

920-441 NCSE

Nortel nncde contivity security exam

Practice Exam: 920-441 Exams

Exam Number/Code: 920-441

Exam Name: nncde contivity security exam

Questions and Answers: 54 Q&As

([NCSE](#))

Exam : [920-441](#)

"nncde contivity security exam", also known as 920-441 exam, is a Nortel certification. With the complete collection of questions and answers, TestInside has assembled to take you through 54 Q&As to your 920-441 Exam preparation. In the 920-441 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Quality and Value for the 920-441 Exam TestInside Practice Exams for Nortel **NCSE** Certification 920-441 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 920-441 Exam.

920-441 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the NCSE product experts, included the current newest 920-441 examination questions.

3. 100% Guarantee to Pass Your NCSE exam and get your NCSE Certification.

If you do not pass the Nortel Certification 920-441 exam (nncde contivity security exam) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 920-441 Q&A ensure you pass the exam at your first try.

TestInside professional provide NCSE 920-441 the newest Q&A, completely covers 920-441 test original topic. With our complete NCSE resources, you will minimize your NCSE cost and be ready to pass your 920-441 tests on Your First Try, 100% Money Back Guarantee included!

[Nortel 920-441](#) Test belongs to one of the NCSE certified test, if needs to obtain the NCSE certificate, you also need to participate in other related test, the details you may visit the [NCSE](#) certified topic, in there, you will see all related NCSE certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 920-441 exam

920-441 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

920-441 exam questions updated on regular basis

Same type as the certification exams, 920-441 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 920-441 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Nortel 920-441

Title : NNCDE Contivity Security Exam

1. A customer wants to optimize their firewall performance using firewall rule sets. How can the customer achieve this objective?

- A. Firewall rules sets should be based on protocol usage.
- B. There is no way to optimize firewall performance using rule sets.
- C. Firewall rules should be placed such that the highest utilized rules are seen later in the rule set so to limit the number of rules the firewall needs to compare to pass the traffic.
- D. Firewall rules should be placed such that the highest utilized rules are seen early in the rule set so to limit the number of rules the firewall needs to compare to pass the traffic.

Answer: D

2. A designer has designed a firewall system with a DMZ. What are two types of traffic that should not be normally allowed? (Choose two.)

- A. traffic initiated from the DMZ
- B. traffic from the Internet to the DMZ
- C. traffic from internal users to the DMZ
- D. traffic from internal services to the DMZ

Answer: AC

3. A customer wants to optimize their firewall performance using firewall rule sets. How can the customer achieve this objective?

- A. Firewall rules sets should be based on protocol usage.
- B. There is no way to optimize firewall performance using rule sets.
- C. Firewall rules should be placed such that the highest utilized rules are seen later in the rule set so to limit the number of rules the firewall needs to compare to pass the traffic.
- D. Firewall rules should be placed such that the highest utilized rules are seen early in the rule set so to limit the number of rules the firewall needs to compare to pass the traffic.

Answer: D

4. Which security method does Firewall User Authentication use during the authentication process?

- A. IKE
- B. IPSec
- C. HTTPS
- D. Digital Certificates

Answer: C

5. Your company has recently added a large acquisition to your network infrastructure that includes a large number of Remote Access users. Some sections of this group have shown suspicious use on the VPN connections that you wish to curtail. At what level can the Contivity Firewall apply filters or stateful firewall rules to secure these connections?

- A. individual User
- B. group of users
- C. all users uniformly
- D. only applies to branch office tunnels

Answer: B

6. Your company has initiated a VoIP solution that utilizes IPSec tunnels to protect certain confidential phone connections. The system has implemented QoS on all of its interfaces utilizing DiffServ. Recent communications have shown poor VoIP performance during maximum traffic load times relating solely to the IPSec protected traffic. Which IPSec related functionality is likely related to the problem?

- A. ISAKMP
- B. 3DES encryption
- C. Anti-Replay protection
- D. Perfect Forward Secrecy

Answer: C

7. A customer is concerned about limiting factors of the Contivity firewall. What should the customer consider as the primary limiting factor of the Contivity firewall?

- A. number of firewall rules
- B. number of firewall session
- C. maximum sustainable aggregate throughput
- D. the amount of system memory related to the firewall

Answer: C

8. Which statement best describes Perfect Forward Secrecy?

- A. ensures that the ISAKMP negotiations cannot be compromised by hackers
- B. ensures that during rekeying for IPSec that the keys are protected during the exchange
- C. ensures that keying materials will always be strong enough to protect data confidentiality
- D. ensures that one key being compromised cannot result in the compromise of subsequent keys

Answer: D

9. A designer is considering utilizing the Contivity Stateful Firewall feature. What effects can be expected if logging is utilized for large volume traffic?

- A. Logging will improve system performance.
- B. Logging will affect the system only if using syslog.
- C. Significant logging will have no affect on the system.
- D. Significant logging will cause performance degradation of the system.

Answer: D

10. A designer has recommended that rule sets on a firewall be limited to 30 rules. What rationale did the designer use to make this recommendation?

- A. performance concerns
- B. Contivity can't handle more rules
- C. simplicity of rules to prevent rule conflicts
- D. the lack of training of most Firewall Administrators

Answer: C
