

JN0-400 JNCIA

Juniper Networks EX, Associate (JNCIA-EX)

Practice Exam: JN0-400 Exams

Exam Number/Code: JN0-400

Exam Name: EX, Associate (JNCIA-EX)

Questions and Answers: 104 Q&As

([JNCIA](#))

Exam : [JN0-400](#)

"EX, Associate (JNCIA-EX)", also known as JN0-400 exam, is a Juniper Networks certification. With the complete collection of questions and answers, TestInside has assembled to take you through 104 Q&As to your JN0-400 Exam preparation. In the JN0-400 exam resources, you will cover every field and category in Juniper Networks Certification helping to ready you for your successful Juniper Networks Certification.

Quality and Value for the JN0-400 Exam TestInside Practice Exams for Juniper Networks **JNCIA** Certification JN0-400 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the JN0-400 Exam.

JN0-400 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the JNCIA product experts, included the current newest JN0-400 examination questions.

3. 100% Guarantee to Pass Your JNCIA exam and get your JNCIA Certification.

If you do not pass the Juniper Networks Certification JN0-400 exam (EX, Associate (JNCIA-EX)) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside JN0-400 Q&A ensure you pass the exam at your first try.

TestInside professional provide JNCIA JN0-400 the newest Q&A, completely covers JN0-400 test original topic. With our complete JNCIA resources, you will minimize your JNCIA cost and be ready to pass your JN0-400 tests on Your First Try, 100% Money Back Guarantee included!

[Juniper Networks JN0-400](#) Test belongs to one of the JNCIA certified test, if needs to obtain the JNCIA certificate, you also need to participate in other related test, the details you may visit the [JNCIA](#) certified topic, in there, you will see all related JNCIA certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about JN0-400 exam

JN0-400 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

JN0-400 exam questions updated on regular basis

Same type as the certification exams, JN0-400 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free JN0-400 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Juniper JN0-400

Title : EX, Associate (JNCIA-EX)

1. Which two statements describe the EX 4200 switches? (Choose two.)

- A. The fan tray used for the EX 4200 switches is not field replaceable.
- B. The EX 4200 switches can be interconnected to form a single virtual chassis.
- C. The EX 4200 switches support redundant load-sharing AC power supplies.
- D. All EX 4200 switches support either partial or full Power over Ethernet (PoE) support.

Answer: BC

2. You are configuring the voice VLAN feature on an EX-series switch on interface ge-0/0/5.

Which configuration would you use?

- A.

```
ethernet-switching-options { voice-vlan { interface ge-0/0/5.0 { vlan voice-over-ip; forwarding-class expedited-forwarding; } }}
```
- B.

```
ethernet-switching-options { voip { interface ge-0/0/5.0 { member-vlan voice-over-ip; forwarding-class expedited-forwarding; } }}
```
- C.

```
ethernet-switching-options { voip { interface ge-0/0/5.0 { vlan voice-over-ip; forwarding-class expedited-forwarding; } }}
```
- D.

```
ethernet-switching-options { voice-vlan { interface ge-0/0/5.0 { member-vlan voice-over-ip; forwarding-class expedited-forwarding; } }}
```

Answer: C

3. Which two statements are true regarding the Virtual Router Redundancy Protocol (VRRP)? (Choose two.)

- A. The routers participating in VRRP elect a master router by choosing the router with the lowest priority.
- B. The routers participating in VRRP all use the same virtual MAC address for a particular virtual IP address.
- C. The routers participating in VRRP must share a common group ID to provide redundancy for the virtual IP addresses defined under that group.
- D. The routers participating in VRRP always elect a common master on a network segment, rather than one master for each VRRP group configured on a network segment.

Answer: BC

4. An EX-series switch has two routes for the same prefix: one that it received through OSPF and one that is a static route.

How will the switch choose a route to use for this prefix?

- A. The switch will compare metrics and use the route with the lowest metric.
- B. The switch will compare metrics and use the route with the highest metric.
- C. The switch will compare route preferences and use the route with the highest route preference.
- D. The switch will compare route preferences and use the route with the lowest route preference.

