Exam : Lotus 190-956

Title : IBM Lotus Notes Domino 8.5 System Administration Update.

1. In Lotus Notes 8.5, the start-up sequence has been reordered for users. Presume that the following notes.ini entry is configured:

ENABLE\_EARLY\_AUTHENTICATION=0

Which of the following occurs to the user experience?

- A. Users are not allowed to utilize Windows shared login
- B. Users are prompted to authenticate before the Notes workbench
- C. The Notes workbench appears, and users are prompted to authenticate
- D. Users are forced to utilize Windows shared login instead of Notes login

Answer: C

2. Your Domino server has been configured for DAOS, and all mailfiles have also been enabled successfully. In which of the following times will consolidation occur when a user saves an attachment that meets the defined DAOS size settings?

- A. Immediately
- B. The next time the DAOS service runs
- C. After the user closes the current Notes session
- D. By the schedule defined in the server configuration document

Answer: A

3. When a user removes a mail message with an attachment stored in DAOS, which of the following occurs if the user is assigned a mail quota?

- A. The total attachment size is removed against the user's quota
- B. The total size of the mail message and attachment is removed against the user's quota
- C. The total size of any attachment stored in DAOS does not count toward the user's quota
- D. The total size of the mail message without the attachment is removed against the user's quota

Answer: A

4. Your current Domino server supports Domino Attachment and Object Service. The attachment store has grown even though user mailfiles maintain only 90 days of mail data. Which of the following server commands might be issued to force DAOS to delete unreferenced objects?

- A. Tell DAOSMgr Prune
- B. Load DAOS -collect
- C. Tell DAOS -validate
- D. Load DAOS Detach Obsolete

Answer: A

5. To help thwart unauthorized access to ID files in the ID vault, you can choose to require which of the following?

- A. That someone with password reset authority approves all ID downloads
- B. That only group names are placed in the vault security document in the Domino server
- C. That the person fills out a download request in the vault to be approved by a vault manager
- D. That the ID vault be encrypted with a secret encryption key shared with only the proper administrators

Answer: A

6. Notes shared login allows users to start Lotus Notes with their Notes IDs without having to provide Notes passwords. Instead, which of the following do they need to provide?

- A. A secret passphrase
- B. A Windows password
- C. Passwords from more than one person
- D. An unlock code from the ID vault on their home server

Answer: B

7. After enabling DAOS for a mail database on your server, which of the following compact tasks must be run on the database to complete the initialization for DAOS on that database?

- A. In-place
- B. Copy-style
- C. Revert database
- D. Discard view indexes

Answer: B

8. Your development team has modified the client download site for Lotus Traveler. All of the changes, though, are not being seen as the server is still pointing to the old directory and files. You have successfully modified the Home URL in the Internet Site Document. Which of the following must also be modified?

- A. The servlet utilized by the Domino Web server
- B. The NTS\_WEBSITE\_HOME parameter in the notes.ini file
- C. Disable Internet Site documents in the Domino server
- D. Make TCP port 8642 available to all users to see the new site documents

Answer: B

9. You completed the process of upgrading your Domino server, and you are in the process of enabling DAOS for your user mailfiles. When can you enable the DAOS feature for mailfiles that will not be upgraded until a later date?

- A. Immediately
- B. After the mailfile upgrade
- C. When users approve the mailfilemail file upgrade
- D. After running the required compact task

Answer: A

10. While upgrading his Domino servers to 8.5, Clint is considering utilizing the Domino Attachment and Object Service. He has not migrated all of his databases to the new on-disk structure (ODS), however, so the option is not available. Which of the following steps can he perform to prepare them for DAOS?

- A. He can pre-enable them for consolidation
- B. He can create a program document to enable the feature
- C. He can change the file extension of the databases to .ns8
- D. He can create an Administration Process request that will process only when the databases are upgraded

Answer: A

11. Terry is working on a document in a database on a server that is DAOS-enabled. While in the document, Terry replaces the attachment with a new version. Which of the following occurs to the attachment in the DAOS store?

- A. The server adjusts references to the attachment in DAOS
- B. The server removes the reference from all mail files that pointed to that original file reference
- C. The server removes the previous attachment entirely from DAOS and inserts the link to the new attachment
- D. The server sends the full previous attachment to all user mail files that pointed to that original file reference

Answer: A

12. DAOS has been enabled on your Domino server for mailfiles in the Human Resources department. Which of the following compression types must be selected on the mailfiles for attachments?

- A.LZ1
  - B.ZIP
  - C.Crider
  - D.Huffman
- Answer: A

13. The following variable was found in a user's notes.ini file:

ENABLE\_EARLY\_AUTHENTICATION=0

Which of the following will not function properly?

- A.Roaming user
- B.Authentication after the Notes workbench appears
- C.The ability to log into the integrated Sametime client
- D.The ability to recover user ID files from the server ID vault

Answer: A

14. Upon viewing the Administration Process activity through the statistics generated during administration request processing, you have found a large number of Waiting statistics in one of the message queues. Which of the following would this signify?

- A.Administration Process threads are waiting for requests to process
- B.The administrator has pending Administration Process requests for approval
- C.The server is processing requests without utilizing all the process handlers
- D.The request processing threads are busy running requests that take longer times

Answer: D

15. Which of the following causes a new server thread to be created that monitors all messages written to the console log file and duplicates these messages into another file?

- A.File log output
- B.Notes text logging
- C.Console log mirroring
- D.Server log duplicating

Answer: C
