SUN Sun Certified System Administrator for Sun Cluster 3.2

Practice Exam: 310-345 Exams

Exam Number/Code: 310-345

Exam Name: Sun Certified System Administrator for Sun Cluster 3.2

Questions and Answers: 243 Q&As

([SUN Other Certifications](#))

Exam : [310-345](#)

"Sun Certified System Administrator for Sun Cluster 3.2", also known as 310-345 exam, is a SUN certification. With the complete collection of questions and answers, TestInside has assembled to take you through 243 Q&As to your 310-345 Exam preparation. In the 310-345 exam resources, you will cover every field and category in SUN Certification helping to ready you for your successful SUN Certification.

Quality and Value for the 310-345 Exam TestInside Practice Exams for SUN **SUN Other Certifications** Certification 310-345 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 310-345 Exam.

310-345 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the SUN Other Certifications product experts, included the current newest 310-345 examination questions.

3. 100% Guarantee to Pass Your SUN Other Certifications exam and get your SUN Other Certifications Certification.

If you do not pass the SUN Certification 310-345 exam (Sun Certified System Administrator for Sun Cluster 3.2) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 310-345 Q&A ensure you pass the exam at your first try.

TestInside professional provide SUN Other Certifications 310-345 the newest Q&A, completely covers 310-345 test original topic. With our complete SUN Other Certifications resources, you will minimize your SUN Other Certifications cost and be ready to pass your 310-345 tests on Your First Try, 100% Money Back Guarantee included!

[SUN 310-345](#) Test belongs to one of the SUN Other Certifications certified test, if needs to obtain the SUN Other Certifications certificate, you also need to participate in other related test, the details you may visit the [SUN Other Certifications](#) certified topic, in there, you will see all related SUN Other Certifications certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 310-345 exam

310-345 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

310-345 exam questions updated on regular basis

Same type as the certification exams, 310-345 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 310-345 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : SUN 310-345

Title : Sun Certified System Administrator for Sun Cluster 3.2

1. When using ZFS for your shared storage within the cluster, how do you specify the file system mountpoint?

A. ZFS does not use mountpoints.

B. You must define mountpoints in the /etc/vfstab file first.

C. ZFS mountpoints default to /poolname/fsname, but you can change them to whatever you want using the zfs command.

D. Sun Cluster chooses the name of the file system mountpoints for ZFS.

Answer: C

2. What is the maximum number of private interconnects supported in Sun Cluster 3.2?

A. Six

B. Four

C. One

D. Two

Answer: A

3. What is the minimum number of nodes required to make a highly available cluster?

A. One

B. Two

C. Four

D. Eight

Answer: B

4. You are setting up a cluster. You want to mirror your storage devices using Veritas Volume Manager from one array to another.

Which software RAID volume management application would you use if your database application was Oracle RAC?

A. Solaris Volume Manager

B. Veritas Volume Manager

C. Veritas Cluster Volume Manager

D. Solaris Volume Manager for Sun Cluster

Answer: C

5. Which four files and settings get automatically configured by scinstall? (Choose four.)

A. /etc/hosts

B. /etc/vfstab

C. auto-boot?

D. /etc/dfs/dfstab

E. /etc/defaultrouter

F. local-mac-address?

G. /etc/inet/ntp.conf.cluster

Answer: ABFG

6. When you plan for a two-node cluster there are several hardware components possible. Some components are absolutely required, some are optional.

Which item identifies the optional component?

- A.boot disks
- B.redundant transport
- C.terminal concentrator for console access
- D.storage connections from each host to each shared storage box

Answer: C

7. The `clrg show` command shows the following output for `pippo-rg` resource group.

Resource group `nfs-rg` is configured to run only on node `fachiro`.

Resource Group: `pippo-rg`

RG_description:

RG_mode: Scalable

RG_state: Unmanaged

RG_project_name: default

RG_affinities: `--nfs-rg`

RG_SLM_type: manual

Auto_start_on_new_cluster: True

Failback: False

Nodelist: `fachiro zippo`

Which is correct about the resource group configuration?

- A.It is a scalable resource group that will not run on node `fachiro` if `nfs-rg` is online.
- B.The `nfs-rg` resource group will stop when `pippo-rg` switch to node `fachiro`.
- C.RG_affinities cannot be configured into a scalable resource group.
- D.The `clrg show +` command would provide different information about the resource group.

Answer: A

8. Your customer has chosen to use Solaris Volume Manager for their shared disks. A diskset named `ds1` has already been created with `node1` and `node2` being able to master the diskset. The customer would like to build a mirrored volume to contain their application data.

