

642-342 Content Networking Cisco Content Networking Exam (CN)

Practice Exam: 642-342 Exams

Exam Number/Code: 642-342

Exam Name: Content Networking Exam (CN)

Questions and Answers: 70 Q&As

([Content Networking](#))

Exam : [642-342](#)

"Content Networking Exam (CN) ", also known as 642-342 exam, is a Cisco certification. With the complete collection of questions and answers, TestInside has assembled to take you through 70 Q&As to your 642-342 Exam preparation. In the 642-342 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Quality and Value for the 642-342 Exam TestInside Practice Exams for Cisco **Content Networking** Certification 642-342 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 642-342 Exam.

642-342 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Content Networking product experts, included the current newest 642-342 examination questions.

3. 100% Guarantee to Pass Your Content Networking exam and get your Content Networking Certification.

If you do not pass the Cisco Certification 642-342 exam (Content Networking Exam (CN)) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 642-342 Q&A ensure you pass the exam at your first try.

TestInside professional provide Content Networking 642-342 the newest Q&A, completely covers 642-342 test original topic. With our complete Content Networking resources, you will minimize your Content Networking cost and be ready to pass your 642-342 tests on Your First Try, 100% Money Back Guarantee included!

[Cisco 642-342](#) Test belongs to one of the Content Networking certified test, if needs to obtain the Content Networking certificate, you also need to participate in other related test, the details you may visit the [Content Networking](#) certified topic, in there, you will see all related Content Networking certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 642-342 exam

642-342 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

642-342 exam questions updated on regular basis

Same type as the certification exams, 642-342 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 642-342 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Cisco 642-342

Title : Content Networking Exam

1. What is the primary function of DNS?

- A. to replace DHCP
- B. to host file manager
- C. to serve as a source location on the Internet
- D. to resolve a client IP address to a MAC address
- E. to serve as a host name to IP address resolution

Answer: E

2. What are three benefits of terminating SSL traffic in a Content Switch? (Choose three.)

- A. eliminates the need for SSL
- B. maintains security by allowing data to be decrypted, processed, and re-encrypted within a single device
- C. enables the Content Switch to make load balancing decisions on HTTP-layer information
- D. reduces the number of digital certificates required in most web hosting environments
- E. reduces or eliminates server burden of negotiating SSL handshakes

Answer: BCE

3. You should configure content playback and replication bandwidth through the _____ GUI.

- A. Content Engine
- B. Content Router
- C. Content Services Switch
- D. Content Distribution Manager

Answer: D

4. Which statement is true about using FTP to acquire files and directories?

- A. You can use FTP to acquire files and directories to the designated channel directory within your root Content Engine.
- B. You cannot use FTP to copy or move files and directories to the designated channel directory within your Content Distribution Manager Import directory.
- C. You can use FTP to copy or move files but not directories to the designated channel directory within your Content Distribution Manager Import directory.
- D. You can use FTP to copy or move directories but not files to the designated channel directory within your Content Distribution Manager Import directory.

Answer: A

5. Refer to the exhibit. The exhibit shows a Content Engine with WCCP enabled between the Content Engine and the router. The Client browser is configured with an HTTP proxy address of 1.2.3.4. What does this illustrate?

- A. proxy caching
- B. transparent caching
- C. reverse proxy caching
- D. transparent redirection

Answer: A

6. Which HTTP return code indicates a successful client response?

- A. 1xx
- B. 2xx
- C. 3xx
- D. 4xx
- E. 5xx

Answer: B

7. What is the correct TCP three-way handshake connection setup?

- A. SYN - FIN - ACK
- B. SYN - DATA - FIN
- C. SYN - DATA - ACK
- D. SYN - SYN/ACK - ACK
- E. SYN - SYN/ACK - FIN/ACK

Answer: D

8. An NTLM-authenticated user is prompted for login name and password when attempting to access the public Internet. What happens to the user's request if he cannot provide valid user credentials?

- A. Access to the Internet will be allowed and the user's Internet activities will be logged by IP address.
- B. The user will be denied all access to the Internet.
- C. User access to the Internet will have less priority, resulting in slower Internet access than authenticated users.
- D. The user's manager will receive an automatic notification that the user failed to provide valid credentials.

Answer: B

9. Which two statements are true about Content Routers in Application and Content Networking System? (Choose two.)

- A. Content Routers store on-demand and pre-positioned content.
- B. Content Routers route content to the edges of a content network.
- C. Content Routers contain the IGP routing tables for the routed domain.
- D. Content Routers act as authoritative DNS servers for the routed domain.
- E. Content Routers choose the most suitable Content Engines to handle a particular clients request.

Answer: DE

10. Customer ABC wants to deploy Cisco Content Engines to perform URL filtering and VOD streaming. The customer has many *.mov VOD training files that are frequently requested in the branch offices and played through the Apple QuickTime player. The files need to be pre-positioned to branch office Content Engines and served by Content Engines to client desktops. Currently standalone Smartfilter servers are being used to do content filtering, but the customer would like to take advantage of the SmartFilter on-box feature in the Cisco Content Engine. Which license should customer ABC require?

- A. Microsoft Windows Media License
- B. Real Helix Universal Gateway License
- C. Multicast Replication License
- D. Websense Content Filtering License
- E. Smartfilter Content Filtering License

Answer: E

11. You are using the active/standby method to implement a high availability Content Switching design. What are three benefits? (Choose three.)

- A. less expensive
- B. easier to troubleshoot
- C. predictable traffic path
- D. increases the overall performance
- E. predictable failover behavior

Answer: BCE

12. You are using Content Switching for Server Load Balancing. What is the purpose of sticky connections?
- A. They ensure that a TCP session remains active.
 - B. They ensure an even load balanced server farm.
 - C. They provide the ability to have connections from a client directed to the same server.
 - D. They provide a means to collect statistics for an electronic commerce application within a content network.
 - E. They provide the ability to have connections from a client directed to multiple servers without losing session information.

Answer: C

13. With two GSSs (Primary-GSSM and Standby-GSSM), you make a change to a domain list on the Primary-GSSM. How do you synchronize the configuration change you just made on the Primary-GSSM to the Standby-GSSM)?

- A. Issue the command gss start.
- B. Do nothing. The configuration is synchronized automatically when a change is made to the dns database.
- C. Issue the command gssm primary-to-standby.
- D. Issue the command gss enable.

Answer: B

14. Why is the three-way handshake mechanism required for TCP session establishment?

- A. It keeps both sides of a connection from timing out.
- B. It ensures that both ends of a connection are synchronously established.
- C. There is less chance of interference and the session getting dropped.
- D. It ensures the connection is established between the correct stations.

Answer: B

15. The transaction-logs enable command enables transaction logging. Which file will contain the WMT server logs?

- A. local1/logs/working.log
- B. local1/logs/wmt.log
- C. local1/logs/export/working.log
- D. local1/service_logs/wmt_start_log_latest

Answer: C
