

920-334 Other Nortel Certification

Nortel BCM50 Rls.3.0 & BCM200/400 Rls.4.0 Sales Engineering

Practice Exam: 920-334 Exams

Exam Number/Code: 920-334

Exam Name: BCM50 Rls.3.0 & BCM200/400 Rls.4.0 Sales Engineering

Questions and Answers: 62 Q&As

([Other Nortel Certification](#))

Exam : [920-334](#)

"BCM50 Rls.3.0 & BCM200/400 Rls.4.0 Sales Engineering", also known as 920-334 exam, is a Nortel certification. With the complete collection of questions and answers, TestInside has assembled to take you through 62 Q&As to your 920-334 Exam preparation. In the 920-334 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Quality and Value for the 920-334 Exam TestInside Practice Exams for Nortel **Other Nortel Certification** Certification 920-334 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 920-334 Exam.

920-334 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Other Nortel Certification product experts, included the current newest 920-334 examination questions.

3. 100% Guarantee to Pass Your Other Nortel Certification exam and get your Other Nortel Certification Certification. If you do not pass the Nortel Certification 920-334 exam (BCM50 Rls.3.0 & BCM200/400 Rls.4.0 Sales Engineering) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 920-334 Q&A ensure you pass the exam at your first try.

TestInside professional provide Other Nortel Certification 920-334 the newest Q&A, completely covers 920-334 test original topic. With our complete Other Nortel Certification resources, you will minimize your Other Nortel Certification cost and be ready to pass your 920-334 tests on Your First Try, 100% Money Back Guarantee included!

[Nortel 920-334](#) Test belongs to one of the Other Nortel Certification certified test, if needs to obtain the Other Nortel Certification certificate, you also need to participate in other related test, the details you may visit the [Other Nortel Certification](#) certified topic, in there, you will see all related Other Nortel Certification certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 920-334 exam

920-334 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

920-334 exam questions updated on regular basis

Same type as the certification exams, 920-334 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 920-334 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Nortel 920-334

Title : BCM50 RIs.3.0 & BCM200/400 RIs.4.0 Sales Engineering

1. BCM supports a queue service discipline that allows packets to be serviced in an absolute priority fashion or using a weighted-fair-queuing scheduler. This service discipline ensures that packets in the highest priority queue are serviced quickly without starving the lower priority queues. How many quality of service (QoS) queues does BCM RIs. 4.0 support?

- A. 1
- B. 2
- C. 4
- D. 7

Answer: D

2. Which statement should be considered when you allocate DS30 channel Block resources using a 3/5 channel split configuration?

- A. This configuration is achieved by assigning bus two to the voice data sector.
- B. This configuration allocates three DS30 channel blocks to Media Bay Modules.
- C. This configuration may be configured during system startup using the Startup Profile.
- D. This configuration may be used to accommodate increased IP telephony or VoIP trunk requirements.

Answer: D

3. Which encryption method does a BCM system support when IPSec is configured on it?

- A. PKI
- B. RC4
- C. AES
- D. PPTP

Answer: C

4. In planning a network configuration for a customer there are tools available to help you with your plan. Which tool should you use to determine the specific requirements for the system design, including pricing information?

- A. BCM Monitor
- B. AppManager
- C. Startup Profile
- D. Enterprise Configurator

Answer: D

5. A network administrator needs to calculate the maximum number of voicemail ports required on their BCM 400 system. Which two factors should be considered when making this determination? (Choose two.)

- A. The range is 0 to 16 ports.
- B. The range is 0 to 32 ports.
- C. Each voicemail port requires one media channel resource.
- D. Each voicemail port requires two signaling channel resources.

Answer: BC

6. A client has a BCM 400 that is performing all IPSec processing using software. They are concerned about overloading the BCM 400 processor with IPSec traffic processing. What is the maximum number of simultaneous tunnels?

- A. 12 tunnels
- B. 16 tunnels
- C. 24 tunnels
- D. 30 tunnels

Answer: B

7. A customer's new system will be configured with 55 IP telephones, an IVR system and a voicemail. This system will also use over 30 analog and digital telephones. What should the DS30 split be for this customer?

- A. A 2/5 split
- B. A 2/6 split
- C. A 3/5 split
- D. A 3/6 split

Answer: C

8. A remote user has the ability to connect to an ISP and then to a specific route into a BCM that is configured for IPSec Remote User. The remote user can also print locally even while connected remotely to the BCM. Which functionality does this describe?

- A. split routing
- B. dual routing
- C. split tunneling
- D. dual tunneling

Answer: C

9. A customer has several remote locations that they want to securely connect through the Internet. You explain that using IPSec tunnels between these sites would provide this security; however, they are concerned about it being able to handle all of the remote locations. What is the maximum number of remote sites that can be connected to a BCM50 using IPSec tunnels?

- A. 10
- B. 12
- C. 14
- D. 16

Answer: A

10. Fallback is a feature that allows a call to progress when a VoIP trunk is unavailable or is not providing adequate quality of service (QoS). By enabling PSTN fallback, you allow the system to check the availability of the VoIP trunks and then switch the call to a PSTN line. For the PSTN fallback to work on a suitable bandwidth, which two statements must be true on a BCM 200 platform? (Choose two.)

- A. The QoS Monitor must be enabled.
- B. The jitter buffer must be configured.
- C. The Transmit threshold must be set.
- D. Proactive Voice Quality Monitoring (PVQM) must be enabled.
- E. IP sets must be configured to use the G.723 Codec.

Answer: AC
