

920-332 NCSS

Nortel Mommunication Server 1000 Ris.5.0 Install & Commissioning

Practice Exam: 920-332 Exams

Exam Number/Code: 920-332

Exam Name: Mommunication Server 1000 Ris.5.0 Install & Commissioning

Questions and Answers: 96 Q&As

([NCSS](#))

Exam : [920-332](#)

"Mommunication Server 1000 Ris.5.0 Install & Commissioning", also known as 920-332 exam, is a Nortel certification. With the complete collection of questions and answers, TestInside has assembled to take you through 96 Q&As to your 920-332 Exam preparation. In the 920-332 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Quality and Value for the 920-332 Exam TestInside Practice Exams for Nortel **NCSS** Certification 920-332 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 920-332 Exam.

920-332 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the NCSS product experts, included the current newest 920-332 examination questions.

3. 100% Guarantee to Pass Your NCSS exam and get your NCSS Certification.

If you do not pass the Nortel Certification 920-332 exam (Mommunication Server 1000 Ris.5.0 Install & Commissioning) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 920-332 Q&A ensure you pass the exam at your first try.

TestInside professional provide NCSS 920-332 the newest Q&A, completely covers 920-332 test original topic. With our complete NCSS resources, you will minimize your NCSS cost and be ready to pass your 920-332 tests on Your First Try, 100% Money Back Guarantee included!

[Nortel 920-332](#) Test belongs to one of the NCSS certified test, if needs to obtain the NCSS certificate, you also need to participate in other related test, the details you may visit the [NCSS](#) certified topic, in there, you will see all related NCSS certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 920-332 exam

920-332 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

920-332 exam questions updated on regular basis

Same type as the certification exams, 920-332 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 920-332 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Nortel 920-332

Title : Mommunication Server 1000 Ris.5.0 Install &Commissioning3

1. A customer is installing a Media Gateway Controller (MGC) in a Communication Server (CS) 1000E system. The customer is connected to SDI 0 of the MGC to access the configuration menu. No IP information exists for the MGC. How does the customer get to the mgcsetup menu to configure the MGC?

- A. Type mgcsetup on the screen.
- B. No action required. The MGC will boot directly into the setup menu.
- C. The prompt Press any key to stop auto-boot and enter mgcsetup appears.
- D. Enter a shell command. <CTRL>O<CTRL>A<CTRL>M, provide OAM username and password to access OAM shell.

Answer: B

2. When initially configuring the Data Networking and IP Telephony parameters for a Signaling Server on a Communication Server (CS) 1000E RIs. 5.0 system, which data is entered for a Follower Signaling Server?

- A. only the Telephony LAN (TLAN) parameters
- B. the hostname of the Leader Signaling Server
- C. only the Embedded LAN (ELAN) parameters
- D. the parameters for the IP Telephony node, ELAN, TLAN, and Call Server

Answer: B

3. A customer has successfully installed a Media Gateway Controller (MGC) in a Communication Server (CS) 1000E system. The MGC has registered with the Call Server. Which is displayed on the MGC LED display to confirm successful registration?

- A. The MGC display will read PASS.
- B. The MGC display will read LOAD.
- C. The MGC display will read Exxx (E000).
- D. The MGC display will show Superloop and Shelf of MG 1000E (4 0).

Answer: D

4. A customer has deployed a Communication Server (CS) 1000E network with a primary and a secondary site. In the event the primary system fails, the customer requires the user database to be replicated from the primary site to the secondary site. Which Geographic Redundancy configuration meets the customers needs?

- A. CPP Redundancy
- B. Campus Redundancy
- C. Controlled Load-sharing
- D. Survivable Media Gateway

Answer: D

5. A customer is planning to install a CP-PM Signaling Server into their Communication Server (CS) 1000 RIs. 5.0 Communication Server 1000E system. Which two hardware components or combinations does the customer need to identify in order to distinguish the CP-PM card as a Signaling Server? (Choose two.)

- A. Switch 5 set to Position 1
- B. Switch 5 set to Position 2
- C. two Compact Flash Drives (one RMD and one FMD)

D. one Compact Flash Drive (RMD) and One Hard Drive (FMD)

Answer: BD

6. A customer is commissioning a Communication Server (CS) 1000E RIs. 5.0 system with Package 403 (Softswitch) and 402 (IPMG). The CP-PM Call Server software has been installed successfully, and now the customer is provisioning the Media Gateway Tone and Conference Loops for the Media Gateway Controller. Which switch overlay and prompt should the customer use to configure the Media Gateway TDS loop?

A. LD 17, XCT

B. LD 17, VXCT

C. LD 97, SUPT

D. LD 17, MGTDS

Answer: D

7. Upon opening the web browser to begin the login process into Element Manager on a Communication Server (CS) 1000E system, which two IP addresses can you enter into the address bar of the web browser? (Choose two.)

A. the Call Server IP address

B. the Signaling Server Node IP address

C. the Terminal Proxy Server (TPS) IP address

D. the Embedded LAN (ELAN) IP address of the Signaling Sever

Answer: BD

8. A customer has a Communication Server (CS) 1000E system with a cost optimized gateway controller and DSP daughterboards that support 96 VoIP voice gateway resources. The CS 1000E supports CeMux PSTN access cards in the Media Gateway 1000E, reducing the overall cost and complexity of the system. Based on these requirements, which is the recommended RIs. 5.0 hardware for the customer?

