

646-011 Storage Networking

Cisco Storage Networking Cisco Storage Sales Specialist (CSSS)

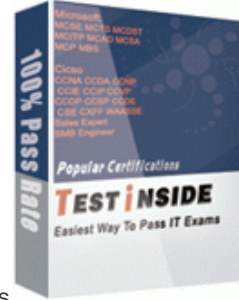

Practice Exam: 646-011 Exams

Exam Number/Code: 646-011

Exam Name: Storage Networking Cisco Storage Sales Specialist (CSSS)

Questions and Answers: 100 Q&As

([Storage Networking](#))

Exam : [646-011](#)

"Storage Networking Cisco Storage Sales Specialist (CSSS)", also known as 646-011 exam, is a Cisco certification. With the complete collection of questions and answers, TestInside has assembled to take you through 100 Q&As to your 646-011 Exam preparation. In the 646-011 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Quality and Value for the 646-011 Exam TestInside Practice Exams for Cisco **Storage Networking** Certification 646-011 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 646-011 Exam.

646-011 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Storage Networking product experts, included the current newest 646-011 examination questions.

3. 100% Guarantee to Pass Your Storage Networking exam and get your Storage Networking Certification.

If you do not pass the Cisco Certification 646-011 exam (Storage Networking Cisco Storage Sales Specialist (CSSS)) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 646-011 Q&A ensure you pass the exam at your first try.

TestInside professional provide Storage Networking 646-011 the newest Q&A, completely covers 646-011 test original topic. With our complete Storage Networking resources, you will minimize your Storage Networking cost and be ready to pass your 646-011 tests on Your First Try, 100% Money Back Guarantee included!

[Cisco 646-011](#) Test belongs to one of the Storage Networking certified test, if needs to obtain the Storage Networking certificate, you also need to participate in other related test, the details you may visit the [Storage Networking](#) certified topic, in there, you will see all related Storage Networking certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 646-011 exam

646-011 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

646-011 exam questions updated on regular basis

Same type as the certification exams, 646-011 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 646-011 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Cisco 646-011

Title : Storage Networking Cisco Storage Sales Specialist (CSSS)

1. Asynchronous replication is highly dependent upon which network functions?

- A. QOS, security, and high bandwidth
- B. QOS, compression, and diagnostics
- C. compression, security, and multiprotocol support
- D. security, network availability, and multiprotocol support

Answer: A

2. What are three methods for managing the MDS platform? (Choose three.)

- A. CLI
- B. Cisco RME
- C. Web-based interface
- D. Cisco Campus Manager

Answer: ABC

3. Which protocol is most commonly implemented when connecting mainframes to storage arrays?

- A. FC
- B. GbE
- C. FCIP
- D. DWDM
- E. ESCON/FICON

Answer: E

4. In a fabric environment, Cisco's two primary competitors are _____. (Choose two.)

- A. Nishan
- B. QLogic
- C. McData
- D. Brocade
- E. CNT (INRANGE)

Answer: AD

5. Which three protocols does the MDS product line support? (Choose three.)

- A. FCIP
- B. iFCP
- C. iSCSI
- D. Fibre Channel Protocol (FCP)

Answer: ACD

6. Which statement about a Virtual SAN (VSAN) is true?

- A. It requires the use of the IP Services module.
- B. It must be used for iSCSI implementations only.
- C. It is a feature that can only be used to help consolidate servers and storage.
- D. It is a logical separation of traffic, services, and management within one physical switch.

