Exam : [646-058](#)

"Lifecycle Services Advanced Routing and Switching (LSARS)", also known as 646-058 exam, is a Cisco certification. With the complete collection of questions and answers, TestInside has assembled to take you through 69 Q&As to your 646-058 Exam preparation. In the 646-058 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Quality and Value for the 646-058 Exam TestInside Practice Exams for Cisco **Others** Certification 646-058 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

#### **TestInside provide the professional Q&A.**

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 646-058 Exam.

646-058 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Others product experts, included the current newest 646-058 examination questions.

3. 100% Guarantee to Pass Your Others exam and get your Others Certification.

If you do not pass the Cisco Certification 646-058 exam (Lifecycle Services Advanced Routing and Switching (LSARS)) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

#### **use TestInside 646-058 Q&A ensure you pass the exam at your first try.**

TestInside professional provide Others 646-058 the newest Q&A, completely covers 646-058 test original topic. With our complete Others resources, you will minimize your Others cost and be ready to pass your 646-058 tests on Your First Try, 100% Money Back Guarantee included!

[Cisco 646-058](#) Test belongs to one of the Others certified test, if needs to obtain the Others certificate, you also need to participate in other related test, the details you may visit the [Others](#) certified topic, in there, you will see all related Others certified subject of examination.

#### **TestInside Testing Engine Features**

Comprehensive questions and answers about 646-058 exam

646-058 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

646-058 exam questions updated on regular basis

Same type as the certification exams, 646-058 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 646-058 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Cisco 646-058

Title : Cisco(r) Lifecycle Services Advanced Routing and Switching (LSARS)

1. Which service component within the plan phase prescribes a set of activities and tasks to assess existing network infrastructure and applications to verify their ability to support the proposed routing and switching solution for a customer?

- A. Deployment Project Management
- B. Operations Readiness Assessment
- C. Security Vulnerability Assessment
- D. Site Readiness Assessment
- E. Network Readiness Assessment

Answer: E

2. Which three tasks are conducted as part of the Implementation Plan Development service component? (Choose three.)

- A. Discuss network implementation schedules.
- B. Define testing requirements.
- C. Verify site contacts, locations, and other project considerations.
- D. Identify implementation risks.

Answer: ACD

3. Which task is performed during the Systems Monitoring service component in the operate phase?

- A. Test system connectivity.
- B. Populate and maintain configuration management database.
- C. Manage passwords, rights, and permissions.
- D. Collect performance data for reporting, such as CPU, memory, storage, licenses and port utilization, and availability data.
- E. Update security signatures.

Answer: D

4. Which task is conducted as part of Business Readiness Testing?

- A. Identify, select, and assess network management tools, features, and functionality.
- B. Obtain and review security procedures and policies.
- C. Use predetermined use cases or design use cases based upon validated business and operational requirements.
- D. Review network implementation strategy.

Answer: C

5. Which three resources are used to support physical and logical design documentation of the operations and network management system? (Choose three.)

- A. verification results
- B. design templates
- C. standards
- D. operation policies

Answer: BCD

6. Which two tasks focus on discussing the network implementation strategy with key stakeholders and business owners? (Choose two.)

- A. rollback and contingency plans
- B. resource requirements and tools to perform network operations testing
- C. site remediation, plans, and execution status
- D. site survey results

Answer: CD

7. Which three activities within the plan phase are performed when assessing network vulnerabilities and identifying steps needed to address security threats and attacks? (Choose three.)

- A. Produce network security specifications and requirements.
- B. Identify, analyze, and document existing network vulnerabilities.
- C. Produce security vulnerability report.
- D. Assess current network infrastructure and network security procedures.
- E. Document the existing network environment.
- F. Document the network vulnerabilities and determine the level of criticality for remediation.

Answer: BCE

8. Which task is part of executing a Detailed Design Validation?

- A. Execute the test identified in the detailed design test plan and capture test results.
- B. Determine how results impact the original design.
- C. Incorporate recommended changes into the design process.
- D. Verify that hardware and software requirements are included.

Answer: A

9. What are two typical activities that are conducted as part of Security Assessment? (Choose two.)

- A. Perform intrusion audits.
- B. Assess network infrastructure software and configurations.
- C. Create a performance baseline for Security Assessment.
- D. Categorize security incidents.

Answer: AC

10. Which two items on the design discovery checklist are used to create a low-level design? (Choose two.)

- A. technical requirements
- B. capacity planning
- C. design goals
- D. WAN modeling

Answer: AC