A. CP-PM Call Server and MGC with High-Density DSP Daughterboard

B. CP-PM Call Server, MGC without DSP Daughterboards, and MC 32S

C. CP-PIV Call Server, MGC without DSP Daughterboards, and MC 32S

D. CP-PM Call Server and Media Gateway Controller (MGC) with Low-Density DSP Daughterboard

Answer: A

9. You are installing software for the first time on a new Communication Server (CS) 1000 RIs.5.0 Signal Server and receive the following message: The filesystems verification failed! Which action should you take next?

A. Troubleshoot the hardware failure.

B. Select the menu choice to abort the installation.

C. Contact the next level of support to help diagnose the fault.

D. Select the menu choice to partition and initialize the hard disk.

Answer: D

10. You are deploying a Communication Server (CS) 1000E system with a CP-PM Call Server and the campus redundancy feature. It is mandatory that you configure the CP-PM Call Server side for the campus redundancy feature to operate properly. In which two locations is the Call Server side configured? (Choose two.)

A. the BIOS menu

B. the Installation menu

C. the CLI using LD 97 Superloop commands

D. the CLI using LD 117 CPU Location commands

Answer: AB

11. A customer is implementing a Communication Server (CS) 1000 RIs.5.0 Communication Server 1000E High Availability (HA) system. The customer wants to know if there are any special package requirements beyond the HA Package needed for the system. Which two software packages are mandatory when deploying a CS 1000E HA system? (Choose two.)

A. SBO - Branch Office Package 390

- B. SOFTSWITCH - Soft Switch Package 402
- C. IPMG - Media Gateway 1000E Package 403
- D. SIP - SIP Gateway and Converged Desktop Package 406

Answer: BC

12. A customer has successfully installed and configured a Signaling Server in a Communication Server (CS) 1000E system. After configuration and reboot, the Follower Signaling Server sends out BOOTP requests and waits for a response. However, there is no BOOTP response. Which action should be taken?

- A. Reboot the Leader Signaling Server.
- B. Wait for a BOOTP response from the Leader Signaling Server.
- C. Configure the IP Telephony node for the Follower from Element Manager.
- D. Configure the IP Telephony node for the Follower from the Installation Tools menu.

Answer: C

13. You have completed installing a Communication Server (CS) 1000E CP-PIV system. The system has been operating in normal conditions. One day, the lab temperature rises and causes the alarm/fan module temperature in the CP-PIV Call Server to exceed 60 degrees Celsius. What impact does this have on the system?

- A. A major alarm is triggered.
- B. The health of the active Call Server decreases.
- C. The Call Server Fan units switch into high-speed.
- D. The Call Server switches to the standby Call Server.

Answer: A

14. A customer has installed the system components of a Communication Server (CS) 1000E system and has powered-up the system. Which visual indicator helps the customer differentiate whether a CP-PM card is running as a Call Server or a Signaling Server?

- A. Main Status LED
- B. FMD/HD Status LED
- C. Call Server Redundancy LED
- D. Embedded LAN (ELAN) Connection Status Link LED

Answer: C

15. Which software installation must be completed before installing software on any Enterprise Media Gateway in a Communication Server (CS) 1000 RIs. 5.0 system?

- A. The Call Server software must be installed or upgraded.
- B. The IP telephone software must be available to all IP telephones.
- C. The ERS 8600 routing switches must be running the latest software revision.
- D. All Signaling Servers must be configured with the newest version of software.

Answer: A

16. A customer is planning system requirements for their Communication Server (CS) 1000E High Availability (HA) system. Based on system capabilities and system capacities with RIs. 5.0, which is the maximum number of Media Gateway 1000E systems supported?

- A. 5
- B. 20
- C. 30
- D. 50

Answer: D

17. A customer has deployed a Communication Server (CS) 1000E network with a primary and a secondary site. In the event that the primary system fails, the customer requires each system backs up the IP telephones on the other system. The customer has been told this is possible and will require duplicate IP Phone Licenses on the second system. Which Redundant configuration is required?

- A. 1 + 1 configuration
- B. Campus Redundancy
- C. Controlled Load-sharing
- D. Survivable Media Gateway

Answer: C

18. A customer has imported the node files from the Signaling Server to the Call Server in Element Manager. The customer sends the node configuration files to all IP Telephony components in the node using the Transfer/Status button. The Transfer/Status button on the Transfer/Status web page is yellow. What does this indicate?

- A. The transfer status of the node is in progress.
- B. The node configuration is transferred to the elements.
- C. The transfer status of the node elements is unavailable.
- D. An element within the node failed to transfer the BOOTP or CONFIG files.

Answer: C

19. A customer has a Communication Server (CS) 1000E system with a cost optimized gateway controller and DSP daughterboards that support 160 VoIP voice gateway resources. The CS 1000E supports CeMux PSTN access cards in the Media Gateway 1000E, reducing the overall cost and complexity of the system. Based on these requirements, which is the recommended RIs. 0 hardware for the customer?

- A. CP-PM Call Server, MGC with High-Density Daughterboard, and MC 32S
- B. CP-PM Call Server and MGC with Low-Density and High-Density DSP Daughterboards
- C. CP-PM Call Server, MGC with Low and High-Density DSP Daughterboards, and MC 32S
- D. CP-PM Call Server and Media Gateway Controller (MGC) with Low-Density DSP Daughterboard

Answer: C

20. A customer has a Communication Server (CS) 1000E RIs. 5.0 system and is installing a stand-alone Signaling Server. Which role should you choose during the Signaling Server configuration?

- A. Leader
- B. Backup
- C. Follower
- D. Alternate

Answer: A
