Cisco Implementing Cisco NAC Appliance

Practice Exam: 642-591 Exams

Exam Number/Code: 642-591

Exam Name: Implementing Cisco NAC Appliance

Questions and Answers: 60 Q&As

([Others](#))

Exam : [642-591](#)

"Implementing Cisco NAC Appliance", also known as 642-591 exam, is a Cisco certification. With the complete collection of questions and answers, TestInside has assembled to take you through 60 Q&As to your 642-591 Exam preparation. In the 642-591 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Quality and Value for the 642-591 Exam TestInside Practice Exams for Cisco **Others** Certification 642-591 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 642-591 Exam.

642-591 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Others product experts, included the current newest 642-591 examination questions.

3. 100% Guarantee to Pass Your Others exam and get your Others Certification.

If you do not pass the Cisco Certification 642-591 exam (Implementing Cisco NAC Appliance) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 642-591 Q&A ensure you pass the exam at your first try.

TestInside professional provide Others 642-591 the newest Q&A, completely covers 642-591 test original topic. With our complete Others resources, you will minimize your Others cost and be ready to pass your 642-591 tests on Your First Try, 100% Money Back Guarantee included!

[Cisco 642-591](#) Test belongs to one of the Others certified test, if needs to obtain the Others certificate, you also need to participate in other related test, the details you may visit the [Others](#) certified topic, in there, you will see all related Others certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 642-591 exam

642-591 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

642-591 exam questions updated on regular basis

Same type as the certification exams, 642-591 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 642-591 exam demo before you decide to buy it in Test-Inside.com.

Exam : Cisco 642-591

Title : Implementing Cisco NAC Appliance

1. After you implement a network scan and view the report, you notice that a plug-in did not access any of its dependent plug-ins. What did you forget to do?

- A. enable the Dependent Plug-in check box on the General Tab form
- B. configure dependent plug-in support when you mapped the Nessus scan check to the Nessus plug-in rule
- C. install dependent plug-ins when you updated the Cisco NAC Appliance plug-in library
- D. load the dependent plug-ins for that plug-in in the Plug-in Updates form

Answer: D

2. What is the result when the condition statement in a Cisco NAA check for required software evaluates to false on a client machine?

- A. The required software is automatically downloaded to the user device.
- B. The required software is made available after the user is quarantined.
- C. The user is put in the unauthenticated role and the software is considered missing.
- D. The user is placed in the temporary role and the software is made available.

Answer: B

3. Which default administrator group has delete permissions?

- A. admin
- B. help-desk
- C. add-edit
- D. full-control

Answer: D

4. In a Cisco NAC Appliance Windows Active Directory SSO deployment, what are the cached credentials and Kerberos TGT from the client-machine Windows login used for?

- A. They are used to validate the user with the Cisco NAS.
- B. They are used to validate the user authentication with the backend Windows Active Directory server.
- C. They are used to validate user access with the Cisco NAA.
- D. They are used to validate the user authentication and access with the Cisco NAM.

Answer: B

5. A search of available switches has been performed and a list of switches is presented. Which two SNMP attributes need to match what is configured in the Cisco switch profile for a listed switch to be added to the Cisco NAM?

(Choose two.)

- A. SNMP read community string
- B. SNMP write community string
- C. SNMP read version
- D. SNMP write version
- E. SNMP trap

Answer: AC

6. What must you check on the switches for an out-of-band Cisco NAC Appliance deployment?

- A. The Cisco or non-Cisco switch must support port security and SNMPv2 or SNMPv3.

B. The Cisco switch must support VACL (VLAN ACL).

C. If you have stacked Cisco Catalyst 3750 Series Switches, you are using Cisco IOS Release 12.1(25)SEC or above.

D. The Cisco switch must use at least the minimum supported version of Cisco IOS or Catalyst OS supporting mac-notification or linkup-linkdown SNMP traps.

Answer: D

7. Based on the Boolean order of precedence, how would Cisco NAC Appliance evaluate the following rule?

AdAwareLogRecent&(NorAVProcessIsActive&AVProcessIsActive)

A. (The Norton Antivirus is active and there is a recent Ad Aware log entry) or (the Symantec antivirus process is active).

B. There is a recent Ad Aware log entry, the Norton Antivirus is active, and the Symantec antivirus process is active.

C. (Either the Norton Antivirus or the Symantec antivirus process is active) and (there is a recent Ad Aware log entry).

D. There is a recent Ad Aware log entry or the Norton Antivirus is active, or the Symantec antivirus process is active.

Answer: C

8. How do you ensure that the Cisco NAS has the most recent version of the Cisco NAA to install on user devices?

A. Each time the Cisco NAA is upgraded, the Cisco NAM automatically downloads the new version of Cisco NAA to all Cisco NAS servers.

B. From the Cisco NAS Web Admin Console, enable Cisco NAA autoupdate on the Administration > Software Update form.

C. The Cisco NAA is upgraded directly to each Cisco NAS using the Upgrade Server form available on the Cisco NAM web console GUI.

D. Configure the Cisco NAS by selecting which Cisco NAA to upgrade in the Cisco NAA Upgrade form.

Answer: A

9. Refer to the exhibit. When logging in to a Cisco NAC Appliance solution, an end user is prompted for a username, password, and provider. What should be entered in the Provider drop-down field shown in the exhibit?

A. the authenticating NAS

B. the authorizing NAM

C. the name of the ISP

D. the external authenticating server

Answer: D

10. Which three components comprise a Cisco NAC Appliance solution? (Choose three.)

A. a NAC-enabled Cisco router

B. a Linux server for in-band or out-of-band network admission control

C. a Linux server for centralized management of network admission servers

D. a Cisco router to provide VPN services

E. a read-only client operating on an endpoint device

F. a NAC-enabled Cisco switch

Answer: BCE

11. When configuring the Cisco NAM to implement Cisco NAA requirement checking on client machines, what is the next step after configuring checks and rules?

A. retrieve updates

B. require the use of the Cisco NAA

C. configure session timeout and traffic policies

D. map rules to requirement

E. configure requirements

Answer: E

12. The NAS is configured to autogenerate an IP address pool of 30 subnets with a netmask of /30, beginning at

address 192.168.10.0. Which IP address is leased to the end-user host on the second subnet?

- A. 192.168.10.4
- B. 192.168.10.5
- C. 192.168.10.6
- D. 192.168.10.7

Answer: C

13. What are the two types of traffic policies that apply to user roles? (Choose two.)

- A. IP-based
- B. peer-based
- C. host-based
- D. manager-based
- E. server-based
- F. VLAN-based

Answer: AC

14. A client has a network with wireless and wired users. The wired users run mission-critical bandwidth-sensitive applications. The wireless users access web-based support portals within the central office.

Given only this information, which Cisco NAC Appliance solution would provide the most fault-tolerant option for this client?

- A. one Cisco NAM and one in-band highly available Cisco NAS cluster
- B. one load-balanced highly available Cisco NAM cluster and one out-of-band highly available Cisco NAS cluster
- C. one highly available Cisco NAM cluster, one out-of-band highly available Cisco NAS cluster, and one in-band Cisco NAS
- D. one highly available Cisco NAM cluster and one in-band highly available Cisco NAS cluster

Answer: C

15. When using Windows Active Directory Single-Sign-ON (SSO), the Cisco NAA on the client machine will ask the client machine for a Service Ticket (ST) with which username to communicate with the Cisco NAS?

- A. the Cisco NAA username
- B. the Microsoft Windows Active Directory server username
- C. the Cisco NAS username
- D. the client username

Answer: C
