

920-808 Other Nortel Certification Nortel Real-Time Networking Technologies

Practice Exam: 920-808 Exams

Exam Number/Code: 920-808

Exam Name: Real-Time Networking Technologies

Questions and Answers: 65 Q&As

([Other Nortel Certification](#))

Exam : [920-808](#)

"Real-Time Networking Technologies ", also known as 920-808 exam, is a Nortel certification. With the complete collection of questions and answers, TestInside has assembled to take you through 65 Q&As to your 920-808 Exam preparation. In the 920-808 exam resources, you will cover every field and category in Nortel Certification helping to ready you for your successful Nortel Certification.

Quality and Value for the 920-808 Exam TestInside Practice Exams for Nortel **Other Nortel Certification** Certification 920-808 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 920-808 Exam.

920-808 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Other Nortel Certification product experts, included the current newest 920-808 examination questions.

3. 100% Guarantee to Pass Your Other Nortel Certification exam and get your Other Nortel Certification Certification.

If you do not pass the Nortel Certification 920-808 exam (Real-Time Networking Technologies) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 920-808 Q&A ensure you pass the exam at your first try.

TestInside professional provide Other Nortel Certification 920-808 the newest Q&A, completely covers 920-808 test original topic. With our complete Other Nortel Certification resources, you will minimize your Other Nortel Certification cost and be ready to pass your 920-808 tests on Your First Try, 100% Money Back Guarantee included!

[Nortel 920-808](#) Test belongs to one of the Other Nortel Certification certified test, if needs to obtain the Other Nortel Certification certificate, you also need to participate in other related test, the details you may visit the [Other Nortel Certification](#) certified topic, in there, you will see all related Other Nortel Certification certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 920-808 exam

920-808 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

920-808 exam questions updated on regular basis

Same type as the certification exams, 920-808 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 920-808 exam demo before you decide to buy it in Test-Inside.com.

Exam : Nortel 920-808

Title : Real-Time Networking Technologies

1. Which statement is true concerning the SIP protocol?

- A. SIP is based on H.323.
- B. SIP is an extension of HTTP/1.1.
- C. SIP is a component of HTTP/1.1.
- D. SIP is based on a request/response transaction model.

Answer: D

2. Click on the Exhibit button.

With reference to the exhibit, which statement correctly describes the use of the four-address frame format when A transmits a frame to B?

- A. The source station A needs to fill the four address fields of the data frame.
- B. The source station A must specify its address and destination address within the same BSS and the BSSID to which the source and stations are associated.
- C. The source station A needs only to fill its address in one of the address fields. AP1 will fill the rest of the address fields.
- D. The source station A needs only to specify the destination address within the same BSS.

Answer: B

3. Assessing a LAN for its ability to carry VoIP is also known as "network health check".

What is a network health check intended to predict?

- A. whether the network can provide efficient signaling and call establishment
- B. whether the network has sufficient security in the communication link
- C. the reliability of VoIP services running the network
- D. identification of VoIP quality-killing impairments

Answer: D

4. Which method is used for call transfers and redirection to a conference bridge when the Session Initiation Protocol (SIP) is used?

- A. PRACK
- B. UPDATE
- C. REFER
- D. NOTIFY

Answer: C

5. Which protocols are used to detect the failures that impact Label Switch Path (LSP) traffic?

- A. RSVP-TE Hello and ITU-T Y1711
- B. OSPF-TE keep-alive and ATM PNNI
- C. RSVP-TE Hello and OSPF keep-alive
- D. ITU-T Y1711 and OSPF-TE keep-alive

Answer: A
