

642-871 CCDP

Cisco Designing Cisco network Service Architectures (ARCH)

Practice Exam: 642-871 Exams

Exam Number/Code: 642-871

Exam Name: Designing Cisco network Service Architectures (ARCH)

Questions and Answers: 271 Q&As

([CCDP](#))

Exam : [642-871](#)

"Designing Cisco network Service Architectures (ARCH)", also known as 642-871 exam, is a Cisco certification. With the complete collection of questions and answers, TestInside has assembled to take you through 271 Q&As to your 642-871 Exam preparation. In the 642-871 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Quality and Value for the 642-871 Exam TestInside Practice Exams for Cisco **CCDP** Certification 642-871 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 642-871 Exam.

642-871 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the CCDP product experts, included the current newest 642-871 examination questions.

3. 100% Guarantee to Pass Your CCDP exam and get your CCDP Certification.

If you do not pass the Cisco Certification 642-871 exam (Designing Cisco network Service Architectures (ARCH)) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 642-871 Q&A ensure you pass the exam at your first try.

TestInside professional provide CCDP 642-871 the newest Q&A, completely covers 642-871 test original topic. With our complete CCDP resources, you will minimize your CCDP cost and be ready to pass your 642-871 tests on Your First Try, 100% Money Back Guarantee included!

[Cisco 642-871](#) Test belongs to one of the CCDP certified test, if needs to obtain the CCDP certificate, you also need to participate in other related test, the details you may visit the [CCDP](#) certified topic, in there, you will see all related CCDP certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 642-871 exam

642-871 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

642-871 exam questions updated on regular basis

Same type as the certification exams, 642-871 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 642-871 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Cisco 642-871

Title : Cisco Designing Cisco network Service Architectures (ARCH)

1. Choose the technology required for a VPN when multicast, broadcast, and non IP packets need to be tunneled.

- A. triple-DES
- B. IPSec
- C. GRE
- D. IKE
- E. ISAKMP

Answer: C

2. What helps maximize throughput in a wireless LAN? (Choose two.)

- A. minimize broadcasts
- B. enable IPSec
- C. increase size of roaming domains
- D. use static WEP
- E. filter multicast traffic

Answer: AE

3. Which action indicates the optimal level of functional process recovery in a high availability architecture?

- A. Failure of a networking component is automatically detected.
- B. The end-users are unaware that a failure has occurred.
- C. The ailing component fails-over to an alternate component.
- D. Automated alert mechanisms generate a dispatch for service.
- E. Monitoring tools generate alert messages when a less than optimal condition occurs

Answer: B

4. Which Cisco Works VPN/Security Management Solution gives administrators access to devices showing real-time status along with operational and configuration functions through a web browser?

- A. VPN Monitor
- B. CSPM
- C. Resource Manager (RME)
- D. Cisco View
- E. IDS Host Sensor

Answer: D

5. Which IEEE wireless standard provides backward compatibility with 802.11b?

- A. 802.11a
- B. 802.1q
- C. 802.11g
- D. 802.11p

Answer: C

6. Which two statements are true regarding a Cisco wireless LAN? (Choose two.)

- A. Only IP can be transmitted over a wireless LAN.

- B. All stations in a wireless cell share the bandwidth.
- C. Wireless LANs use CSMA/CD access method.
- D. Only one station can send at any one time.
- E. Wireless LANs use a token sharing access method

Answer: BD

7. Which Layer 3 protocol is used to provide data integrity, privacy, and security on a IP based VPN?

- A. GRE
- B. MD5
- C. PKI
- D. IPSec
- E. L2TP

Answer: D

8. What is the recommended maximum number of clients that an individual wireless access point should support?

- A. between 1 and 8
- B. between 10 and 30
- C. between 32 and 48
- D. between 64 and 96

Answer: B

9. Which VPN management feature would be considered to ensure that the network had the least disruption of service when making topology changes?

- A. dynamic reconfiguration
- B. path MTU discovery
- C. auto setup
- D. remote management

Answer: A

10. What can be done to ensure connections to workstations that are placed on the edge of a wireless access point's coverage area?

- A. lower data rates
- B. increase data rates
- C. group access point frequency channels together for increased range
- D. enable multicasting

Answer: A

11. You are asked to design a VPN for a medium sized company. The company has 12 stationary offices and one main office. Each office is more than 80 miles away from the next. What type of VPN would you design for this situation?

- A. remote access VPN
- B. site to site VPN
- C. enterprise remote access VPN
- D. wireless VPN

Answer: B

12. What can be done to limit area coverage of a wireless access point to provide added security?

- A. lower Mbps data rates
- B. increase Mbps data rates
- C. group access point frequency channels
- D. enable multicasting

Answer: B

13. Which protocol can be used to provide WLAN redundancy and low downtime?

- A. EAP
- B. SNMP
- C. WEP
- D. HSRP

Answer: D

14. What is the maximum number of IP phones recommended per wireless access point?

- A. 7
- B. 15
- C. 33
- D. 35
- E. 40

Answer: A

15. What happens when packets traversing the network exceed the MTU of an IPSec/VPN interface?

- A. They trigger a link failure.
- B. They are all discarded and re-transmitted.
- C. They are unable to be sent.
- D. They become fragmented

Answer: D

16. Which IP NAT implementation allows IPSec peers to establish a connection through a NAT device?

- A. PAT
- B. NAT-T
- C. Dynamic NAT
- D. IPSec ESP NAT

Answer: B

17. Which of the following is a web-browser based tool designed to provide administrative access for content networking?

- A. Content Distribution Manager (CDM)
- B. Self-Organizing Distributed Architecture (SODA)
- C. Web Cache Communication Protocol (WCCP)
- D. Cisco CallManager
- E. Hypertext Administration Design (HAD)

Answer: A

18. What is the frequency and maximum data rate of 802.11a?

- A. 5 GHz frequency and 54 Mbps data
- B. 5 GHz frequency and 10 Mbps data
- C. 2.4 GHz frequency and 10 Mbps data
- D. 2.4 GHz frequency and 64 Mbps data
- E. 12 GHz frequency and 12 Mbps data

Answer: A

19. What is the frequency and maximum data rate of 802.11b?

- A. 5 GHz frequency and 2.4 Mbps data
- B. 5 GHz frequency and 54 Mbps data
- C. 2.4 GHz frequency and 1.44 Mbps data
- D. 2.4 GHz frequency and 11 Mbps data
- E. 1.44 GHz frequency and 2.4 Mbps data

Answer: D

20. What can be implemented on a LAN to speed up services for external users and minimize the load on network servers?

- A. VPN networking
- B. CSPM
- C. content networking
- D. fault tolerance

Answer: C
