

642-503 CCSP

Cisco Securing Networks with Cisco Routers and Switches

Practice Exam: 642-503 Exams

Exam Number/Code: 642-503

Exam Name: Securing Networks with Cisco Routers and Switches

Questions and Answers: 53 Q&As

([CCSP](#))

Exam : [642-503](#)

"Securing Networks with Cisco Routers and Switches", also known as 642-503 exam, is a Cisco certification. With the complete collection of questions and answers, TestInside has assembled to take you through 53 Q&As to your 642-503 Exam preparation. In the 642-503 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Quality and Value for the 642-503 Exam TestInside Practice Exams for Cisco **CCSP** Certification 642-503 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 642-503 Exam.

642-503 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the CCSP product experts, included the current newest 642-503 examination questions.

3. 100% Guarantee to Pass Your CCSP exam and get your CCSP Certification.

If you do not pass the Cisco Certification 642-503 exam (Securing Networks with Cisco Routers and Switches) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 642-503 Q&A ensure you pass the exam at your first try.

TestInside professional provide CCSP 642-503 the newest Q&A, completely covers 642-503 test original topic. With our complete CCSP resources, you will minimize your CCSP cost and be ready to pass your 642-503 tests on Your First Try, 100% Money Back Guarantee included!

[Cisco 642-503](#) Test belongs to one of the CCSP certified test, if needs to obtain the CCSP certificate, you also need to participate in other related test, the details you may visit the [CCSP](#) certified topic, in there, you will see all related CCSP certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 642-503 exam

642-503 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

642-503 exam questions updated on regular basis

Same type as the certification exams, 642-503 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 642-503 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Cisco 642-503

Title : Cisco(r) Securing Networks with Cisco Routers and Switches

1. Refer to the exhibit. Why is the Total Active Signatures count zero?

- A. The 128MB.sdf file in flash is corrupted.
- B. IPS is in fail-open mode.
- C. IPS is in fail-closed mode.
- D. IPS has not been enabled on an interface yet.
- E. The flash:/128MB.sdf needs to be merged with the built-in signatures first.

Answer: D

2. Which three configurations are required to enable the Cisco IOS Firewall to inspect a user-defined application which uses TCP ports 8000 and 8001? (Choose three.)

- A. access-list 101 permit tcp any any eq 8000
access-list 101 permit tcp any any eq 8001
class-map user-10
match access-group 101
- B. policy-map user-10
class user-10
inspect
- C. ip port-map user-10 port tcp 8000 8001 description "TEST PROTOCOL"
- D. ip inspect name test appfw user-10
- E. ip inspect name test user-10
- F. int {type|number}
ip inspect name test in

Answer: CEF

3. Refer to the exhibit. Which two statements are true about the configurations shown? (Choose two.)

- A. The clickable links will have a heading entitled "MYLINKS".
- B. The home page will have three clickable links on it.
- C. ACS will be used for remote-user authentication by default.
- D. This is an example of a clientless configuration.
- E. Thin client (port forwarding) has been enabled using the url-text command.

Answer: BD

4. What are two benefits of using an IPsec GRE tunnel? (Choose two.)

- A. It allows dynamic routing protocol to run over the tunnel interface.
- B. It has less overhead than running IPsec in tunnel mode.
- C. It allows IP multicast traffic.
- D. It requires a more restrictive crypto ACL to provide finer security control.
- E. It supports the use of dynamic crypto maps to reduce configuration complexity.

Answer: AC

5. Which two commands are used to only allow SSH traffic to the router Eth0 interface and deny other management traffic (BEEP, FTP, HTTP, HTTPS, SNMP, Telnet, TFTP) to the router interfaces? (Choose two.)

- A. interface eth0
- B. control-plane host
- C. policy-map type port-filter policy-name
- D. service-policy type port-filter input policy-name
- E. management-interface eth0 allow ssh
- F. line vty 0 5
transport input ssh

Answer: BE

6. Refer to the DMVPN topology diagram in the exhibit. Which two statements are correct? (Choose two.)

- A. The hub router needs to have EIGRP split horizon disabled.
- B. At the Spoke A router, the next hop to reach the 192.168.2.0/24 network is 10.0.0.1.
- C. Before a spoke-to-spoke tunnel can be built, the spoke router needs to send an NHRP query to the hub to resolve the remote spoke router physical interface IP address.
- D. At the Spoke B router, the next hop to reach the 192.168.1.0/24 network is 172.17.0.1.
- E. The spoke routers act as the NHRP servers for resolving the remote spoke physical interface IP address.
- F. At the Spoke A router, the next hop to reach the 192.168.0.0/24 network is 172.17.0.1.

