

## **HP0-632 Certification II HP NNM 1(7.x) Essentials**

**Practice Exam:** HP0-632 Exams

**Exam Number/Code:** HP0-632

**Exam Name:** NNM 1(7.x) Essentials

**Questions and Answers:** 162 Q&As

( [Certification II](#) )

Exam : [HP0-632](#)

"NNM 1(7.x) Essentials", also known as HP0-632 exam, is a HP certification. With the complete collection of questions and answers, TestInside has assembled to take you through 162 Q&As to your HP0-632 Exam preparation. In the HP0-632 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Quality and Value for the HP0-632 Exam TestInside Practice Exams for HP **Certification II** Certification HP0-632 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

### ***TestInside provide the professional Q&A.***

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the HP0-632 Exam.

HP0-632 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Certification II product experts, included the current newest HP0-632 examination questions.

3. 100% Guarantee to Pass Your Certification II exam and get your Certification II Certification.

If you do not pass the HP Certification HP0-632 exam (NNM 1(7.x) Essentials) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

### ***use TestInside HP0-632 Q&A ensure you pass the exam at your first try.***

TestInside professional provide Certification II HP0-632 the newest Q&A, completely covers HP0-632 test original topic. With our complete Certification II resources, you will minimize your Certification II cost and be ready to pass your HP0-632 tests on Your First Try, 100% Money Back Guarantee included!

[HP HP0-632](#) Test belongs to one of the Certification II certified test, if needs to obtain the Certification II certificate, you also need to participate in other related test, the details you may visit the [Certification II](#) certified topic, in there, you will see all related Certification II certified subject of examination.

### ***TestInside Testing Engine Features***

Comprehensive questions and answers about HP0-632 exam

HP0-632 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

HP0-632 exam questions updated on regular basis

Same type as the certification exams, HP0-632 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free HP0-632 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : HP HP0-632

Title : NNM 1 (7.x) Essentials

1. What are the options to gather the interface/node ratio? Select TWO.

- A. ovobjprint
- B. ovtodump
- C. Home Base / Discovery Status / View Topology Summary
- D. ovdwquery
- E. ovstatus

Answer: BC

2. What does a filter expression specify?

- A. symbols that may pass
- B. filters that are to be checked
- C. attributes that are to be checked
- D. sets that are to be checked

Answer: B

3. Which condition would result in FAILURE to pass the filter?

- A. The object does NOT exist.
- B. The attribute does NOT exist.
- C. The attribute value is correct.
- D. The assertion is a tautology.

Answer: B

4. Which attribute value assertion(AVA) is syntactically correct?

- A. Is IPX
- B. isRouter
- C. TopM Interface Count > 2
- D. IP Host ~ "15.\*.1.1"

Answer: B

5. You are using NNM's standard web reporting functionality in combination with your own reporting solution based on NNM's Data Warehouse. Scheduled exports of SNMP data collections into the Data Warehouse are created for that purpose. Select the appropriate action to avoid collisions between scheduled exports to the Data Warehouse and Web Report generation.

- A. Set the timeout parameter appropriately.
- B. Schedule exports as infrequently as possible.
- C. Use "post\_exec" statement instead of generation timer.
- D. Specify retry intervals randomly.

Answer: B

6. You have finished installing several connector-type network devices that only have a MAC address and would like to discover them using your management stations. What do you need to verify next?

- A. that NNM ET discovery is enabled
- B. that the Discover Level-2 Objects box under IP Discovery Polling options is checked

C. that the Don't Discover Level-2 Objects box under IP Discovery Polling options is NOT checked

D. that the Perform Topology Checks on Connector devices box under General Polling is checked

Answer: B

7. When a DHCP filter has been established, what is the effect for the specified nodes?

A. They are pinged less frequently than other nodes.

B. They are NOT stored in the topology database.

C. The management station does NOT indicate that the node is down.

D. The management station does NOT report certain MAC address events.

Answer: D

8. When writing a map filter, care must be taken to include \_\_\_\_\_.

A. networks and segments.

B. hubs, bridges, and switches.

C. networks and routers.

D. partitioned submaps.

Answer: A

9. What functionality is provided by the process syslogTrap?

A. writes NNM Unix error messages to the syslog file

B. monitors the syslog daemon

C. reviews the UNIX syslog file and converts it to OV events

D. maintains statistics about logged traps in the Data Warehouse schema

Answer: C

10. Which section must the filter file contain?

A. FilterSets

B. Filters

C. FilterExpressions

D. FilterCheck

Answer: B

11. NNM automatically detects poorly performing DNS Servers by timing DNS requests. The network administrator can improve NNM performance by modifying \_\_\_\_\_ .

A. xnmevents.conf

B. netmon.lrf

C. SnmpCollect\_DNS.arf

D. trapd.conf

E. ovet\_disco.lrf

Answer: B

12. What is the minimum supported Java Plug-in required for Microsoft Internet Explorer when used to display Dynamic Views?

A. JPI 1.3.1\_02

B. Microsoft Java Virtual Machine build 3805

C. JPI 1.4.1\_05

D. JPI 1.4.2\_01

Answer: D

13. An existing NNM Advanced Edition installation is required to support monitoring of Cisco HSRP groups. Which additional Smart Plug-in (SPI) software license needs to be purchased?

A. SPI for Advanced Routing

B. SPI for Multicast

C. SPI for LAN/WAN edge

D. SPI for MPLS

Answer: A

14. How do you configure the size of the binary event store?

A. modify trapd.conf

B. modify ov\_event.lrf

C. use xnmevents

D. use ovalarmadm

E. modify pmd.lrf

Answer: E

15. Dynamic Views in NNM 7 allow nodes to be added and deleted from the discovered topology. Which statement is true?

A. Dynamic Views now support a read-write mode.

B. These actions are secured by allowing them only to occur on a browser session launched locally on the NNM system.

C. The menu items to perform these actions are not enabled by default.

D. These actions are secured based on NNM user credentials.

Answer: D

16. NNM is able to identify an event storm. The user gets notified by the event OV\_EventStorm. Which mechanism is used to configure "Events per second" as a parameter of the event detection?

A. pmd.lrf

B. Event Configuration

C. trapd.conf

D. ECS DataStore - EventStorm.ds

Answer: A

17. Which command backs up the Extended Topology database?

A. ovbackup.ovpl

B. BackupExtTopo.ovpl

C. ovet\_backup.ovpl

D. ovet\_topodump.ovpl

Answer: A

18. NNM Advanced Edition 7 on Unix now provides a function to convert syslog messages to SNMP traps. Where is this feature documented?

A. This is an unsupported feature so no documentation exists.

B. in the Using Extended Topology manual

C. in the Syslog Integration white paper

D. in the Unix man pages

Answer: C

19. What is the supported mechanism for authorizing users in NNM7 Dynamic Views?

A. operating system based user and password

B. Java Naming and Directory Interface (JNDI)

C. Tomcat memory realms

D. ODBC realms

Answer: C

20. To clean out old trend data from the data warehouse without affecting the SNMPCollect database, the command parameter would be \_\_\_\_\_.

- A. -delpriorito
- B. -trimpriorito
- C. -exportpriorito
- D. -unloadpriorito

Answer: B
