

HP0-656 Certification II

HP DATA PROTECTOR 5.5 BASICS FOR UNIX

Practice Exam: HP0-656 Exams

Exam Number/Code: HP0-656

Exam Name: DATA PROTECTOR 5.5 BASICS FOR UNIX

Questions and Answers: 136 Q&As

([Certification II](#))

Exam : [HP0-656](#)

"DATA PROTECTOR 5.5 BASICS FOR UNIX", also known as HP0-656 exam, is a HP certification. With the complete collection of questions and answers, TestInside has assembled to take you through 136 Q&As to your HP0-656 Exam preparation. In the HP0-656 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Quality and Value for the HP0-656 Exam TestInside Practice Exams for HP **Certification II** Certification HP0-656 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the HP0-656 Exam.

HP0-656 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Certification II product experts, included the current newest HP0-656 examination questions.

3. 100% Guarantee to Pass Your Certification II exam and get your Certification II Certification.

If you do not pass the HP Certification HP0-656 exam (DATA PROTECTOR 5.5 BASICS FOR UNIX) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside HP0-656 Q&A ensure you pass the exam at your first try.

TestInside professional provide Certification II HP0-656 the newest Q&A, completely covers HP0-656 test original topic. With our complete Certification II resources, you will minimize your Certification II cost and be ready to pass your HP0-656 tests on Your First Try, 100% Money Back Guarantee included!

[HP HP0-656](#) Test belongs to one of the Certification II certified test, if needs to obtain the Certification II certificate, you also need to participate in other related test, the details you may visit the [Certification II](#) certified topic, in there, you will see all related Certification II certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about HP0-656 exam

HP0-656 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

HP0-656 exam questions updated on regular basis

Same type as the certification exams, HP0-656 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free HP0-656 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : HP HP0-656

Title : Data Protector 5.5 Basics for Windows

1. Where are file system and host backup specifications stored?

- A. /opt/omni/datalists
- B. /opt/omni/backuplists
- C. /etc/opt/omni/datalists
- D. /etc/opt/omni/barlists

Answer: C

2. What could cause an export of a tape within a library to fail?

- A. if all drives are busy
- B. if the mailslot is full
- C. if the robotics is busy
- D. if the media is protected

Answer: D

3. Which process or service runs on the Data Protector cell manager and starts backup and restore sessions?

- A. Data Protector Inet
- B. Cell Request Server (CRS)
- C. Raima Database Server (RDS)
- D. Media Management Process (MMD)

Answer: B

4. To verify the logical device configuration using the GUI; load a tape into the drive, then right-click on the created drive to display the pop-up menu. From this menu, which option do you select to verify the device operations?

- A. eject medium
- B. scan medium
- C. check media state
- D. verify tape
- E. confirm mount request

Answer: B

5. What is the full path to the Data Protector Web reporting Java applet on a UNIX Client?

- A. /opt/omni/java/sbin/WbReporting.html
- B. /etc/opt/omni/java/sbin/WebReporting.html
- C. /opt/omni/java/bin/WebReporting.html
- D. /opt/omni/bin/java/WebReporting.htm

Answer: C

6. How can you prevent multiple hosts from simultaneously attempting to utilize a device in one Data Protector cell?

- A. logical lock
- B. device lock
- C. lock names
- D. physical lock

Answer: C

7. When performing a manual configuration using the command line, you can create a new logical device by defining it in a temporary file in the devices directory. How is the Media Management database updated with this information?

- A. automatically when the device schedule is invoked
- B. with the omnidownload command
- C. with the omniupload command
- D. with the omniupdate command

Answer: C

8. What is the advantage of a Data Protector session restore?

- A. The database will not be used.
- B. It is fast since it is restoring only whole volumes.
- C. All objects from a backup can be restored together.
- D. It does not require any control as it is restoring everything.

Answer: C

9. Which file system action is required before you perform a raw disk backup?

- A. verify
- B. check
- C. mount
- D. unmount

Answer: D

10. A tape library with two drives is connected to two hosts (host A and host B) using SCSI. Each host is accessing one drive through a dedicated SCSI connection. Host B also has access to the robotics interface. Which statement is true in this configuration?

- A. This configuration is not possible in a SCSI environment because all hosts need physical access to the robotics controller.
- B. Host A will need the media agent to control the robotics and perform all library operations for the local drive.
- C. Host B will need the media agent to control the robotics and perform all library operations.
- D. Both hosts A and B will require a "direct library" configuration to allow shared network control of the robotics.

Answer: C

11. The file demo.txt in the directory tree /usr/demo was created on January 4, 2003. It was modified on January 10, 2003. A full backup took place on January 5, 2003, followed by incrementals on January 6, 7 and 8.

When using the "restore version" option within the GUI, how many versions will be displayed?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: A

12. When defining a logical tape library device, the access to a library is split into two paths. What are the paths?

Select TWO.

- A. data path
- B. SCSI path
- C. control path
- D. network path

Answer: AC

13. It is useful in dynamic environments to perform a backup that uses which object type?

- A. file system object
- B. client object

- C. disk object
- D. database object

Answer: B

14. To view a finished session that is no longer displayed in the Data Protector "Monitor" context, you must view the session in which context?

- A. View
- B. Internal Database
- C. Reporting
- D. Devices and Media

Answer: B

15. Which inode time is used to detect files for incremental backups?

- A. access time
- B. creation time
- C. modification time
- D. defragmentation time

Answer: C

16. What happens if the backup chain is broken and you start a restore?

- A. The restore aborts.
- B. A warning message displays.
- C. Only the full backup is restored.
- D. It is not possible to browse the restore GUI.

Answer: B

17. How many disk agents are started if you perform a parallel restore?

- A. one for each disk
- B. one for each tape
- C. one for each client
- D. one for each object

Answer: D

18. When using the Restore from Media option, which configuration guideline should you consider regarding the required memory?

- A. number_of_files multiplied by 100 bytes
- B. number_of_files multiplied by 200 bytes
- C. number_of_directories multiplied by 100 bytes
- D. number_of_directories multiplied by 200 bytes

Answer: B

19. How is a disk image restore performed?

- A. file-by-file
- B. object-by-object
- C. block-by-block
- D. directory-by-directory

Answer: C

20. The object option "Display Statistics" is turned on in the GUI while configuring and running a backup. What does it show in addition to standard messaging?

- A. kilobytes per second for each object
- B. object detail retained for a specific date
- C. three levels of detail on files and directories

D. the number of files handled during a backup session

Answer: A
