

N10-004 Network+ CompTIA CompTIA Network+ (2009 Edition)

Practice Exam: N10-004 Exams

Exam Number/Code: N10-004

Exam Name: CompTIA Network+ (2009 Edition)

Questions and Answers: 589 Q&As

([Network+](#))

Exam : [N10-004](#)

"CompTIA Network+ (2009 Edition)", also known as N10-004 exam, is a CompTIA certification. With the complete collection of questions and answers, TestInside has assembled to take you through 589 Q&As to your N10-004 Exam preparation. In the N10-004 exam resources, you will cover every field and category in CompTIA Certification helping to ready you for your successful CompTIA Certification.

Quality and Value for the N10-004 Exam TestInside Practice Exams for CompTIA **Network+** Certification N10-004 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the N10-004 Exam.

N10-004 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Network+ product experts, included the current newest N10-004 examination questions.

3. 100% Guarantee to Pass Your Network+ exam and get your Network+ Certification.

If you do not pass the CompTIA Certification N10-004 exam (CompTIA Network+ (2009 Edition)) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside N10-004 Q&A ensure you pass the exam at your first try.

TestInside professional provide Network+ N10-004 the newest Q&A, completely covers N10-004 test original topic. With our complete Network+ resources, you will minimize your Network+ cost and be ready to pass your N10-004 tests on Your First Try, 100% Money Back Guarantee included!

[CompTIA N10-004](#) Test belongs to one of the Network+ certified test, if needs to obtain the Network+ certificate, you also need to participate in other related test, the details you may visit the [Network+](#) certified topic, in there, you will see all related Network+ certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about N10-004 exam

N10-004 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

N10-004 exam questions updated on regular basis

Same type as the certification exams, N10-004 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free N10-004 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : CompTIA N10-004

Title : CompTIA Network+

(2009 Edition)

1. Click on the exhibit button. Which of the following is the 568B connection standard?

- A. One
- B. Two
- C. Three
- D. Four

Answer: D

2. Click on the Exhibit button. According to the diagram, which of the following is the correct path for PC1 to request an IP address?

- A. Switch B to switch A to switch C
- B. Switch B to switch C
- C. Switch B to switch A to router
- D. Switch B to switch A

Answer: D

3. Click on the Exhibit button. In the diagram, which of the following would be the MOST effective location for a firewall?

- A. Between switch A and switch B
- B. Between the DHCP and switch A
- C. Between server 1 and switch A
- D. Between the modem and the router

Answer: D

4. Data encryption and decryption occurs at which layer of the OSI model?

- A. Transport
- B. Presentation
- C. Session
- D. Application

Answer: B

5. Click on the Exhibit button. According to the diagram, which of the following is the correct path for PC7 to print a document?

- A. Switch C to switch A
- B. Switch C to switch A to switch B
- C. Switch C to switch A to the router
- D. Switch B to the router

Answer: A

6. Which of the following is resistant to crosstalk?

- A. 1000Base-T
- B. 10GBase-CX
- C. 100Base-FX

D. STP

Answer: C

7. Click on the Exhibit button. In the diagram, which of the following would be a single point of failure with the highest impact to systems?

- A. Connection between switch A and switch B failing
- B. Connection between the router and switch A failing
- C. Switch A failing
- D. Router failing

Answer: C

8. Click on the Exhibit button. A company is hardening its network security and has asked its network administrator to implement an IDS. Which of the following locations on the diagram should the IDS be between?

- A. The router and switch A
- B. The modem and the router
- C. Switch A and switch B
- D. The outside network and the modem

Answer: A

9. Click on the Exhibit button. In the environment represented by the diagram, PC1, PC2, PC3, and PC4 are unable to print to the network printer. PC5 is able to print properly. Which of the following would cause this problem?

- A. The cable between switch B and A is faulty.
- B. The cable between switch A and the printer is faulty.
- C. The DHCP has not assigned a working IP address to the printer.
- D. Power to switch A has failed.

Answer: A

10. Click on the exhibit button. Which of the following graphic is a bus network topology?

- A. Graphic A
- B. Graphic B
- C. Graphic C
- D. Graphic D

Answer: A

11. Click on the Exhibit button. In the environment represented by the diagram, a technician is asked to temporarily connect three printers to the network. They are to be placed physically next to the existing network printer. The technician needs to install a new switch to connect these printers because all ports are taken on the network. Which of the following locations on the network would be the BEST place for the additional switch to be placed?

- A. Between the DHCP and switch A
- B. Between the existing printer and switch A
- C. Between switch A and switch B
- D. Between switch A and switch C

Answer: B

12. Click on the exhibit button. Which of the following graphic offers the highest availability network?

- A. Graphic A
- B. Graphic B
- C. Graphic C
- D. Graphic D

Answer: D

13. Click on the Exhibit button. In the environment represented by the diagram, PC1 is unable to ping server 2, or PC7. Which of the following would MOST likely cause the issues?

- A. The cable between PC7 and switch A has failed.
- B. Switch C has failed.
- C. The cable between the server and switch A has failed.
- D. Switch A has failed.

Answer: D

14. Click on the exhibit button. Which of the following graphic is a star network topology?

- A. Graphic A
- B. Graphic B
- C. Graphic C
- D. Graphic D

Answer: C

15. Click on the Exhibit button. According to the diagram, server 3 is hosting DHCP. PC1 fails to get an address, but PC2 can. Which of the following components of the network has MOST likely failed?

- A. Cable 5
- B. Switch A
- C. Cable 4
- D. Switch B

Answer: A

16. Which of the following ports is commonly used to remotely administer a router?

- A. 23
- B. 25
- C. 53
- D. 161

Answer: A

17. Click on the exhibit button. Which of the following combined makes a crossover cable?

- A. 2 and 3
- B. 2 and 4
- C. 1 and 3
- D. 1 and 4

Answer: B

18. Click on the exhibit button. Which of the following is the 568A connection standard?

- A. One
- B. Two
- C. Three
- D. Four

Answer: B

19. Which of the following protocols would a multilayer switch use to learn the IP address of a directly connected device?

- A. ARP
- B. BOOTP
- C. DHCP
- D. DNS

Answer: A

20. UDP operates at which layer of the OSI model?

- A. Session layer
- B. Application layer

C. Transport layer

D. Physical layer

Answer: C
