Apple Security Best Practices for Mac OS X v10.4 Exam

Practice Exam: 9L0-612 Exams

Exam Number/Code: 9L0-612

Exam Name: Security Best Practices for Mac OS X v10.4 Exam

Questions and Answers: 73 Q&As

([ACSA](#))

Exam : [9L0-612](#)

"Security Best Practices for Mac OS X v10.4 Exam", also known as 9L0-612 exam, is a Apple certification. With the complete collection of questions and answers, TestInside has assembled to take you through 73 Q&As to your 9L0-612 Exam preparation. In the 9L0-612 exam resources, you will cover every field and category in Apple Certification helping to ready you for your successful Apple Certification.

Quality and Value for the 9L0-612 Exam TestInside Practice Exams for Apple **ACSA** Certification 9L0-612 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 9L0-612 Exam.

9L0-612 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the ACSA product experts, included the current newest 9L0-612 examination questions.

3. 100% Guarantee to Pass Your ACSA exam and get your ACSA Certification.

If you do not pass the Apple Certification 9L0-612 exam (Security Best Practices for Mac OS X v10.4 Exam) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 9L0-612 Q&A ensure you pass the exam at your first try.

TestInside professional provide ACSA 9L0-612 the newest Q&A, completely covers 9L0-612 test original topic. With our complete ACSA resources, you will minimize your ACSA cost and be ready to pass your 9L0-612 tests on Your First Try, 100% Money Back Guarantee included!

[Apple 9L0-612](#) Test belongs to one of the ACSA certified test, if needs to obtain the ACSA certificate, you also need to participate in other related test, the details you may visit the [ACSA](#) certified topic, in there, you will see all related ACSA certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 9L0-612 exam

9L0-612 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

9L0-612 exam questions updated on regular basis

Same type as the certification exams, 9L0-612 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 9L0-612 exam demo before you decide to buy it in Test-Inside.com.

Exam : Apple 9L0-612

Title : Security Best Practices for Mac OS X v10.4 Exam

1. What does Stealth Mode on the Mac OS X Firewall do?

- A. It disables the sending of denials to blocked packets.
- B. It disables responses to all incoming connection attempts
- C. It creates a NAT gateway to hide the true IP address of the computer.
- D. It enables responses only to connection attempts from computers that are in the allowed computer list.

Answer: A

2. Which file do you configure to enable Common Criteria auditing on startup?

- A. /etc/audit
- B. /etc/hostconfig
- C. /etc/security/cc_audit
- D. /etc/security/audit_warn

Answer: B

3. _____ is a command-line tool that displays the headers of packets seen by a computer's network interface card.

- A. arp
- B. ping
- C. netstat
- D. tcpdump

Answer: D

4. Which statement about SSH tunneling is FALSE?

- A. SSH tunnels can support the PPP protocol.
- B. SSH tunnels secure all IP traffic, including UDP and TCP.
- C. SSH tunnels secure otherwise non-secure traffic, such as POP and AFP.
- D. Forwarding port 1023 and below requires root privileges for the initial receiving port.

Answer: B

5. What are the recommended POSIX permissions for a web folder being shared through WebDAV?

- A. user - www
group - www
user/group/other - 775
- B. user - root
group - wheel
user/group/other - 775
- C. user - administrator
group - web
user/group/other - 744
- D. user - administrator
group - everyone
user/group/other - 750

Answer: A

6. You have first enabled Personal File Sharing on your computer, and then turned on the built-in firewall. How does the default behavior of the Mac OS X firewall affect file sharing on your computer?

- A. No computer can connect to your computer via AFP.
- B. Any computer can connect to your computer via AFP.
- C. Only computers on the local subnet can connect to your computer via AFP.
- D. Only computers with a local Bonjour address can connect to your computer via AFP.

Answer: B

7. Why might you prefer WPA Enterprise over WPA Personal?

- A. You need 128-bit encryption.
- B. You do not want to manage a RADIUS server.
- C. You require more connections than WPA Personal allows
- D. The security implications of WPA Personal's shared key are not acceptable.

Answer: D

8. Which command will force users on local computers to create passwords of at least 12 characters, whether or not they are connected to a directory server?

- A. `pwpolicy -l /NetInfo/DefaultLocalNode -a root -setpassword minChars=12`
- B. `passwd -l /NetInfo/DefaultLocalNode -a root -setglobalpolicy minChars=12`
- C. `passwd -n /NetInfo/DefaultLocalNode -a administrator -setpassword minChars=12`
- D. `pwpolicy -n /NetInfo/DefaultLocalNode -a administrator -setglobalpolicy minChars=12`

Answer: D

9. When using certificates, what role does a Certificate Authority (CA) play?

- A. A CA must be present on the server before SSL can be enabled.
- B. A CA is a trusted third party that ensures the identity of the server.
- C. A CA determines what ciphers are available for symmetric encryption.
- D. SSL routes traffic through the CA to verify the identity of the client and server.

Answer: B

10. Which two (2) steps to obtain a certificate from a third-party are essential for signing email?

(Choose TWO.)

- A. Create a key pair.
- B. Change the key size to 128 bits.
- C. Store a key pair in your login keychain.
- D. Generate a CSR (Certificate Signing Request).
- E. Use Certificate Assistant to generate a CA (Certificate Authority).

Answer: AD

11. What Common Criteria tool lets you specify which log events to display?

- A. Audit Log Viewer
- B. `/usr/sbin/ccfilter`
- C. `/usr/sbin/auditfilter`
- D. `/usr/sbin/auditreduce`

Answer: D

12. Which two (2) actions might a rootkit perform?

(Choose TWO.)

- A. Monitor disk activity on the root volume.
- B. Install security tools in root's home directory.
- C. Provide remote access to a computer by opening ports.
- D. Hide its presence by installing modified versions of system commands

E. Provide a set of tools that allow the system administrator to monitor security events.

Answer: CE

13. What is the result of adding the line below to the default slapd.conf file?

disallow bind_anon

- A. All users must authenticate to connect to servers.
- B. Clients will be required to provide authentication to use LDAP.
- C. Nothing changes because that is the default setting for Open Directory.
- D. Anonymous BIND (Berkeley Internet Name Daemon) will no longer be used for this server.

Answer: B

14. Which two (2) authentication mechanisms are available to SSH users?

(Choose TWO.)

- A. public/private key pair
- B. shared ssh_config files
- C. user name and password
- D. NTLM (NT LAN Manager)
- E. L2TP (Layer 2 Tunneling Protocol)

Answer: AC

15. Which statement best describes Wired Equivalent Privacy (WEP)?

- A. WEP is a moderately secure firewall for wireless devices.
- B. WEP optimizes performance of 802.11 devices over distances, so they perform as well as their wired equivalents.
- C. WEP represents the first attempt at designing an algorithm to protect wireless communication from eavesdropping.
- D. WEP allows wireless access point administrators to require user names and passwords of users who want to connect to the wireless access point.

Answer: C
