IBM IBM Tivoli Provisioning Mgrw/Orchestration V3.1 Implement

Practice Exam: 000-771 Exams

Exam Number/Code: 000-771

Exam Name: IBM Tivoli Provisioning Mgrw/Orchestration V3.1 Implement

Questions and Answers: 134 Q&As

([IBM certifications II](#))

Exam : [000-771](#)

"IBM Tivoli Provisioning Mgrw/Orchestration V3.1 Implement", also known as 000-771 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 134 Q&As to your 000-771 Exam preparation. In the 000-771 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the 000-771 Exam TestInside Practice Exams for IBM **IBM certifications II** Certification 000-771 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-771 Exam.

000-771 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the IBM certifications II product experts, included the current newest 000-771 examination questions.

3. 100% Guarantee to Pass Your IBM certifications II exam and get your IBM certifications II Certification.

If you do not pass the IBM Certification 000-771 exam (IBM Tivoli Provisioning Mgrw/Orchestration V3.1 Implement) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 000-771 Q&A ensure you pass the exam at your first try.

TestInside professional provide IBM certifications II 000-771 the newest Q&A, completely covers 000-771 test original topic. With our complete IBM certifications II resources, you will minimize your IBM certifications II cost and be ready to pass your 000-771 tests on Your First Try, 100% Money Back Guarantee included!

[IBM 000-771](#) Test belongs to one of the IBM certifications II certified test, if needs to obtain the IBM certifications II certificate, you also need to participate in other related test, the details you may visit the [IBM certifications II](#) certified topic, in there, you will see all related IBM certifications II certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 000-771 exam

000-771 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-771 exam questions updated on regular basis

Same type as the certification exams, 000-771 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-771 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : IBM 000-771

Title : IBM Tivoli Provisioning Mgrw/Orchestration V3.1 Implement

1. Where are the deployment engine log files located?

- A. \$TIO_LOGS/de
- B. \$TIO_LOGS/deploymentengine
- C. \$TIO_HOME/deploymentengine
- D. \$TIO_HOME/logs/deploymentengine

Answer: B

2. Which attribute of a subscription can users modify when the service is already provisioned?

- A. service application
- B. end time of the service
- C. start time of the service
- D. dedicated service servers

Answer: B

3. Which executable is used for a Unix/Linux server to generate the appropriate SSH key for the IBM Tivoli Provisioning Manager/IBM Tivoli Intelligent Orchestrator Server?

- A. keygen
- B. keyadd.sh
- C. ssh-keygen
- D. ssh-keyadd

Answer: C

4. How is the shared property interpreted for a resource allocation request in a virtual server template?

- A. The resource can be used by multiple virtual servers and is decremented on the host platform.
- B. The resource cannot be used by multiple virtual servers but is available to multiple host platforms.
- C. The resource can be used by multiple virtual servers and is not decremented on the host platform.
- D. The resource can be used by multiple host platforms and is only decremented on a single host platform.

Answer: C

5. When adding a storage volume to a host server which three options are valid? (Choose three.)

- A. Storage Volume
- B. Storage Manager
- C. Storage Container
- D. Storage Subsystem
- E. Storage Area Network
- F. Storage Channel Adaptor

Answer: ABD

6. What is required to create a new user in the IBM Tivoli Provisioning Manager/IBM Tivoli Intelligent Orchestrator V3.1 user interface?

- A. e-mail address
- B. superuser designation

- C. default access group
- D. a pre-existing system user account

Answer: C

7. What is the purpose of a Fibre Channel switch?

- A. It allows the allocation of storage to Clients.
- B. It recovers lost data in the event of a failure.
- C. It connects clusters to the storage area network (SAN) fabric.
- D. It allows the administrator to manage ports and connect storage subsystems to the storage area network (SAN) fabric.

Answer: D

8. Where are newly discovered servers found in the IBM Tivoli Provisioning Manager/IBM Tivoli Intelligent Orchestrator V3.1 user interface?

