
- B. How many tape drives are in the library?
- C. What software is being used for backup?
- D. Has there been any recent loss of data?

Answer: D

2. A customer is experiencing bottlenecks in their current IT environment and has expressed a desire to address this issue. The next step for a storage sales specialist would be to

- A. present IBM's On Demand storage strategy to the customer.
- B. arrange a meeting with the Board of Directors.
- C. quote storage infrastructure that addresses the customer's issue.
- D. determine the customer's timeframe and budget for a solution.

Answer: D

3. A customer is concerned about the high cost of implementing SAN attached storage for their Microsoft Windows application and database servers. They do need to consolidate storage and share data, while utilizing existing network infrastructure. Which IBM TotalStorage product line should be proposed?

- A. N Series for CIFS and iSCSI support
- B. Multiprotocol Router Model A16 for FCIP support
- C. DS300 Storage Server for iSCSI support
- D. DS8300 Storage Server for partitioning support

Answer: A

4. Which of the following is the best example of Information Lifecycle Management?

- A. Creating TSM copy storage pools for exporting of off-site tape volumes
- B. Running Global Mirror for remote replication of Oracle Database
- C. Migrating infrequently accessed test data from fibre channel disk to SATA disk
- D. Migrating data from LTO-1 to LTO-3 tape technology to increase library capacity

Answer: C

5. A customer has a remote engineering location, where both Microsoft Windows and IBM AIX workstations need to share common design and analysis data. The proposed solution needs to be cost effective and utilize existing infrastructure. What is the best solution for this requirement?

- A. IBM TotalStorage N3700
- B. IBM TotalStorage SAN Volume Controller
- C. IBM TotalStorage DS4300
- D. IBM TotalStorage SAN File System

Answer: A

6. A customer has a heterogeneous environment. They want the ability to scale their storage infrastructure to meet rapidly changing business conditions. Which of the following would be most appropriate to discuss with the

customer?

- A. Business Continuity
- B. On Demand Environment
- C. Information Lifecycle Management
- D. Tiered Storage Hierarchy

Answer: B

7. Information Technology management for a company is struggling to manage multiple file systems in their current IBM System Storage SAN environment. They would like to manage Microsoft Windows, Linux and UNIX file systems from a single management console. Which product should be discussed with this client?

- A. Network File System (NFS)
- B. IBM SAN File System (SFS)
- C. IBM San Volume Controller (SVC)
- D. IBM Tivoli Storage Manager (TSM)

Answer: B

8. The Information Technology director at a prospect is interested in purchasing the IBM TotalStorage N3700, and has asked the IBM storage specialist to help present the solution to the vice president of finance. Which of the following should the IBM storage specialist include in the proposal?

- A. A priced configuration showing the list price of the solution.
- B. How CIFS and NFS support is included in the base price.
- C. How this product lowers Total Cost of Ownership and improves Return On Investment.
- D. How the N3700 combines iSCSI, NAS and FiberChannel into a single storage solution.

Answer: C

9. A long time IBM customer owns both IBM servers and storage. The IBM storage specialist has been asked to present an update on the IBM storage portfolio. Which of the following questions from the customer would most likely indicate a competitive storage presence?

- A. What is the total internal bandwidth of the IBM TotalStorage DS8100?
- B. What is the raw disk capacity of the IBM TotalStorage DS4800?
- C. What are the support options available on the IBM TotalStorage DS6800?
- D. How can the IBM SAN Volume Controller work in our environment?

Answer: A

10. A customer has 12 Microsoft Windows 2003 servers that need a total of 2 TB of CIFS file space. Point-in-Time copy capabilities are required to reduce their backup windows. Which additional software would need to be ordered for an N3700 NAS Filer to meet this capability?

- A. FlexVol
- B. SnapCopy
- C. SnapLock
- D. SnapRestore

Answer: D

11. In a recent customer meeting, the data center director described ever increasing application storage requirements. Furthermore, the director wants to consolidate storage from multiple, heterogeneous storage arrays onto a single, high performance, highly scalable storage server. This migration and consolidation needs to be performed quickly and with minimum application downtime. Which IBM product should the sales specialist discuss with the customer?

