Apple Mao OS X Server Command Line Install and Configuration v10.4

Practice Exam: 9L0-614 Exams

Exam Number/Code: 9L0-614

Exam Name: Mao OS X Server Command Line Install and Configuration v10.4

Questions and Answers: 67 Q&As
([ACSA](#))

Exam : [9L0-614](#)

"Mao OS X Server Command Line Install and Configuration v10.4", also known as 9L0-614 exam, is a Apple certification. With the complete collection of questions and answers, TestInside has assembled to take you through 67 Q&As to your 9L0-614 Exam preparation. In the 9L0-614 exam resources, you will cover every field and category in Apple Certification helping to ready you for your successful Apple Certification.

Quality and Value for the 9L0-614 Exam TestInside Practice Exams for Apple **ACSA** Certification 9L0-614 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 9L0-614 Exam.

9L0-614 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the ACSA product experts, included the current newest 9L0-614 examination questions.

3. 100% Guarantee to Pass Your ACSA exam and get your ACSA Certification.

If you do not pass the Apple Certification 9L0-614 exam (Mao OS X Server Command Line Install and Configuration v10.4) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 9L0-614 Q&A ensure you pass the exam at your first try.

TestInside professional provide ACSA 9L0-614 the newest Q&A, completely covers 9L0-614 test original topic. With our complete ACSA resources, you will minimize your ACSA cost and be ready to pass your 9L0-614 tests on Your First Try, 100% Money Back Guarantee included!

[Apple 9L0-614](#) Test belongs to one of the ACSA certified test, if needs to obtain the ACSA certificate, you also need to participate in other related test, the details you may visit the [ACSA](#) certified topic, in there, you will see all related ACSA certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 9L0-614 exam

9L0-614 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

9L0-614 exam questions updated on regular basis

Same type as the certification exams, 9L0-614 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 9L0-614 exam demo before you decide to buy it in Test-Inside.com.

- C. AutoServerSetup.plist
- D. Hardware serial number
- E. FQDN (Fully Qualified Domain Name)

Answer: DE

2. Certain tools must be used to configure a Mac OS X Server computer from the command line. Other tools are optional. Which tool below is optional when configuring Mac OS X Server from the command line?

- A. ifconfig
- B. serversetup
- C. networksetup

Answer: A

3. You are creating a file to import users into your directory. Your file's format, including the types of data imported and the order of the data fields, is defined in _____.

- A. LDIFv3
- B. RFC2307
- C. the Server Admin Guide
- D. the first line of your file

Answer: D

4. Where are records for share points stored?

- A. in /etc/afpd.conf
- B. in /etc/afpovertcp.cfg
- C. in the local NetInfo database
- D. in the LDAP database of the Open Directory Master

Answer: C

5. You are using the command-line installer to install PretendCoTools.pkg. You want to install it on a non-boot volume mounted on a server. Which command will help you determine whether the package supports installation on that volume?

- A. hdiutil verify PretendCoTools.pkg
- B. installer -volinfo -pkg PretendCoTools.pkg
- C. ls -l PretendCoTools.pkg/Contents/Archive.bom
- D. cat PretendCoTools.pkg/Contents/Resources/preflight

Answer: B

6. You want to use the built-in software RAID in Mac OS X Server to create a RAID 1 set across two disks in an Xserve. Which command will accomplish this goal?

- A. `megaraid create R1 -drive 0 1 -stripesize 64`
- B. `diskutil createRAID mirror RAID_Volume HFS+ disk0 disk1`
- C. `diskutil createRAID stripe RAID_Volume HFS+ disk0 disk1`
- D. `diskutil createRAID stripe-distributed-parity RAID_Volume HFS+ disk0 disk1`

Answer: B

7. You are deploying several Macintosh servers on a Windows network. The Macintosh servers cannot establish a link to the Ethernet network, but the Windows machines can. Which of these steps is MOST LIKELY to fix this issue?

- A. Turn off portfast on the switch.
- B. Turn off portfast on the Macintosh servers.
- C. Modify the duplex setting on the Macintosh servers.
- D. Use `ifconfig` to configure static IP addresses for the Macintosh servers.

Answer: C

8. You want to update the software on a headless Xserve over an SSH connection to the server, but one of the component installers has a graphical element that displays a splash screen. How can you prevent the installer from launching this graphical element?

- A. Run `softwareupdate` with the `-headless` option.
- B. Set the environment variable `COMMAND_LINE_INSTALL` to 1.
- C. Use `SystemStarter` to start the `HeadlessStartup` startup item.
- D. Download the updates with `softwareupdate -d`, then install them with `installer -noGUI`.

Answer: B

9. You configured your Mac OS X Server computers with IPv6 turned off for security reasons. Now your company is migrating its infrastructure to IPv6. Which command can you use to configure IPv6 on these Mac OS X Servers?

- A. `pmset`
- B. `scutil`
- C. `systemsetup`
- D. `serversetup`
- E. `networksetup`

Answer: E

10. You want to enable secure connections to your AFP service. Which command can you use to do so?

- A. `sudo serveradmin settings afp:SSHTunnel = yes`
- B. `sudo serveradmin command afp:setSSHTunnel:yes`
- C. `sudo networksetup -CreateBond afp:SSHTunnel`
- D. `sudo networksetup settings -setappletalk "Built-in Ethernet" = SSH`

Answer: A

11. What does the command below do?

```
sharing -a /Users
```

- A. Makes the `/Users` directory a share point.
- B. Lists all share points in the `/Users` directory.
- C. Appends permissions to the `Users` share point.
- D. Shows all users currently connected to the `Users` share point.

Answer: A

12. Which command-line tool can help you identify the configuration file that is written to when you change an option from the graphical interface?

- A. `ps`
- B. `otool`

- C. tcpdump
- D. fs_usage
- E. netstat -a

Answer: D

13. Which statement is true of Server Admin's default SSL configuration?

- A. Each server has a unique, self-signed certificate.
- B. SSL is disabled because no valid certificates are pre-installed.
- C. Each server has a unique certificate signed by Apple's Certificate Authority.
- D. All servers use the identical, pre-installed certificate signed by Apple's Certificate Authority.

Answer: A

14. A new Xserve is booted from the Mac OS X Server v10.4 installation disc. Which password will let you connect to the Xserve remotely?

- A. the sequence of characters, "PASSWORD"
- B. the first eight characters of the Xserve serial number
- C. the first eight characters of the Xserve Ethernet MAC address
- D. the first eight characters of the Mac OS X Server software serial number

Answer: B

15. Server Admin typically sends commands to servermgrd using _____.

- A. SSH
- B. SNMP
- C. XML over HTTPS
- D. an Apple-proprietary data stream over HTTP

Answer: C
