### Nortel CallPilot Ris.4.0 Unified Messaging Exam

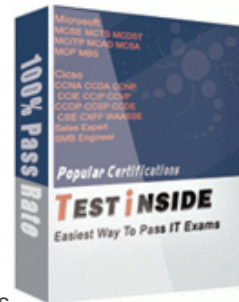

**Practice Exam:** 920-457 Exams

**Exam Number/Code:** 920-457

**Exam Name:** CallPilot Ris.4.0 Unified Messaging Exam

**Questions and Answers:** 50 Q&As

( [Other Nortel Certification](#) )

Exam : [920-457](#)

"CallPilot Ris.4.0 Unified Messaging Exam", also known as 920-457 exam, is a Nortel certification. With the complete collection of questions and answers, TestInside has assembled to take you through 50 Q&As to your 920-457

Exam preparation. In the 920-457 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Quality and Value for the 920-457 Exam TestInside Practice Exams for Nortel **Other Nortel Certification** Certification 920-457 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

#### **TestInside provide the professional Q&A.**

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 920-457 Exam.

920-457 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Other Nortel Certification product experts, included the current newest 920-457 examination questions.

3. 100% Guarantee to Pass Your Other Nortel Certification exam and get your Other Nortel Certification Certification.

If you do not pass the Nortel Certification 920-457 exam (CallPilot Ris.4.0 Unified Messaging Exam) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

#### **use TestInside 920-457 Q&A ensure you pass the exam at your first try.**

TestInside professional provide Other Nortel Certification 920-457 the newest Q&A, completely covers 920-457 test original topic. With our complete Other Nortel Certification resources, you will minimize your Other Nortel Certification cost and be ready to pass your 920-457 tests on Your First Try, 100% Money Back Guarantee included!

[Nortel 920-457](#) Test belongs to one of the Other Nortel Certification certified test, if needs to obtain the Other Nortel Certification certificate, you also need to participate in other related test, the details you may visit the [Other Nortel Certification](#) certified topic, in there, you will see all related Other Nortel Certification certified subject of examination.

#### **TestInside Testing Engine Features**

Comprehensive questions and answers about 920-457 exam

920-457 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

920-457 exam questions updated on regular basis

Same type as the certification exams, 920-457 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Exam : Nortel 920-457

Title : CallPilot Ris.4.0 Unified Messaging Exam

Version : Demo

1. A customer has CallPilot Ris. 4.0 servers located in several locations. They use central site administration. Occasionally the main administrator needs to give OS administrative control to a remote administrator using dial-up.

What is pre-loaded on the server that makes this possible?

- A. My CallPilot
- B. CallPilot Manager
- C. Any IP connected PC
- D. Remote Desktop Client/pcAnywhere 11 host

Answer: D

2. A customer plans to install multiple CallPilot Ris. 2.x/3.0/4.0 servers, a separate web server for CallPilot administration, My CallPilot, and CallPilot Reporter into their Private Branch Exchange (PBX) network. They want to use Audio Messaging Interface Specification (AMIS) and Enterprise Networking solutions to connect all the CallPilot servers. They also require CallPilot Reporter to determine whether AMIS and Enterprise Networking have access to sufficient channel resources for the networking traffic load. Which report meets their needs?

- A. Productivity report
- B. Networking Activity report
- C. Service Quality Detailed report
- D. Open Networking Activity report

Answer: B

3. A customer has CallPilot Ris. 4.0 servers located in several locations. Hackers use several methods to attack systems that are connected to the Internet. The company has requested that networking between servers have high security. Which three should be used to ensure high network security? (Choose three.)

- A. SSL encryption
- B. AMIS networking
- C. SMTP authentication
- D. Enterprise networking
- E. VPIM networking using SMTP authentication

Answer: ACE

4. A customer plans to install multiple CallPilot Ris. 2.x/3.0/0 servers into their Private Branch Exchange (PBX) network. On the planned CallPilot server that will be located at their headquarters, they want to create several menus, and want callers to be able to access the auto attendant at any time in the menu. What is the best and least time consuming procedure for making the auto attendant available for all of the planned menus?

- A. Create an auto attendant application for each application.
- B. Copy the Thru-Dial application block into each menu application.
- C. Create a Thru-Dial application for each menu to route to the Auto-Attendant.
- D. Create one auto attendant application and import this application into all the menu applications.

Answer: D

5. A customer plans to install multiple CallPilot Ris. 2.x/3.0/4.0 servers, a separate web server for CallPilot

administration, and the My CallPilot application into their Private Branch Exchange (PBX) network. They want to use Application Builder to create a customized fax application to meet their fax needs. Once the fax application is created they want to reuse some parts of that application in another application.

Which two procedures will allow the call handling functions to be used in another application? (Choose two.)

- A. Save the fax application under a different ID and assign different channels to it.
- B. Save the fax application under a different ID and assign the same channels to it.
- C. Copy the blocks that you want to reuse from the fax application and paste them into another application.
- D. Save the group of call handling functions that you want to reuse as a separate application, and then import the small application into other applications that require the same call handling functions.

Answer: CD

6. A customer is planning a new multi-site CallPilot RIs. 2.x/3.0/4.0 solution. They want to use Enterprise or Voice Profile for Internet Mail (VPIM) Networking to connect the CallPilot systems. They require that the CallPilot solution support name dialing for remote addresses. Using CallPilot Manager, which configuration should you recommend?

- A. Names Across the Network
- B. Message Delivery Configuration
- C. Message Network Service (NMS)
- D. Message Networking Configuration

Answer: A

7. A customer has CallPilot RIs. 4.0 and 0 servers in several locations. They want to centrally administer and manage all sites with valid data. They would like to be alerted should the CallPilot network have any problems. Which application should be implemented to accomplish this?

- A. My CallPilot
- B. pcAnywhere
- C. Crystal Reports
- D. CallPilot Reporter

Answer: D

8. A customer has CallPilot RIs. 4.0 servers located in several locations. They have requested central site administration for all locations. Which two features/services will accomplish this? (Choose two.)

- A. CallPilot Manager
- B. pcAnywhere software
- C. Directory synchronization feature
- D. Dedicated stand-alone MS Windows Web-based server

Answer: AD

9. A customer has CallPilot RIs. 4.0 servers in four locations. They use central site administration. They need report data to understand their server's behavior. What are two benefits derived from report analysis? (Choose two.)

- A. Total daily voicemail use
- B. Relative expense of network
- C. Detect potential system problems
- D. Monitor system usage and system security

Answer: CD

10. A customer plans to install a large Succession 1000M RIs. 4.0 system and two small Succession 1000M RIs. 4.0 systems at two remote sites. Each Succession system will have a CallPilot RIs. x/3.0/4.0 server. They want to use Enterprise Networking to connect all CallPilot servers on each of the Succession systems. Which report can be created in CallPilot Reporter to best reflect the efficiency of the CallPilot server network attributes at the Main Office (MO)?

- A. Productivity Network report
- B. Network Channel Usage report
- C. Network Activity report highlighting blocked attempts

D. Open Network Activity report highlighting blocked attempts

Answer: C
