

## 1z0-035 9i DBA

### Oracle *orcacle9i dba new features for oracle7.3 and oracle9 ocps*

**Practice Exam:** 1z0-035 Exams

**Exam Number/Code:** 1z0-035

**Exam Name:** *orcacle9i dba new features for oracle7.3 and oracle9 ocps*

**Questions and Answers:** 168 Q&As

( [9i DBA](#) )

Exam : [1z0-035](#)

"orcacle9i dba new features for oracle7.3 and oracle9 ocps", also known as 1z0-035 exam, is a Oracle certification. With the complete collection of questions and answers, TestInside has assembled to take you through 168 Q&As to your 1z0-035 Exam preparation. In the 1z0-035 exam resources, you will cover every field and category in Oracle Certification helping to ready you for your successful Oracle Certification.

Quality and Value for the 1z0-035 Exam TestInside Practice Exams for Oracle **9i DBA** Certification 1z0-035 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

#### ***TestInside provide the professional Q&A.***

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 1z0-035 Exam.

1z0-035 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the 9i DBA product experts, included the current newest 1z0-035 examination questions.

3. 100% Guarantee to Pass Your 9i DBA exam and get your 9i DBA Certification.

If you do not pass the Oracle Certification 1z0-035 exam (*orcacle9i dba new features for oracle7.3 and oracle9 ocps*) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

#### ***use TestInside 1z0-035 Q&A ensure you pass the exam at your first try.***

TestInside professional provide 9i DBA 1z0-035 the newest Q&A, completely covers 1z0-035 test original topic. With our complete 9i DBA resources, you will minimize your 9i DBA cost and be ready to pass your 1z0-035 tests on Your First Try, 100% Money Back Guarantee included!

[Oracle 1z0-035](#) Test belongs to one of the 9i DBA certified test, if needs to obtain the 9i DBA certificate, you also need to participate in other related test, the details you may visit the [9i DBA](#) certified topic, in there, you will see all related 9i DBA certified subject of examination.

#### ***TestInside Testing Engine Features***

Comprehensive questions and answers about 1z0-035 exam

1z0-035 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

1z0-035 exam questions updated on regular basis

Same type as the certification exams, 1z0-035 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 1z0-035 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Oracle 1Z0-035

Title : Oracle9i dba New Features For Oracle7.3 And Oracle9 Ocps

1. Users complain that SQL statements using a particular index fail. Using DBVERIFY, you find that two separate blocks in the index have become corrupt. The database data files for user data and index are very large.

What is the least disruptive recovery strategy available in Oracle9i?

A. Rebuild the index using the online option.

B. Take the individual data file offline (not the whole tablespace), restore and recover the data file from backup with RMAN, then set the data file online again.

C. Without setting the individual data file offline, use RMAN with Block Media Recovery to restore and recover only those blocks.

D. Take the individual data file (not the whole tablespace) offline, use RMAN with Block Media Recovery to restore and recover only those blocks, then set the data file online again.

Answer: C

2. Which two statements are true? (Choose two.)

A. Composite partitioning enables you to prevent partition elimination.

B. Composite partitioning supports hash partitioned global indexes.

C. Composite partitioning is ideal for both historical data and data placement.

D. Composite partitioning provides high performance and manageability, like range partitioning.

Answer: CD

3. Which type of index should be created to spread the distribution of index updates across the index tree?

A. B-tree indexes

B. bitmap indexes

C. reverse-key indexes

D. function-based indexes

Answer: C

4. What is one benefit of using the ALTER TABLE ... MOVE command rather than a CREATE TABLE ... AS SELECT command?

A. row chaining is eliminated.

B. index definitions are retained.

C. duplicate space is not required while the command executes.

D. all operations, such as INSERT, UPDATE, DELETE, and SELECT can be performed while the operation completes.

Answer: B

5. Consider the following scenario using incremental backups. A level 1 backup is taken on the first of the month. A level 2 backup is taken every Sunday, and a level 3 backup is taken daily. If the database gets corrupted on the second Wednesday of the month and is lost, which scenario would restore the database completely?

A. the weekly backup (level 2) and the daily backup (level 3)

B. the monthly backup (level 1) and the daily backup (level 3)

C. a base level backup (level 0) is missing and nothing can be recovered

D. the monthly backup (level 1), the weekly backup (level 2) and the daily backup (level 3)

Answer: C

6. In order to speed foreign key creation, Oracle9i will cache the first \_\_\_\_\_ primary key values only where there are multirow DML statements.

- A. 32
- B. 128
- C. 256
- D. 512

Answer: C

7. Which three features are provided by Recovery Manager and NOT provided by user-managed backup and recovery? (Choose three.)

