Exam : [1Y0-A06](#)

"Implementing Citrix Provisioning Server 5.0", also known as 1Y0-A06 exam, is a Citrix certification. With the complete collection of questions and answers, TestInside has assembled to take you through 102 Q&As to your 1Y0-A06 Exam preparation. In the 1Y0-A06 exam resources, you will cover every field and category in Citrix Certification helping to ready you for your successful Citrix Certification.

Quality and Value for the 1Y0-A06 Exam TestInside Practice Exams for Citrix **Citrix Other Certification** Certification 1Y0-A06 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

#### **TestInside provide the professional Q&A.**

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 1Y0-A06 Exam.

1Y0-A06 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Citrix Other Certification product experts, included the current newest 1Y0-A06 examination questions.

3. 100% Guarantee to Pass Your Citrix Other Certification exam and get your Citrix Other Certification Certification.

If you do not pass the Citrix Certification 1Y0-A06 exam (Implementing Citrix Provisioning Server 5.0) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

#### **use TestInside 1Y0-A06 Q&A ensure you pass the exam at your first try.**

TestInside professional provide Citrix Other Certification 1Y0-A06 the newest Q&A, completely covers 1Y0-A06 test original topic. With our complete Citrix Other Certification resources, you will minimize your Citrix Other Certification cost and be ready to pass your 1Y0-A06 tests on Your First Try, 100% Money Back Guarantee included!

[Citrix 1Y0-A06](#) Test belongs to one of the Citrix Other Certification certified test, if needs to obtain the Citrix Other Certification certificate, you also need to participate in other related test, the details you may visit the [Citrix Other Certification](#) certified topic, in there, you will see all related Citrix Other Certification certified subject of examination.

#### **TestInside Testing Engine Features**

Comprehensive questions and answers about 1Y0-A06 exam

1Y0-A06 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

1Y0-A06 exam questions updated on regular basis

Same type as the certification exams, 1Y0-A06 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 1Y0-A06 exam demo before you decide to buy it in Test-Inside.com.

Exam : Citrix 1Y0-A06

Title : Implementing Citrix Provisioning Server 5.0

1. Which step must an administrator take before configuring administrative roles within a Provisioning Server environment?

- A. Create an administrative service account
- B. Create the administrative groups in Active Directory
- C. Grant the farm administrator db\_admin rights in SQL
- D. Add the currently logged in user to the local administrator group

Answer: B

2. Scenario: An organization has several branch offices. Each branch office will have an administrator that manages target devices for their location. The farm administrator will oversee the branch office administrators and wishes to make role delegation simple and easy to manage. How should the farm administrator lay out the farm?

- A. Configure a single farm store
- B. Set up a farm for each branch location
- C. Create sites according to branch location
- D. Assign each branch location a farm administrator

Answer: C

3. Which DHCP option identifies the IP address of the TFTP service?

- A. 60
- B. 66
- C. 67
- D. 69

Answer: B

4. An administrator is configuring a store that points to the UNC path of the Windows file share where the vDisks are stored. Which two store types could the administrator be configuring in this scenario? (Choose two.)

- A. Site
- B. Farm
- C. Private
- D. Distributed

Answer: AB

5. Scenario: An administrator is planning a Provisioning Server 5.0 environment for a worldwide organization; there are four offices on two continents. The administrator intends to set up a different farm for each of the four office locations in North America and Europe. How many databases must the administrator plan for when setting up the Provisioning Server 5.0 environment?

- A. Four databases, one for each farm
- B. Two databases, one for each continent
- C. One databases to keep all vDisks sentralied
- D. Five databases, one for each farm and a back up

Answer: A

6. According to best practices, what should an administrator do prior to installing Provisioning Server?

- A. Set up a proxy DHCP
- B. Set up the SOAP service
- C. Disable spanning tree portfast mode
- D. Assign a static IP address to each server

Answer: D

7. An administrator needs to ensure that all DHCP broadcasts are allowed through the routers in a network environment. What must the administrator do to ensure communication between target devices and the Provisioning Server are allowed through the routers in the network?

- A. Configure options 66 and 67 on the DHCP server.
- B. Configure the router using the ip helper command.
- C. Enable spanning tree portfast mode on all switch ports.
- D. Disable spanning tree protocol in the network environment.

Answer: B

8. What are the four configuration requirements for a user or system account running the Stream Service? (Choose four.)

- A. Registry read access
- B. Registry read/write access
- C. Domain administration rights
- D. Read/write access to any vDisk location
- E. Datareader/Datawriter permissions to the data store
- F. Read/write access to C:\Program Files\Citrix\Provisioning Server

Answer: ADEF

9. Scenario: An administrator wants to delegate management of a Provisioning Server farm. The administrator needs to delegate only these specific tasks:

- 1. Shut down target devices
- 2. Boot target devices
- 3. Send messages to target devices

Which role should the administrator assign for these tasks?

- A. Device Operator
- B. Site Administrator
- C. Farm Administrator
- D. Device Administrator

Answer: A

10. For which purpose do target devices use TFTP?

- A. To request and receive a boot file from the TFTP service
- B. To request and receive the IP address of the TFTP server
- C. To contact the Stream Service to stream a vDisk to the target device
- D. To contact the least busy Provisioning Server to stream a vDisk to the target device

Answer: A
