

## 642-971 Others

### Cisco Data Center Networking Infrastructure Design Specialist

**Practice Exam:** 642-971 Exams

**Exam Number/Code:** 642-971

**Exam Name:** Data Center Networking Infrastructure Design Specialist

**Questions and Answers:** 120 Q&As

( [Others](#) )

Exam : [642-971](#)

"Data Center Networking Infrastructure Design Specialist", also known as 642-971 exam, is a Cisco certification. With the complete collection of questions and answers, TestInside has assembled to take you through 120 Q&As to your 642-971 Exam preparation. In the 642-971 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Quality and Value for the 642-971 Exam TestInside Practice Exams for Cisco **Others** Certification 642-971 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

#### **TestInside provide the professional Q&A.**

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 642-971 Exam.

642-971 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Others product experts, included the current newest 642-971 examination questions.

3. 100% Guarantee to Pass Your Others exam and get your Others Certification.

If you do not pass the Cisco Certification 642-971 exam (Data Center Networking Infrastructure Design Specialist) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

#### **use TestInside 642-971 Q&A ensure you pass the exam at your first try.**

TestInside professional provide Others 642-971 the newest Q&A, completely covers 642-971 test original topic. With our complete Others resources, you will minimize your Others cost and be ready to pass your 642-971 tests on Your First Try, 100% Money Back Guarantee included!

[Cisco 642-971](#) Test belongs to one of the Others certified test, if needs to obtain the Others certificate, you also need to participate in other related test, the details you may visit the [Others](#) certified topic, in there, you will see all related Others certified subject of examination.

#### **TestInside Testing Engine Features**

Comprehensive questions and answers about 642-971 exam

642-971 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

642-971 exam questions updated on regular basis

Same type as the certification exams, 642-971 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 642-971 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Cisco 642-971

Title : Data Center Networking Infrastructure Design Specialist

1. You are a help desk trainee for TestInside.com. One of your customers use the Cisco SFS family of products to provide server-side InfiniBand integration, but as far as you know, which two Cisco products should be implemented to make up the solution? (Choose two.)

- A. Fibre Channel Host Channel Adapters
- B. InfiniBand switch modules
- C. Fibre Channel switch modules
- D. InfiniBand HCA card for IBM and Dell servers

Answer: BD

2. You are a Cisco engineer of TestInside.com. You are configuring the network for the company. The numbers in the ovals stand for the number of ports in each PortChannel(Refer to the exhibit). If VSS is deployed in the top four switches, as far as you know, how many ports at most that the virtual PortChannel in the core can have ?

- A. two
- B. four
- C. six
- D. eight

Answer: D

3. Which service module configuration is recommended to automatically detect and block traffic from malicious hosts?

- A. FWSM
- B. IDSM that is deployed in IDS mode
- C. IDSM that is deployed in IPS mode
- D. FWSM that is coupled with the NAM

Answer: C

4. You are the senior desktop administrator for TestInside.com. A customer met a trouble: A failure occurs on one of the access layer uplinks(Refer to the exhibit). With your experience, which Layer 2 topology can cause a break in connectivity between the FWSMs?

- A. looped square
- B. looped triangle
- C. loop-free U
- D. loop-free inverted U

Answer: C

5. How is FCIP traffic marked with DSCP values?

- A. The Cisco MDS 9000 Series Multilayer Switch marks one DSCP value per FCIP tunnel.
- B. The Cisco MDS 9000 Series Multilayer Switch marks two DSCP values per FCIP tunnel.
- C. The aggregation layer Ethernet switch marks one DSCP value per FCIP tunnel.
- D. The aggregation layer Ethernet switch marks two DSCP values per FCIP tunnel.

Answer: B

6. What advantage does InfiniBand have over Gigabit Ethernet in HPC environments?

- A. lower latency
- B. simpler cabling
- C. longer distance support
- D. more sophisticated traffic management

Answer: A

7. A very large blade-server deployment has high throughput requirements for both data and storage networks. Which access layer option would you recommend?