Answer: AC

7. Refer to the exhibit. What additional configuration is required for the Cisco IOS Firewall to reset the TCP connection if any peer-to-peer, tunneling, or instant messaging traffic is detected over HTTP?

- A. class-map configuration for matching peer-to-peer, tunneling, and instant messaging traffic over HTTP, and a policy map specifying the reset action
- B. the port-misuse default action reset alarm command in the HTTP application firewall policy configuration
- C. the PAM configuration for mapping the peer-to-peer, tunneling, and instant messaging TCP ports to the HTTP application
- D. the ip inspect name firewall im, ip inspect name firewall p2p, and ip inspect name firewall tunnel commands
- E. the service default action reset command in the HTTP application firewall policy configuration

Answer: B

8. Refer to the exhibit. Why is the Cisco IOS Firewall authentication proxy not working?

- A. The aaa authentication auth-proxy default group tacacs+ command is missing in the configuration.
- B. The router local username and password database is not configured.
- C. Cisco IOS authentication proxy only supports RADIUS and not TACACS+.
- D. HTTP server and AAA authentication for the HTTP server is not enabled.
- E. The AAA method lists used for authentication proxy should be named "pxy" rather than "default" to match the authentication proxy rule name.

Answer: D

9. Refer to the exhibit. Which optional AAA or RADIUS configuration command is used to support 802.1x guest VLAN functionality?

- A. aaa authentication dot1x default group radius
- B. aaa authorization network default group radius
- C. aaa accounting dot1x default start-stop group radius
- D. aaa accounting system default start-stop group radius
- E. radius-server host 10.1.1.1 auth-port 1812 acct-port 1813

Answer: B

10. Referring to a DMVPN hub router tunnel interface configuration, what can happen if the ip nhrp map multicast dynamic command is missing on the tunnel interface?

- A. The NHRP request and response between the spoke router and hub router will fail.
- B. The GRE tunnel between the hub router and the spoke router will be down.
- C. The IPsec peering between the hub router and the spoke router will fail.

- D. The dynamic routing protocol between the hub router and the spoke router will fail.
- E. The NHRP mappings at the spoke routers will be incorrect.
- F. The NHRP mappings at the hub router will be incorrect.

Answer: D

11. When configuring FPM, what should be the next step after the PHDFs have been loaded?

- A. Define a stack of protocol headers.
- B. Define a traffic policy.
- C. Define a service policy.
- D. Define a class map of type "access-control" for classifying packets.
- E. Reload the router.
- F. Save the PHDFs to startup-config.

Answer: A

12. Refer to the exhibit. What additional configuration is required to enable split tunneling?

- A. the reverse-route command under "crypto dynamic-map mode 1"
- B. the include-local-lan under "crypto dynamic-map mode 1"
- C. the match address 199 command under "crypto dynamic-map mode 1"
- D. the acl 199 command under "crypto isakmp client configuration group cisco"
- E. the include-local-lan command under "crypto isakmp client configuration group cisco"
- F. the reverse-route command under "crypto isakmp client configuration group cisco"

Answer: D

13. When you configure Cisco IOS WebVPN, you can use the port-forward command to enable which function?

- A. web-enabled applications
- B. Cisco Secure Desktop
- C. full-tunnel client
- D. thin client
- E. CIFS
- F. OWA

Answer: D

14. Which three of these statements are correct regarding DMVPN configuration? (Choose three.)

- A. If running EIGRP over DMVPN, the hub router tunnel interface must have "next hop self" enabled: ip next-hop-self eigrp AS-Number
- B. If running EIGRP over DMVPN, the hub router tunnel interface must have split horizon disabled: no ip split-horizon eigrp AS-Number
- C. The spoke routers must be configured as the NHRP servers: ip nhrp nhs spoke-tunnel-ip-address
- D. At the spoke routers, static NHRP mapping to the hub router is required: ip nhrp map hub-tunnel-ip-address hub-physical-ip-address
- E. The GRE tunnel mode must be set to point-to-point mode: tunnel mode gre point-to-point
- F. The GRE tunnel must be associated with an IPsec profile: tunnel protection ipsec profile profile-name

Answer: BDF

15. Which two statements are true regarding classic Cisco IOS Firewall configurations? (Choose two.)

- A. You can apply the IP inspection rule in the inbound direction on the trusted interface.
- B. You can apply the IP inspection rule in the outbound direction on the untrusted interface.
- C. For temporary openings to be created dynamically by Cisco IOS Firewall, the access list for the returning traffic must be a standard ACL.
- D. For temporary openings to be created dynamically by Cisco IOS Firewall, you must apply the IP inspection rule to the trusted interface.
- E. For temporary openings to be created dynamically by Cisco IOS Firewall, the inbound access list on the trusted interface must be an extended ACL.

Answer: AB