The diskset `ds1` contains two 36 Gbyte disk drives using `did` devices `d4` and `d8`.

The customer would like to use as volume names `d101` and `d102` as the submirrors and `d100` as the mirror.

Which sequence of commands will accomplish this task?

- A.

```
metainit d101 1 1 /dev/did/rdisk/d4s0
metainit d102 1 1 /dev/did/rdisk/d8s0
metainit d100 -m d101
metattach d100 d102
```
- B.

```
metainit d101 1 1 /dev/did/rdisk/d4s0
metainit d102 1 1 /dev/did/rdisk/d8s0
metainit d100 -m d101,d102
```
- C.

```
metacreate -s ds1 d101 /dev/did/rdisk/d4s0
metacreate -s ds1 d102 /dev/did/rdisk/d8s0
metamirror -s ds1 d100 d101,d102
```
- D.

```
metainit -s ds1 d101 1 1 /dev/did/rdisk/d4s0
metainit -s ds1 d102 1 1 /dev/did/rdisk/d8s0
metainit -s ds1 d100 -m d101
metattach -s ds1 d100 d102
```

Answer: D

9. What is the reason that the Openboot Prom variable `local-mac-address?` needs to be set to `true`?

- A.This setting is NOT required in Sun Cluster 3.2.
- B.There is no logical reason for this setting to be true.

- C.Cluster transport will fail if the setting is false.
- D.The test address enables test traffic on ALL members of the IPMP group.

Answer: D

10. Every multi-node cluster has to have private interconnect hardware.
Which three items identify how the cluster uses the interconnect? (Choose three.)

- A.The global data access traverses the interconnect.
- B.The load balancer sends inbound requests to other nodes over the interconnect.
- C.The cluster needs the interconnect to decide about its cluster membership.
- D.Every application configured in the cluster gains performance benefits from the interconnect.
- E.If a node loses its public network completely, the network traffic is rerouted over the interconnect.

Answer: ABC

11. Which two types of communication can occur on the private interconnect? (Choose two.)

- A.cluster heartbeats
- B.application data transfer
- C.vxconfigd communication
- D.Solaris Volume Manager communication

Answer: AB

12. Given:

What is the name of the cluster topology shown?

- A.N+1
- B.Pair + N
- C.Scalable N*N
- D.Clustered Pairs

Answer: D

13. What command should be used to register a NAS device before it can be used as a quorum device?

- A.clnas add -t netapp -u root
- B.clq add -t netapp -p qshost= -p port=9000
- C.clnas set -p
- D.clq add -t netapp -u root

Answer: A

14. You have a four-node cluster with no quorum device. The node mars will be down for an extended period of time.
After you have shut down mars, which commands, if any, should you run on one of the remaining nodes?

- A.clq disable mars
- B.clq set -p maintenance mars
- C.cluster set -p maintenance mars
- D.None, cluster takes care of this automatically

Answer: A

15. When talking to support personnel the cluster administrator may need to know the version of your installed cluster.

What command will the cluster administrator use to obtain the installed cluster package release information on a node or all nodes?

- A.clclustrev -v
- B.clnode show-rev -v
- C.clclust node-rev -v
- D.clnode clust-rev -v

Answer: B

16. What mechanism does Sun Cluster 3.2 use to keep the time-of-day clock synchronized between cluster nodes?

- A.ntp
- B.y2k
- C.cron
- D.rdate

Answer: A

17. What functionality does the global device implementation provide?

- A.A failed device will be transparently replaced by a spare.
- B.All nodes on the public network can access the cluster storage.
- C.Storage connected to any cluster node is available to all cluster nodes using standard device semantics.
- D.Only cluster nodes that are physically connected to a storage device can directly access that device simultaneously.

Answer: C

18. Which two can be performed when using Solaris 10 zones? (Choose two.)

- A.Run the complete cluster framework in non-global zones.
- B.Configure a highly available nfs server only in a non-global zone.
- C.Install an application that can fail over between non-global zones.
- D.Install an application that can fail over between the global zones and the non-global zones.

Answer: CD

19. During the scinstall process the cluster administrator has to configure the cluster transport.

Which step does the cluster administrator have to perform in a typical cluster configuration?

- A.Select the transport adapters.
- B.Select the IP range for the private networks.
- C.Construct the public network VLANS for a tagged VLAN.
- D.Select the netmask for the cluster interconnect on a typical install.

Answer: A

20. What is the minimum number of private interconnects recommended to build a two-node cluster using Sun Cluster 3.2?

- A.None
- B.Two
- C.Six
- D.One

Answer: B