- A. blade server Ethernet switch with Cisco SFS 3000 Series Multifabric Switch
- B. blade server InfiniBand switch with Cisco SFS 3000 Series Multifabric Switch
- C. blade server Ethernet switch that is connected to Cisco Catalyst 4948 top-of-rack switch
- D. blade server Ethernet switch that is connected to Cisco Catalyst 6500 Series end-of-rack switch

Answer: B

8. Refer to the exhibit. What do you need to configure to prevent spanning-tree loops from occurring between the two FWSMs?

- A. FWSMs in transparent mode
- B. ether-type ACLs to allow BPDUs
- C. FWSMs in multiple-context mode
- D. failover and state interfaces on the same VLAN

Answer: B

9. You are a Cisco engineer of TestInside.com. You are implementing the Cisco Nexus environment for the company, so which two are requirements of FCoE in it? (Choose two.)

- A. Spanning Tree Protocol
- B. Use of jumbo frames
- C. TCP-driven retransmissions for flow control
- D. IEEE 802.3x extensions to enable lossless Ethernet

Answer: BD

10. Which problem can result from end-of-rack designs?

- A. lower reliability
- B. airflow restriction
- C. more devices to manage
- D. complex spanning-tree design

Answer: B

11. You are the senior desktop administrator for TestInside.com. You are deploying network for the company. With your experience, which of following two Cisco service modules can be implemented in redundant pairs with active-active failover? (Choose two.)

- A. Cisco network analysis module
- B. Cisco ACE Application Control Engine
- C. Cisco Firewall Services Module (FWSM)
- D. Cisco Catalyst 6500 Series SSL Services Module (CVDMS-SSLSM)

Answer: BC

12. Refer to the exhibit.

Your customer is filling server racks sequentially, filling one rack before beginning the next. Which two access layer designs present challenges in this environment? (Choose two.)

- A. Layer 3
- B. Layer 2 loop-free U
- C. Layer 2 looped square

- D. Layer 2 looped triangle
- E. Layer 2 loop-free inverted U

Answer: AB

13. Which two security vulnerabilities does the FWSM application inspection engine mitigate? (Choose two.)

- A. DoS attacks
- B. DDoS attacks
- C. SQL injection
- D. cookie altering
- E. web server worms

Answer: CD

14. You work as a systems administrator at TestInside.com. You deploy the network for the company by using the default VDC high availability options in the Cisco Nexus 7010 Switch, what will happen then?

- A. The VDC is deleted, and no further action is performed.
- B. If dual supervisors are in use, a supervisor switchover is forced.
- C. The VDC is deleted and then re-created with the startup configuration.
- D. If a single supervisor is in use, a graceful restart is forced.

Answer: B

15. You work as the network administrator at TestInside.com. And you are familiar with Cisco product, so as much as you know, which Cisco product is implemented for content routing purposes?

- A. Cisco ACE GSS
- B. Cisco ACE Module
- C. Cisco ACE appliance
- D. Cisco Catalyst 6500 Series Switches

Answer: A

16. Your customer plans to deploy FWSM and IDSM modules in the aggregation layer. Which design should you avoid?

- A. Layer 3
- B. InfiniBand
- C. Layer 2 loop-free
- D. Layer 2 looped square
- E. Layer 2 looped triangle

Answer: A

17. Which three of the following service modules can be deployed in redundant pairs with active/active failover?

(Choose three.)

- A. ACE
- B. CSM
- C. NAM
- D. IDSM
- E. FWSM
- F. SSLSM

Answer: ADE

18. Which data center network-architecture change is a result of the adoption of blade and 1-RU server technologies?

- A. Layer 3 fault domains growing larger
- B. Layer 2 fault domains growing larger
- C. Layer 3 fault domains growing smaller
- D. Layer 2 fault domains growing smaller

Answer: B

19. You work as a systems administrator at TestInside.com. In order to realize to service multicast traffic in a data center environment, what three of following options are effective ways? (Choose three.)

- A. deploying VRFs per address family
- B. configuring service modules in transparent or bridged mode
- C. configuring IGMP/PIM in the Cisco Catalyst 6500 Series FWSM
- D. configuring IGMP/PIM in the MSFC on a Cisco Catalyst 6500 switch

Answer: BCD

20. Refer to the exhibit. Each letter (A-D) represents a model for placement of a default gateway. Which model allows the maximum number of application and security services?

- A. model A
- B. model B
- C. model C
- D. model D

Answer: C
