

HP0-Y13 Certification I

HP ProCurve Network Management

Practice Exam: HP0-Y13 Exams

Exam Number/Code: HP0-Y13

Exam Name: ProCurve Network Management

Questions and Answers: 128 Q&As

([Certification I](#))

Exam : [HP0-Y13](#)

"ProCurve Network Management", also known as HP0-Y13 exam, is a HP certification. With the complete collection of questions and answers, TestInside has assembled to take you through 128 Q&As to your HP0-Y13 Exam preparation. In the HP0-Y13 exam resources, you will cover every field and category in HP Certification helping to ready you for your successful HP Certification.

Quality and Value for the HP0-Y13 Exam TestInside Practice Exams for HP **Certification I** Certification HP0-Y13 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the HP0-Y13 Exam.

HP0-Y13 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Certification I product experts, included the current newest HP0-Y13 examination questions.

3. 100% Guarantee to Pass Your Certification I exam and get your Certification I Certification.

If you do not pass the HP Certification HP0-Y13 exam (ProCurve Network Management) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside HP0-Y13 Q&A ensure you pass the exam at your first try.

TestInside professional provide Certification I HP0-Y13 the newest Q&A, completely covers HP0-Y13 test original topic. With our complete Certification I resources, you will minimize your Certification I cost and be ready to pass your HP0-Y13 tests on Your First Try, 100% Money Back Guarantee included!

[HP HP0-Y13](#) Test belongs to one of the Certification I certified test, if needs to obtain the Certification I certificate, you also need to participate in other related test, the details you may visit the [Certification I](#) certified topic, in there, you will see all related Certification I certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about HP0-Y13 exam

HP0-Y13 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

HP0-Y13 exam questions updated on regular basis

Same type as the certification exams, HP0-Y13 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free HP0-Y13 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : HP HP0-Y13

Title : ProCurve Network Management

1. Which features are only available in PCM+? (Select three.)

- A.Events browser
- B.custom device groups
- C.configuration templates
- D.sFlow traffic monitoring
- E.Configurable Integration Platform

Answer: CDE

2. Which statement is true about licensing options for PCM+ and its supported plug-ins?

- A.Identity Driven Manager licensing is based on the number of users managed.
- B.Mobility Manager licensing is based on the number of wireless clients managed.
- C.ProCurve Manager Plus licensing is based on the number of installed instances.
- D.Network Immunity Manager licensing is based on the number of NAC 800s managed.

Answer: A

3. What is required to use the automatic product registration feature in PCM?

- A.The devices to be registered must support SSH.
- B.The devices must be based on the ProVision ASIC hardware.
- C.The username and password of a My ProCurve account must be provided.
- D.The devices must be specified using an IP address range or domain name prefix.

Answer: C

4. Which attributes can be referenced in an IDM Access Rule to determine the Access Profile that will apply? (Select two.)

- A.username
- B.IP address
- C.WLAN SSID
- D.operating system
- E.endpoint integrity status

Answer: CE

5. Which statement is true about licensing options for PCM+ and its supported plug-ins?

- A.PCM+ licensing is based on the number of devices managed.
- B.Identity Driven Manager licensing is based on the number of devices managed.
- C.Mobility Manager licensing is based on the number of wireless clients managed.
- D.Network Immunity Manager licensing is based on the number of installed instances.

Answer: A

6. Which statements are true about events processing in PCM? (Select two.)

- A.Events from managed devices appear as SNMP traps.
- B.Events can originate from PCM application components.
- C.PCM+ is required to manage and archive events from managed devices.
- D.A trap policy must be configured for events to be accepted from devices in a custom group.