- A. online backups
- B. skipping unused blocks
- C. partial database backups
- D. incremental block-level backup
- E. detection of corrupted blocks during backup

Answer: BDE

8. What criterion does Oracle9i use to determine whether a database file is an Oracle Managed File?

- A. the filename format
- B. information stored inside a data dictionary table
- C. information stored in the ALERT.LOG file for the corresponding instance
- D. information stored inside the corresponding initialization parameter file for the instance

Answer: A

9. Examine the statement:

```
DROP TABLESPACE IND2  
INCLUDING CONTENTS  
AND DATAFILES;
```

What is the result of the statement?

- A. The contents and data files belonging to the IND2 tablespace are dropped.
- B. The statement will only succeed if the IND2 tablespace was built using Oracle-Managed Files (OMF) data files.
- C. The statement will only succeed if the data files belonging to the IND2 tablespace are Oracle-Managed Files (OMF) or if the database was created using OMF.
- D. The contents of the tablespace are dropped along with all its data files except those identified with the Oracle-Managed Files (OMF) naming convention.

Answer: A

10. In the Oracle9i Data Guard architecture, what is the purpose of the Log Transport Services?

- A. to transfer redo log information to one or more destinations
- B. to apply redo log records sent from the primary database to a standby database at the receiving location
- C. to synchronize changes to the control files on all standby databases with changes on the primary database when a log switch occurs
- D. to batch archived log files on the primary database until a defined number of checkpoints have been processed and then to distribute the archives to each standby database

Answer: A

11. Which four are true regarding the Workspace Manager in Oracle9i? (Choose four.)

- A. automatically versions all tables
- B. automatically installed with Oracle9i
- C. merges changes with parent rows or discards changes
- D. provides mechanism to identify and resolve conflicts

E. allows for version enabling tables by use of a packaged procedure

Answer: BCDE

12. What do you need to do in order for the Database Resource Manager to estimate, in advance, the execution time of a statement?

- A. Set the TIMED\_STATISTICS initialization parameter.
- B. Gather optimizer statistics on related objects.
- C. Set the TIMED\_OS\_STATISTICS initialization parameter.
- D. Nothing

Answer: B

13. Which two are true regarding external tables? (Choose two.)

- A. External tables can be updated.
- B. External tables are read-only tables.
- C. Indexes can be created on external tables.
- D. Indexes cannot be created on external tables.

Answer: BD

14. Online index rebuild functionality has been extended to include which four index structures? (Choose four.)

- A. bitmap indexes
- B. reverse key indexes
- C. function-based indexes
- D. key-compressed indexes on regular tables
- E. key-compressed indexes on IOT (including secondary indexes)

Answer: BCDE

15. Which type of ROWID does Oracle use for global indexes on partitioned tables?

- A. local
- B. extended
- C. restricted

Answer: B

16. What is true about version-enabled tables?

- A. The unit of versioning is the schema.
- B. It is possible to version enable a table pertaining to SYS.
- C. There are as many segments as versions for the same base table.
- D. It is possible to create workspaces if there is no version-enabled table in the database.

Answer: D

17. What statement is true about taking a database default temporary tablespace offline?

- A. You cannot take a default temporary tablespace offline.
- B. The database must be quiesced before you perform this action.
- C. You must ensure that all users are assigned to an alternative temporary tablespace first.
- D. You must first ensure that the default temporary tablespace has the permanent tablespace characteristic.

Answer: A

18. Consider the following statement:

```
SQL> EXECUTE DBMS_STATS.GATHER_SCHEMA_STATS (-  
2> ownname => 'OE', -  
3> estimate_percent => DBMS_STATS.AUTO_SAMPLE_SIZE, -  
4> method_opt => 'for all columns size AUTO');
```

What is the effect of 'for all columns size AUTO' of the METHOD\_OPT option?

- A. The Oracle server creates a new histogram based on existing histogram definitions for all table, column, and index

statistics for the OE schema.

B. The Oracle server creates a histogram based on data distribution regardless of how the application uses the column/s for all table, column, and index statistics for the OE schema.

C. The Oracle server creates a histogram based on data distribution and application usage of the column/s for all table, column, and index statistics for the OE schema.

D. The Oracle server creates a histogram based on application usage, regardless of data distribution, for all table, column, and index statistics for the OE schema.

Answer: C

19. Which two statements about dimensions are true? (Choose two.)

A. A hierarchy can consist of multiple levels.

B. A dimension can be based on multiple tables.

C. A dimension can contain only a single hierarchy.

D. No special privileges are required to create a dimension.

Answer: AB

20. Which CREATE TABLE parameter should you be concerned with if the length of rows in an index-organized table vary over a wide range of values?

A. PCTFREE

B. PCTUSED

C. PCTINCREASE

D. PCTTHRESHOLD

Answer: D
