Cisco Advanced Routing and Switching Life Cycle Services (LCSARS)

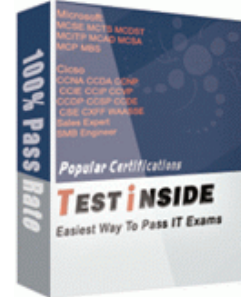

Practice Exam: 646-056 Exams

Exam Number/Code: 646-056

Exam Name: Advanced Routing and Switching Life Cycle Services (LCSARS)

Questions and Answers: 81 Q&As

([Others](#))

Exam : [646-056](#)

"Advanced Routing and Switching Life Cycle Services (LCSARS)", also known as 646-056 exam, is a Cisco certification. With the complete collection of questions and answers, TestInside has assembled to take you through 81 Q&As to your 646-056 Exam preparation. In the 646-056 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Quality and Value for the 646-056 Exam TestInside Practice Exams for Cisco **Others** Certification 646-056 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 646-056 Exam.

646-056 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Others product experts, included the current newest 646-056 examination questions.

3. 100% Guarantee to Pass Your Others exam and get your Others Certification.

If you do not pass the Cisco Certification 646-056 exam (Advanced Routing and Switching Life Cycle Services (LCSARS)) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 646-056 Q&A ensure you pass the exam at your first try.

TestInside professional provide Others 646-056 the newest Q&A, completely covers 646-056 test original topic. With our complete Others resources, you will minimize your Others cost and be ready to pass your 646-056 tests on Your First Try, 100% Money Back Guarantee included!

[Cisco 646-056](#) Test belongs to one of the Others certified test, if needs to obtain the Others certificate, you also need to participate in other related test, the details you may visit the [Others](#) certified topic, in there, you will see all related Others certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 646-056 exam

646-056 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

646-056 exam questions updated on regular basis

Same type as the certification exams, 646-056 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 646-056 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Cisco 646-056

Title : Cisco(r) Advanced Routing and Switching Life Cycle Services (LCSARS)

1. Which three resources are used to support physical and logical design documentation of the operations and network management system? (Choose three.)

- A. verification results
- B. design templates
- C. standards
- D. operation policies

Answer: BCD

2. Which task is part of the identify operations design requirements activity?

- A. Define and document the appropriate service-level requirements associated with performance, availability, capacity, resiliency, and security that correlate with service delivery goals.
- B. Develop physical and logical schematics for future growth.
- C. Select tools and applications to meet objectives.
- D. Define methods and procedures to support operations.

Answer: A

3. What should staff development requirements be identified against?

- A. third-party business processes
- B. migration site details
- C. business initiatives, goal, and technical activities required to support network infrastructure solution
- D. implementation risks

Answer: C

4. What should technical requirements and design goals be combined to create?

- A. Detailed Design Validation
- B. Low-Level Design
- C. Service Level Criteria
- D. Systems Acceptance Test Plan

Answer: B

5. Which task is part of executing a Detailed Design Validation?

- A. Execute the test identified in the detailed design test plan and capture test results.
- B. Determine how results impact the original design.
- C. Incorporate recommended changes into the design process.
- D. Verify that hardware and software requirements are included.

Answer: A

6. Which two tasks focus on discussing the network implementation strategy with key stakeholders and business owners? (Choose two.)

- A. rollback and contingency plans

B. resource requirements and tools to perform network operations testing

C. site remediation, plans, and execution status

D. site survey results

Answer: CD

7. In testing for business readiness, what are three ways that success criteria should be classified? (Choose three.)

A. success with needed corrective actions

B. partial success pending next phase

C. complete success

D. failure

Answer: ACD

8. Which two documents should be part of the Staging Plan Development? (Choose two.)

A. site requirements specification

B. staging project plan

C. bill of materials

D. low-level design template

Answer: AB

9. Which two tasks are conducted as part of the Migration Plan Development service component? (Choose two.)

A. Review high-level description of the design requirements, capabilities, features, and functionality of the existing and proposed infrastructure solution.

B. Analyze the business requirements to identify and align with technology and service requirements.

C. Identify network services to be migrated.

D. Define test scripts, use cases and scenarios that validate both operations and network management and security configurations.

Answer: AC

10. Which three types of information should be included in a system acceptance test plan? (Choose three.)

A. site survey results

B. network resilience tests

C. physical and logical network topology diagrams

D. configurations

Answer: BCD

11. Which three tasks are conducted as part of the Implementation Plan Development service component? (Choose three.)

A. Discuss network implementation schedules.

B. Define testing requirements.

C. Verify site contacts, locations, and other project considerations.

D. Identify implementation risks.

Answer: ACD

12. Which activity is conducted as part of the Implementation Plan Development?

A. System Acceptance Testing

B. Presentation of Staging Plan

C. Conduct an On-site Discovery Workshop

D. Business Readiness Development

Answer: C

13. Which activity is performed to discuss the network implementation strategy with key stakeholders and business owners?

A. System Acceptance Testing

- B. Presentation of Staging Plan
- C. Conduct an On-site Discovery Workshop
- D. Business Readiness Plan Development

Answer: C

14. Which task is part of a Staging Plan Development onsite discovery workshop?

- A. Identify implementation risks.
- B. Validate network management design.
- C. Verify customer site locations and contacts.
- D. Create test cases.

Answer: D

15. Which three test elements need to be documented when producing a business readiness test plan? (Choose three.)

- A. business critical application tests
- B. endpoint migrations tests
- C. feature configuration tests
- D. third-party operations and network management application and integration tests

Answer: ACD

16. Which two items on the design discovery checklist are used to create a low-level design? (Choose two.)

- A. technical requirements
- B. capacity planning
- C. design goals
- D. WAN modeling

Answer: AC

17. Which task is conducted during the develop the systems acceptance test plan activity?

- A. network resilience tests
- B. compare test parameters against service level requirements
- C. create logical topology diagrams
- D. turn-up and commission tests

Answer: B

18. In the design phase, which two tasks are conducted as part of the produce business readiness test plan activity? (Choose two.)

- A. Review the Network Implementation Plan, Low-Level Design, and Network Management System Design.
- B. Finalize Operations and Network Management Design and Test Requirements Document Containing Specific Tests.
- C. Verify Service Level Agreements.
- D. Identify Implementation Risks.

Answer: AB

19. Which three activities are conducted as part of resource management plan development? (Choose three.)

- A. Perform business readiness.
- B. Perform context analysis.
- C. Perform needs analysis.
- D. Perform learner analysis.

Answer: BCD

20. Which task is conducted during Migration Plan Development?

- A. Identify staff development requirements against business initiatives, goal, and technical activities required to support the infrastructure solution.

- B. Identify risk and propose a risk mitigation strategy.
- C. Obtain and review security procedures and policies.
- D. Perform an automated scan of ports to determine potential vulnerabilities.

Answer: B