- A. Inventory-> Servers
- B. Configuration-> Discovery-> Servers
- C. Inventory-> Discovered -> Discovered Servers
- D. Configuration-> Discovered -> Discovered Servers

Answer: C

9. What is the default Distinguished Name (DN) for the IBM Tivoli Directory Server administrator?

- A. cn=root
- B. cn=tioldap
- C. dn=tioldap
- D. cn=tiadmin

Answer: A

10. How are Data Center Model (DCM) objects imported?

- A. by using the XML import tool from the command line interface
- B. by invoking the XML.Import logical device operation from the Web interface
- C. by invoking the XML import tool from the Inventory view in the user interface
- D. It is not possible to import DCM objects after installation of the IBM Tivoli Provisioning Manager/IBM Tivoli Intelligent Orchestrator.

Answer: A

11. How is a device driver associated with a boot server?

- A. It is not possible to associate a device driver to a boot server.
- B. The SetDeviceDriver logical device operation is invoked from the user interface.
- C. The device driver on the Workflows tab of the boot server in the user interface is specified.
- D. The device driver in the Add Boot Server dialog is specified when creating the boot server in the user interface.

Answer: C

12. The IBM Tivoli Provisioning Manager/IBM Tivoli Intelligent Orchestrator server has been up and running for a long time and suddenly workflow deployments fail. The administrator suspects a down level version of MQ is installed.

Which command verifies this?

- A. mqdsp
- B. mqver
- C. mqlevel
- D. amqvget

Answer: B

13. Once all prerequisites are installed and when installing IBM Tivoli Provisioning Manager/ IBM Tivoli Intelligent Orchestrator V3.1 on Windows, which two installation parameters are required? (Choose two).

- A. DB2 instance owner
- B. LDAP server install location
- C. ITPM administrator user name
- D. LDAP administrator account information
- E. WebSphere Application Server administrator account information

Answer: AD

14. An administrator successfully adds server XYZ to an application tier, but notices a previous attempt to add server ABC to the same application tier failed. Where can the administrator look to determine why the workflow failed for server ABC?

- A. \$TIO_LOGS/de/output.log
- B. \$WAS_HOME/logs/server1/Deployments.log
- C. In the Deployment Requests section of the user interface.
- D. The history for server ABC was overwritten when server XYZ was added to the application tier.

Answer: C

15. Viewing Server Utilization statistics in the user interface requires which server variable to be defined?

- A. system.driver
- B. snmp.device.filter
- C. server-utilization
- D. cpu-utilization.device

Answer: D

16. Which log file contains information about starting IBM Tivoli Provisioning Manager?

- A. \$WAS_LOGS/start.log
- B. \$TIO_LOGS/tio_start.log
- C. \$WAS_HOME/logs/tclear.log
- D. \$TIO_HOME/logs/tio_start.log

Answer: B

17. Which two actions are required to allocate a virtual server from a host platform? (Choose two.)

- A. Create a virtual server template.
- B. Setup a virtual resource pool to group virtual servers.
- C. Associate the host platform server with a boot server.
- D. Define hardware resources on the host platform available to the virtual server.
- E. Mark the host platform as managed by IBM Tivoli Provisioning Manager/IBM Tivoli Intelligent Orchestrator.

Answer: AD

18. Which two statements are true for the user ID tioldap? (Choose two.)

- A. This account must be granted tree ownership.
- B. It is used by IBM WebSphere as the administrator account.
- C. It is used by WebSphere to connect to the IBM Tivoli Directory Server.
- D. It is used to log into the IBM Tivoli Provisioning Manager/Tivoli Intelligent Orchestrator Web console.
- E. It is used by the IBM Tivoli Provisioning Manager/IBM Tivoli Intelligent Orchestrator server for system initiated actions.

Answer: AC

19. When creating a customer in the user interface which field is a required entry?

- A. The application name
- B. The name of the customer
- C. The name of the associated Logical Device Operation
- D. Assignment of the dedicated server for the customer

Answer: B

20. What needs to be configured for IBM Tivoli Provisioning Manager (ITPM)/IBM Tivoli Intelligent Orchestrator (ITIO) reporting to work?

- A. Crystal Reports
- B. Tivoli Data Warehouse
- C. IBM DB2 Data Warehouse
- D. Functionality is preconfigured in ITPM/ITIO

Answer: D
