

350-020 CCIE

Cisco CCIE SP Optical Qualification Exam

Practice Exam: 350-020 Exams

Exam Number/Code: 350-020

Exam Name: CCIE SP Optical Qualification Exam

Questions and Answers: 400 Q&As

([CCIE](#))

Exam : [350-020](#)

"CCIE SP Optical Qualification Exam", also known as 350-020 exam, is a Cisco certification. With the complete collection of questions and answers, TestInside has assembled to take you through 400 Q&As to your 350-020 Exam preparation. In the 350-020 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Quality and Value for the 350-020 Exam TestInside Practice Exams for Cisco **CCIE** Certification 350-020 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 350-020 Exam.

350-020 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the CCIE product experts, included the current newest 350-020 examination questions.

3. 100% Guarantee to Pass Your CCIE exam and get your CCIE Certification.

If you do not pass the Cisco Certification 350-020 exam (CCIE SP Optical Qualification Exam) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 350-020 Q&A ensure you pass the exam at your first try.

TestInside professional provide CCIE 350-020 the newest Q&A, completely covers 350-020 test original topic. With our complete CCIE resources, you will minimize your CCIE cost and be ready to pass your 350-020 tests on Your First Try, 100% Money Back Guarantee included!

[Cisco 350-020](#) Test belongs to one of the CCIE certified test, if needs to obtain the CCIE certificate, you also need to participate in other related test, the details you may visit the [CCIE](#) certified topic, in there, you will see all related CCIE certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 350-020 exam

350-020 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

350-020 exam questions updated on regular basis

Same type as the certification exams, 350-020 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 350-020 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Cisco 350-020

Title : CCIE SP Optical Qualification Exam

1. Click the Exhibit to view the topology.

Router A has a 512K-access port into the frame relay cloud. Router B has 128K-access port into the frame relay cloud. The two routers are connected with symmetrical PVCs that are configured for 64K committed information rate (CIR). What Frame Relay Traffic Shaping map-class sub-command should be entered on Router A to prevent workstation A from overrunning the access port on Router B?

- A. frame-relay traffic-rate 128000 512000
- B. frame-relay traffic-rate 64000 512000
- C. frame-relay traffic-rate 512000 64000
- D. frame-relay traffic-rate 128000 64000
- E. frame-relay traffic-rate 64000 128000

Answer: E

2. What is the equivalent of 50 GHz spacing in DWDM in terms of nm?

- A. 1.6 nm
- B. 0.8 nm
- C. 0.4 nm
- D. 0.2 nm

Answer: C

3. How many E-1s can be aggregated (maximum) and mapped into a VC-12 Signal?

- A. 1
- B. 7
- C. 14
- D. 28
- E. 32

Answer: A

4. What IE is not mandatory in a Q.931 Service msg?

- A. Bearer capability
- B. Channel ID
- C. Message Type
- D. Change Status
- E. Call Reference

Answer: A

5. While entering commands on a console, the break key is pressed accidentally and the router reboots. What action could disable this problem?

- A. In configuration mode, enter disable break.
- B. In configuration mode, enter no service break.
- C. Change the configuration register.
- D. Replace the router - this is an invalid response to pressing the break key when past 60 seconds after boot.

Answer: C

6. What describes a technique, used to encapsulate voice (NOT data) over ATM?

- A. RFC 1483
- B. LANE
- C. AAL-1
- D. RFC 1577

Answer: C

7. MPLS traffic engineering data is carried by:

- A. Opaque LSAs or IS-IS TLVs
- B. BGP MEDs
- C. RTP or RTCP packets
- D. MBGP

Answer: A

8. Click the Exhibit button to view the topology.

According to the diagram, what attribute is initiated by AS200 (IBGP) to give preference to the path A or D traffic will take when going from AS200 to AS100 . What attribute is initiated by AS200 (EBGP) to give preference to the path B or C traffic will take when going from AS100 to AS200?

- A. MED; Origin
- B. MED; Local Preference
- C. Community; Origin
- D. Local Preference; MED
- E. Origin; Community

Answer: D

9. What is the maximum PMD value of a 100km fiber segment if the cable is specified with 0.5ps/km ? (worst case)?

- A. 0.005ps
- B. .05ps
- C. 5ps
- D. 50ps
- E. 500ps

Answer: C

10. The purpose of Administrative Distance, as used by Cisco routers, is:

- A. To choose between routes from different routing protocols when receiving updates for the same network
- B. To identify which routing protocol forwarded the update
- C. To define the distance to the destination used in deciding the best path
- D. To be used only for administrative purposes

Answer: A

11. Click the Exhibit button to view the configuration.

Upon deleting an IOS image file from flash, an execution of show flash shows the file still in flash, with a 'D' preceding it (as shown in the exhibit). What step must be taken in order to remove the file completely?

- A. Erase the file from flash
- B. Format the flash device
- C. Replace the flash card - it is defective
- D. Execute a squeeze command on the flash device

Answer: D

12. BGP can implement a policy of 'Route Dampening' to control route instability. What statement about route dampening is NOT correct?

- A. A numeric penalty is applied to a route each time it flaps.
- B. The penalty is exponentially decayed according to parameters, such as half-life-time.

C. The history of unstable routes is forwarded back to the sender to control future updates.

D. The route is eventually suppressed based on a configurable 'suppress limit'.

Answer: C

13. Click the Exhibit button.

Which are the two possible circuit sizes for an E-series shared packet ring in the network shown in the exhibit?

A. STS-1

B. STS-3c

C. STS-6c

D. STS-9c

E. STS-12c

Answer: AB

14. What is NOT an ATM class of service?

A. CBR

B. VBR-t

C. ABR

D. UBR

E. CAR

Answer: E

15. What is Fast EtherChannel?

A. A feature to bundle multiple Ethernet point-to-point links quickly into one logical high speed link

B. A feature to bundle multiple Fast-Ethernet point-to-point links into one logical high speed link

C. Another name for full-duplex Fast Ethernet

D. Another name for Gigabit Ethernet

E. None of the above

Answer: B

16. Click the Exhibit button.

A customer has improperly installed a 2-node OC-12 SRP ring using dark fiber. Based on the printout from each node shown in the exhibit, what is the problem?

A. Misconfigured timing

B. Single faulty span or fiber between nodes

C. A-B side SRP interfaces are fiber-looped on each node

D. A-B side TX-TX and RX-RX fibers connected between nodes

E. A-A and B-B side SRP interfaces connected between nodes

Answer: C

17. How many E1 channels can STM-1 frame transport?

A. 7

B. 21

C. 63

D. 84

Answer: C

18. If a host sends a TCP segment with the RST flag set, it means:

A. The receiver should send all data in the reassembly buffer to the application receiving it immediately.

B. The receiver should reset the session.

C. Any routers between the source and destination hosts should reset the state of the connection in their buffers.

D. The receiver should make certain its send buffer is pushed onto the wire.

Answer: B

19. Click the Exhibit button.

In the diagram, if a resilient packet ring (RPR) is built between ML-series cards, ____ restoration exists on the ring, while the redundant connections to the 7609 rely on ____ protection.

- A. 50 ms, STP
- B. STP, STP
- C. STP, 1+1 APS
- D. 50ms, 50ms

Answer: A

20. Which three events might you diagnose as the cause of a line switching event?

- A. Loss of signal and frame
- B. Line AIS (all ones in STS pointer)
- C. Routine exercises
- D. Excessive signaling messages
- E. Excessive bit errors in overhead
- F. Switched photon elements

Answer: ABE
