

COG-125 Cognos 8 BI

IBM IBM Cognos 8 BI Data Warehouse Developer

Practice Exam: COG-125 Exams

Exam Number/Code: COG-125

Exam Name: IBM Cognos 8 BI Data Warehouse Developer

Questions and Answers: 84 Q&As

([Cognos 8 BI](#))

Exam : [COG-125](#)

"IBM Cognos 8 BI Data Warehouse Developer", also known as COG-125 exam, is a IBM certification. With the complete collection of questions and answers, TestInside has assembled to take you through 84 Q&As to your COG-125 Exam preparation. In the COG-125 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Quality and Value for the COG-125 Exam TestInside Practice Exams for IBM **Cognos 8 BI** Certification COG-125 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the COG-125 Exam.

COG-125 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Cognos 8 BI product experts, included the current newest COG-125 examination questions.

3. 100% Guarantee to Pass Your Cognos 8 BI exam and get your Cognos 8 BI Certification.

If you do not pass the IBM Certification COG-125 exam (IBM Cognos 8 BI Data Warehouse Developer) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside COG-125 Q&A ensure you pass the exam at your first try.

TestInside professional provide Cognos 8 BI COG-125 the newest Q&A, completely covers COG-125 test original topic. With our complete Cognos 8 BI resources, you will minimize your Cognos 8 BI cost and be ready to pass your COG-125 tests on Your First Try, 100% Money Back Guarantee included!

[IBM COG-125](#) Test belongs to one of the Cognos 8 BI certified test, if needs to obtain the Cognos 8 BI certificate, you also need to participate in other related test, the details you may visit the [Cognos 8 BI](#) certified topic, in there, you will see all related Cognos 8 BI certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about COG-125 exam

COG-125 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

COG-125 exam questions updated on regular basis

Same type as the certification exams, COG-125 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Exam : IBM COG-125

Title : IBM Cognos 8 BI Data Warehouse Developer

1. End users must be able to create Cognos 8 reports using data from the data warehouse. To facilitate this, what can the developer do from within Data Manager?

- A. Run the Create Framework Manager Model wizard to create a project.
- B. Create a Cognos 8 package in the Library area of the catalog.
- C. Export the Data Manager metadata to XML for use in Framework Manager.
- D. Publish a Cognos 8 package in the Metadata area of the catalog.

Answer: C

2. What kind of tool is Data Manager?

- A. ASP
- B. DBMS
- C. ETL
- D. ERP

Answer: C

3. A developer wants to move a selection of components from a development environment to a production environment. What should the developer do?

- A. Create a catalog backup file (.ctg).
- B. Create a backup of the catalog database.
- C. Create a package file (.pkg) that contains the components.
- D. Create a SQL script to transfer the components.

Answer: C

4. A DataStream includes two different data sources: "Golf Equipment" and "Other Equipment." For each incoming row, the developer wants to add a value that indicates the data source that the row comes from. What should the developer do?

- A. Create a static member for each data source in the underlying hierarchy.
- B. Add a literal to each data source that references the data source name.
- C. Specify the source identity property for each data source in the DataStream.
- D. Add a derivation to the transformation model to create a new column.

Answer: B

5. What can Data Manager be used for?

- A. To create a Cognos 8 content store.
- B. To extract operational data from multiple sources.
- C. To create dashboards in Report Studio.
- D. To build a Cognos Planning application.

Answer: B

6. A developer wants to create a connection to a published Framework Manager package in a Data Manager catalog. Before this connection can be created successfully, what must the developer do?

- A. Add an LDAP or NTLM namespace in Cognos Configuration.
- B. Configure Data Manager to access the Cognos 8 Gateway and Dispatcher URLs.

C. Log on to Cognos Connection as a user in the Data Manager Authors role.

D. Create a data source connection to the Cognos 8 data store.

Answer: B

7. A developer has added a data source connection to a Data Manager catalog. This connection points to a relational database. The developer wants to view the contents of this database, such as the number of tables that it contains.

What tool could the administrator use?

A. SQLTerm

B. SQLTXT Designer

C. ODBC Administrator

D. Reference Explorer

Answer: A

8. A text file contains a row at the top that only identifies the names of the columns. In order for this file to be processed successfully, what must the developer do in SQLTXT Designer?

A. Specify CR as the record delimiter.

B. Specify NL as the record delimiter.

C. Specify that the header row ignore limit is one.

D. Specify that the file contains one header line.

Answer: D

9. Which of the following is true of the Navigator?

A. When searching for components, wildcards are not supported.

B. When a component is selected, dependent components are shown.

C. Library components (such as hierarchies) cannot be navigated.

D. Components from different catalogs can be compared.

Answer: B

10. A developer wants to create a connection to a database in a Data Manager catalog. When creating this connection, which of the following must the developer specify?

A. A default schema name.

B. Connection method that must be used to connect to the database.

C. Names, locations, and port numbers for the SOAP and socket servers.

D. User ID and password for the Cognos 8 content store database.

Answer: B

11. Which of the following is true of packages in Data Manager?

A. User-defined folders cannot be exported.

B. During importing, duplicate components are automatically renamed.

C. User-defined folders cannot be imported.

D. During importing, dependent components are automatically selected.

Answer: D

12. Which object is required to create a Data Manager catalog?

A. Cognos 8 package

B. Fact build

C. JobStream

D. Database

Answer: D

13. Which of the following can a developer do with SQLTXT Designer?

A. Select data from multiple tables using joins.

B. Select data from multiple text files using joins.

C. Specify row and column delimiters.

D. Specify sort order for the flat file.

Answer: C

14. A developer has geographical data from a data source where cities roll up into states, and states roll up into regions. What should the developer create in order to allow Data Manager to aggregate fact data to the region level?

A. Derived dimension

B. Lookup

C. Static members

D. Hierarchy

Answer: D

15. What distinguishes an OLTP system from a data warehouse?

A. An OLTP system captures and processes original business transactions, while a data warehouse does not.

B. A data warehouse captures and processes original business transactions, while an OLTP system does not.

C. An OLTP system is used to transform, clean, and combine operational data, while a data warehouse is not.

D. A data warehouse is fully normalized, while an OLTP system is fully denormalized.

Answer: A
