

HP0-429 Certification III

HP Installing&Supporting Standerd HP SAN Environments

Practice Exam: HP0-429 Exams

Exam Number/Code: HP0-429

Exam Name: Installing&Supporting Standerd HP SAN Environments

Questions and Answers: 61 Q&As

([Certification III](#))

Exam : [HP0-429](#)

"Installing&Supporting Standerd HP SAN Environments", also known as HP0-429 exam, is a HP certification. With the complete collection of questions and answers, TestInside has assembled to take you through 61 Q&As to your HP0-429 Exam preparation. In the HP0-429 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Quality and Value for the HP0-429 Exam TestInside Practice Exams for HP **Certification III** Certification HP0-429 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the HP0-429 Exam.

HP0-429 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Certification III product experts, included the current newest HP0-429 examination questions.

3. 100% Guarantee to Pass Your Certification III exam and get your Certification III Certification.

If you do not pass the HP Certification HP0-429 exam (Installing&Supporting Standerd HP SAN Environments) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside HP0-429 Q&A ensure you pass the exam at your first try.

TestInside professional provide Certification III HP0-429 the newest Q&A, completely covers HP0-429 test original topic. With our complete Certification III resources, you will minimize your Certification III cost and be ready to pass your HP0-429 tests on Your First Try, 100% Money Back Guarantee included!

[HP HP0-429](#) Test belongs to one of the Certification III certified test, if needs to obtain the Certification III certificate, you also need to participate in other related test, the details you may visit the [Certification III](#) certified topic, in there, you will see all related Certification III certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about HP0-429 exam

HP0-429 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

HP0-429 exam questions updated on regular basis

Same type as the certification exams, HP0-429 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free HP0-429 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : HP HP0-429

Title : Installing & Supporting Standard HP SAN Environments

1. What is the best method to consolidate C-Series SAN islands into a common infrastructure without compromising availability, manageability and network security?

- A. Zone the SAN.
- B. Configure LSANs.
- C. Implement VSANs.
- D. Link islands with multi-protocol router.

Answer: C

2. While executing several switchShow commands on a B-Series switch, you notice that Port 0 remains a G_Port. What is a possible reason?

- A. faulty port connected
- B. faulty NL_Port connected
- C. functional N_Port connected
- D. functional E_Port connected

Answer: A

3. In the port error statistics of a Fibre Channel switch port where an HBA is connected, you discover a high ENC_IN (encoding error in frame) count. What are possible causes? (Select three.)

- A. HBA
- B. cable
- C. switch
- D. HBA receiver
- E. switch receiver
- F. HBA transmitter
- G. switch transmitter

Answer: BEF

4. Where do you find information about all working devices connected to the fabric?

- A. Name Server available from every switch
- B. Node List available on the principal switch
- C. Distributed Node Server List available on every switch
- D. configuration documentation available at the customer site

Answer: A

5. You are adding a new switch to an existing environment. How can you avoid fabric segmentation?

- A. Assign unique domain IDs to the switches.
- B. Register all domain IDs in the fabric name service.
- C. Set up trusts between switches with different domain IDs.
- D. Assign the same domain IDs to all switches connected by ISLs.

Answer: A

6. What can cause a changed hardware path to a connected disk after a switch replacement in an HP-UX environment

with multiple B-Series switches? (Select two.)

- A. Zoning on the new switch is not configured correctly.
- B. Simple Name Service is not copied to the new switch.
- C. Core switch PID format parameter differs from the old one.
- D. New switch has a domain ID which differs from the old one.
- E. Disk (storage controller port) is connected to a different switch port.

Answer: DE

7. To solve a customer problem, a remote login to a recently installed High Availability Fabric Manager appliance is required. The customer does not know the username and password. Which factory default login should be used?

- A. admin / password
- B. Administrator / password
- C. administrator / Password
- D. Administrator / Administrator

Answer: B

8. An M-series switch is reset to factory default and Open Trunking becomes inoperable. How do you solve the problem?

- A. Reboot the switch.
- B. Power cycle the switch.
- C. Reinstall the feature keys.
- D. Disconnect and reconnect the switch.

Answer: C

9. Which HP tool is recommended to manage an M-series fabric consisting of Director and Edge switches?

- A. Web Tools
- B. Fabric Manager
- C. Embedded Web Server
- D. High Availability Fabric Manager

Answer: D

10. Which M-series feature key is required to implement fabric binding and switch binding?

- A. SANtegrity
- B. Open Trunking
- C. FICON management server
- D. open systems management server

Answer: A

11. Which security mechanism describes hard zoning?

- A. login authentication
- B. access authorization
- C. network authentication
- D. discovery authorization

Answer: B

12. You add a switch to a B-series fabric. Its IP address is unknown, so you must use the serial port. Which port attributes must be configured in the terminal emulation in addition to 8 bit, no parity, 1 stop bit?

- A. 9600baud, no flow control
- B. 19200baud, no flow control
- C. 9600baud, hardware flow control
- D. 19200baud, hardware flow control

Answer: A

13. What is the maximum number of addressable ports per B-series switch running in Native Address mode?

- A. 8
- B. 16
- C. 32
- D. 64

Answer: B

14. You are replacing the active control processor card, CTP2, of an M-series Director switch. Which action is required before removing the CTP?

- A. Shut down CTP2.
- B. Make CTP2 passive.
- C. Power off the switch.
- D. Shut down the switch.

Answer: B

15. An HAFM (High Availability Fabric Manager) appliance must be shut down for maintenance reasons. Which operations are not interrupted?

- A. logging events
- B. switch monitoring
- C. Fibre Channel traffic
- D. configuration changes

Answer: C