Answer: D

5. You want to configure Layer 3 routing between two VLANs on a single EX-series switch.

In which configuration hierarchy would you configure the IP addresses for each VLAN?

- A. [edit vlans]
- B. [edit family inet]
- C. [edit interfaces vlan]
- D. [edit routing-options]

Answer: C

- C.set interfaces vlan unit 2 family inet address 10.10.10.1/24
- D.set interfaces ge-0/0/1 unit 0 family inet address 10.10.10.1/24

Answer: C

10. Which statement regarding packet flow through an EX-series switch is correct?

- A.Transit packets are processed by the Routing Engine.
- B.The destination MAC address determines which lookup table is used.
- C.The Routing Engine is consulted when processing both transit and host packets.
- D.Routing protocol control packets are processed only by the Packet Forwarding Engine.

Answer: B

11. What are two features of JUNOS software? (Choose two.)

- A.JUNOS facilitates separate control and forwarding planes.
- B.All processes use shared memory to make efficient use of available resources.
- C.The functionality of JUNOS is made possible through multiple processes that are dependant on each other.
- D.All processes run in their own protected memory space to prevent against complete system failure when a single process fails.

Answer: AD

12. On an EX-series switch, what information is gathered when building a bridge table? (Choose two.)

- A.interface
- B.IP address
- C.MAC address
- D.authentication information

Answer: AC

13. Which two statements are true about route preferences? (Choose two.)

- A.Lower route preferences are more preferred.
- B.Higher route preferences are more preferred.
- C.Direct and local routes always have the best route preference.
- D.Static routes are always more preferred than routes from dynamic routing protocols.

Answer: AC

14. You want to configure a static default route to the gateway 10.1.1.1.

Which set command will accomplish this task?

- A.set routes static route 0.0.0.0/0 gateway 10.1.1.1
- B.set protocols static route 0.0.0.0/0 next-hop 10.1.1.1
- C.set family inet static route 0.0.0.0/0 next-hop 10.1.1.1
- D.set routing-options static route 0.0.0.0/0 next-hop 10.1.1.1

Answer: D

15. Which two statements regarding packet flow through an EX-series switch are correct? (Choose two.)

- A.Transit packets are processed by the Routing Engine.
- B.The destination MAC address determines which lookup table is used.
- C.If the egress port belongs to the ingress Packet Forwarding Engine, the packet is switched locally.
- D.If the egress port belongs to a remote Packet Forwarding Engine, the Routing Engine is consulted prior to forwarding the packet.

Answer: BC

16. Which two are included in the EZsetup configuration for EX-series switches? (Choose two.)

- A.Configure syslog servers.
- B.Configure routing protocols.
- C.Configure root authentication.

D. Configure me0 management Ethernet port.

Answer: CD

17. Click the Exhibit button.

Why will the configurations in the exhibit fail to provide gateway redundancy between Switch-1 and Switch-2?

3 Switch-1:

```
interfaces {
  ge-0/0/3 {
    unit 0 {
      family inet {
        address 10.1.1.2/24 {
          vrrp-group 100 {
            virtual-address 10.1.1.1;
            priority 110;
          }
        }
      }
    }
  }
}
```

Switch-2:

```
interfaces {
  vlan {
    unit 100 {
      family inet {
        address 10.1.1.3/24 {
          vrrp-group 200 {
            virtual-address 10.1.1.1;
            priority 90;
          }
        }
      }
    }
  }
}
```

A. The IP addresses do not match.

B. The group numbers do not match.

C. The priority numbers do not match.

D. VRRP is not supported between a physical interface and a VLAN interface.

Answer: B

18. Which three functions are performed in the control plane? (Choose three.)

A. protocol updates

B. packet forwarding

C. system management

D. service implementation

E. forwarding table maintenance

Answer: ACE

19. What are two components of the JUNOS software architecture? (Choose two.)

A. multiple software processes

B. separation of control and forwarding planes

C. shared memory environment for all processes

D. efficient processing of all packets through the control plane

Answer: AB

20. Within a virtual chassis, which type of switch maintains the forwarding table?

- A.line card
- B.master switch
- C.routing switch
- D.forwarding switch

Answer: B