- A. SAN Volume Controller
- B. Tivoli Storage Manager
- C. SAN File System
- D. Enterprise Remote Copy Management Facility

Answer: A

12. A rapidly growing distributor is concerned with the possibility of a natural disaster occurring in the area. They currently have two IBM UNIX servers, both being backed up nightly to an IBM TotalStorage 3584 Tape Library. Tapes are taken offsite nightly. In order to help the customer achieve the next level of disaster recovery protection, which of the following is the most cost-effective recommendation?

- A. Add additional LTO drives to their library and make two copies of their data nightly.
- B. Move the IBM TotalStorage 3584 Tape Library to a remote location and perform backups nightly.
- C. Install the IBM System Storage 7710 at their site and make multiple copies of their data that can be restored quickly.
- D. Duplicate their existing environment (servers and library) at a remote location.

Answer: B

13. A customer has a combination of Microsoft Windows file servers with direct attached storage and IBM pSeries database servers attached to a FAStT 200 SAN device that is reaching capacity. The customer needs to migrate to a more scalable storage server. Which of the following would be most appropriate to ask in the initial conversation?

- A. How much space is available in the current storage systems?
- B. What is the version and release level of the database?
- C. Will all servers be SAN attached?
- D. What is the projected growth rate of data?

Answer: D

14. A customer is following a storage consolidation strategy and wants to share a tape library among Microsoft Windows NT, AIX, Sun and mainframe systems. Which of the following directly attached IBM products can satisfy this requirement?

- A. IBM TotalStorage Ultrium Tape Library (3582)
- B. IBM TotalStorage Ultrium Scalable Tape Library (3583)
- C. IBM TotalStorage Ultrascapable Tape Library (3584)
- D. IBM TotalStorage Data Retention 550 with 3592 WORM Tape

Answer: C

15. When describing the features and functions of the DS8000 to the Information Technology director and staff members, a question is raised regarding how I/O performance can be increased (I/O queuing time decreased), while increasing the addressable storage space on their z/OS system. The sales representative needs to schedule another meeting and bring the appropriate specialist to address these concerns.

In which subject areas does this specialist need to be proficient?

- A. FlashCopy, Global Mirror, and 3390 Mod 3 volumes
- B. PAVs, Workload Manager, and 3390 Mod 27 volumes
- C. Metro Mirror, Arrays Across Loops, and FICON Express
- D. Remote Mirror for z/OS, cache size, and custom volumes

Answer: B

16. A customer has a requirement to add twelve additional servers (dual attached) to their existing two Brocade 16 port SAN Switches that have no more ports available. Which of the following should be recommended to accommodate the current capacity requirement, allow for future growth, and provide 2 GB support?

- A. One IBM TotalStorage SAN16B-R
- B. One IBM TotalStorage SAN16B-2
- C. One IBM TotalStorage SAN Director Model M14
- D. One Cisco Storage Director MDS 9506

Answer: C

17. A remote backup and recovery site within 50 miles of headquarters requires 7 x 24 x 365 data availability in a heterogeneous UNIX environment. Which of the following IBM storage functions best meets the customer's business continuance requirements?

- A. Global Mirror

- B. Metro Mirror
- C. FlashCopy
- D. High Availability Cluster Multiprocessing

Answer: B

18. A customer wants highest availability, serviceability, and performance for open systems and z/OS workload. Which of the following solutions would best meet the customer's needs?

- A. IBM TotalStorage DS4800 Storage Server with the IBM TotalStorage SAN Volume Controller
- B. IBM TotalStorage DS6800 Storage Server and IBM TotalStorage SAN Volume Controller
- C. IBM TotalStorage DS8300 with TotalStorage Productivity Center (TPC)
- D. IBM TotalStorage Data Retention 550 and Tivoli Storage Resource Manager

Answer: C

19. A customer is interested in purchasing a new IBM TotalStorage DS8000 solution to consolidate older ESS and F20 storage systems. What should be done prior to final proposal development?

- A. Perform a Disk Magic study.
- B. Review e-config with an IBM System Storage Field Technical Sales Support person.
- C. Confirm that the customer has enough ports available in the SAN infrastructure.
- D. Submit configuration to IBM System Storage Interoperability Center for validation.

Answer: A

20. A customer has a requirement to replace an aging EMC storage system for SAP in a UNIX environment. The customer has a limited budget and wants the best performance for the price. Which of the following options would be the most appropriate solution?

- A. IBM TotalStorage DS4100
- B. IBM TotalStorage DS4800
- C. IBM TotalStorage DS6800
- D. IBM Enterprise Storage Server

Answer: B