Answer: D

7. What is the function of the Advanced Services Module (ASM)?

- A. acts as a gateway for a Fibre Channel device to the Internet
- B. provides a platform for multiprotocol connectivity to existing storage devices
- C. delivers hardware-assisted, network-hosted virtualization and replication services
- D. enables pooling of heterogeneous storage for increased storage utilization, simplified storage management, and reduction of the total cost of storage ownership

Answer: C

8. Which three statements are true? (Choose three.)

- A. The MDS 9000 family supports Fibre Channel connectivity and low-cost iSCSI connectivity in the fabric.
- B. The MDS 9000 family supports multiple protocols which allows the platform to support cost effective storage connectivity.
- C. The MDS 9000 platform supports TCP/IP natively which allows any port to function as either an Ethernet or Fibre Channel port.
- D. By providing FCIP in the same platform, the MDS 9000 offers the customer a cost-effective implementation of enterprise-wide business continuance with common management, security, and diagnostic software.

Answer: AD

9. Which storage applications are part of the Cisco Utility model and reside in the network?

- A. server clustering
- B. virtualization and provisioning
- C. data base replication and virtualization
- D. snap copy and application management

Answer: B

10. Which statement is true about Virtual SAN (VSAN) statistics?

- A. VSAN statistics are gathered on a global basis.
- B. VSAN statistics are only available via third-party management software.
- C. VSAN statistics are only available via CiscoWorks management software.
- D. Special traffic counters are provided to track statistics on a per-VSAN basis.

Answer: D

11. Typical service for the MDS product is_____.

- A. sold by Cisco
- B. sold by the VAR
- C. a SmartNet offering
- D. bundled as warranty

Answer: D

12. How are SAN backups different from LAN and dedicated backups?

- A. SAN backups require LAN bandwidth and server processing.
- B. Multiple servers can write to the same tape drives and shorten the backup window.
- C. Dedicated backups utilize the SAN resources most efficiently shortening backup windows.
- D. LAN backups utilize the LAN network efficiently and enhance manageability of multiple backups.

Answer: B

13. What Cisco networking products do storage-to-storage replication over IP networks using FCIP?

- A. 9216 and 9506 MDS
- B. 7200 and 7400 routers
- C. the Catalyst 6500 and the 7200
- D. the 7000 router and the 9000 MDS

Answer: A

14. In synchronous replication, Cisco DWDM products transmit data _____.

- A. utilizing VPN to insure QOS
- B. using tunneling techniques like FCIP
- C. utilizing FCIP over fibre optic network
- D. without changing the signal over a fibre optic network

Answer: D

15. What is the SAN Extension solution that utilizes multiple wavelengths across a fiber pair for transport and is amplifiable for longer distance applications?

- A. FCIP
- B. DWDM
- C. CWDM
- D. Dark Fiber
- E. FC over SONET/SDH

Answer: B

16. A customer wants to use scripting on the MDS platform. Which management interface should they use?

- A. RME
- B. Fabric Manager
- C. Element Manager
- D. Command Line Interface (CLI)

Answer: D

17. Which Cisco product aggregates up to 8 Fibre Channel interfaces onto a single 10 Gigabit per second wavelength, without using SONET or SDH?

- A. 7200/7400
- B. MDS-9000
- C. ONS 15530
- D. ONS 15540 ESPx

Answer: C

18. What are two characteristics of NAS storage? (Choose two.)

- A. provides file level access to storage with file locking to facilitate file sharing
- B. focuses on applications that require file sharing, like engineering or web services
- C. provides block level access to data for high performance database applications
- D. offers fast, efficient, and robust recovery capabilities for mission-critical environments

Answer: AB

19. Which three MDS features enable SAN island consolidation? (Choose three.)

- A. FSPF
- B. Device Manager
- C. inter-VSAN routing
- D. role based access control
- E. separate fabric services per Virtual SAN (VSAN)

Answer: CDE

20. The support of multiple protocols within the MDS 9000 family _____. (Choose two.)

- A. allows the platform to support cost-effective DAS storage connectivity
- B. allows the customer to offer Fibre Channel connectivity and low-cost iSCSI connectivity through the fabric
- C. allows the customer cost-effective business continuance solutions with FCIP connectivity through the fabric
- D. allows the customer to design fault tolerant solutions with the bandwidth aggregation capabilities of the product

Answer: BC