E. By default, when a device is discovered it is registered as a trap sender in the PCM access.txt file.

Answer: AB

7. Which product integrated with PCM+ can dynamically assign an ACL to a switch port?

- A. Mobility Manager
- B. Identity Driven Manager
- C. Network Node Manager
- D. Network Access Controller

Answer: B

8. Where is the information stored that is displayed in the Events browser?

- A. Alarms Log
- B. Events Table
- C. Device Syslog
- D. Alerts Database

Answer: B

9. Which statement is true about the PCM client architecture?

- A. The client can be installed on Windows, Linux, and Macintosh computers.
- B. The client can be installed on several types of computers without requiring a license.
- C. The client performs network data collection and stores the data on the management server.
- D. The client installation is initiated using a browser and connecting to port 443 of the management server.

Answer: B

10. Which features are only available in PCM+? (Select two.)

- A. node-to-node path trace tool
- B. VLAN network topology views
- C. device discovery using LLDP/MED
- D. switch-to-switch consistency checking
- E. device access through web and CLI interfaces

Answer: AD

11. Which statement is true about PCM or PCM+?

- A. PCM+ is supported on Linux in addition to Windows.
- B. PCM is included at no cost with all ProCurve manageable devices.
- C. PCM is implemented as a Microsoft Management Console snap-in on Windows.
- D. PCM+ is intended as a complete replacement for the switch CLI and web management interfaces.

Answer: B

12. Which products are supported as plug-ins for PCM+? (Select two.)

- A. Events Manager
- B. Identity Driven Manager
- C. Network Immunity Manager
- D. Device Configuration Manager
- E. Vulnerability Database Manager

Answer: BC

13. Which product integrated with PCM+ uses Network Behavior Anomaly Detection to detect attacks?

- A. Mobility Manager
- B. Identity Driven Manager
- C. Network Access Controller
- D. Network Immunity Manager
- E. HP OpenView Network Manager

Answer: D

14. Which capability does PCM+ support for managing ProCurve device software updates?

- A.The PCM+ management server can periodically download a software versions list to determine if updates are available.
- B.ProCurve switches that support the PCM+ Policy Manager can be scheduled to check the ProCurve download FTP site directly.
- C.Software image files can be downloaded directly to a USB drive on switches that support them and scheduled for installation at a later time.
- D.Checking for software updates to PCM+ and its plug-ins includes retrieving any available software updates for currently discovered devices.

Answer: A

15. Which products are supported as plug-ins to PCM+? (Select two.)

- A.Policy Manager
- B.Mobility Manager
- C.Traffic Analysis Manager
- D.Secure Access Manager
- E.Network Immunity Manager

Answer: BE

16. How can PCM discovery be customized to meet network operation preferences? (Select two.)

- A.Each phase can be configured to run at a different interval.
- B.A device can be permanently excluded from future discovery processing.
- C.It can be automatically restarted when a threshold number of devices become unreachable.
- D.A sleep timer can be applied when a high traffic volume level is detected on selected VLANs.
- E.Devices exhibiting periodic network disconnects can be monitored using a customized ping schedule.

Answer: AB

17. Which modifications can you make to PCM using the CIP? (Select three.)

- A.modify the color scheme used for PCM windows
- B.add a right-click menu to the Devices List window
- C.add a tab to the Network Management Home page
- D.display third-party SNMP traps in the Events browser
- E.add an authentication method for PCM management users

Answer: BCD

18. Which type of information does the Configuration Manager allow you to export for a previously discovered device?

- A.system performance statistics
- B.authentication status of 802.1X ports
- C.software version and boot ROM version
- D.percentage of ports connected during a time period

Answer: C

19. Which statements are true about the PCM architecture? (Select two.)

- A.PCM uses its own Java instance.
- B.The PCM client is a web-based interface that supports SSL.
- C.The PCM datastore is implemented as a set of indexed flat files.
- D.The PCM management server is comprised of three Windows services.
- E.The PCM client collects network management information and stores it on the PCM management server.

Answer: AD

20. Which secure network management features are available in PCM+? (Select three.)

- A.SSH switch access
- B.SNMPv3 switch access
- C.IPSec VPN tunnel to PCM+
- D.SSL web interface to PCM+
- E.RADIUS authentication of PCM+ administrators

Answer: ABE
