### **Network Appliance Network Appliance Data Protection Exam 7G**

**Practice Exam:** NS0-131 Exams

**Exam Number/Code:** NS0-131

**Exam Name:** Network Appliance Data Protection Exam 7G

**Questions and Answers:** 117 Q&As

( [NACP](#) )

Exam : [NS0-131](#)

"Network Appliance Data Protection Exam 7G", also known as NS0-131 exam, is a Network Appliance certification. With the complete collection of questions and answers, TestInside has assembled to take you through 117 Q&As to your NS0-131 Exam preparation. In the NS0-131 exam resources, you will cover every field and category in Network Appliance Certification helping to ready you for your successful Network Appliance Certification.

Quality and Value for the NS0-131 Exam TestInside Practice Exams for Network Appliance **NACP** Certification NS0-131 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

#### **TestInside provide the professional Q&A.**

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the NS0-131 Exam.

NS0-131 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the NACP product experts, included the current newest NS0-131 examination questions.

3. 100% Guarantee to Pass Your NACP exam and get your NACP Certification.

If you do not pass the Network Appliance Certification NS0-131 exam (Network Appliance Data Protection Exam 7G) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

#### **use TestInside NS0-131 Q&A ensure you pass the exam at your first try.**

TestInside professional provide NACP NS0-131 the newest Q&A, completely covers NS0-131 test original topic. With our complete NACP resources, you will minimize your NACP cost and be ready to pass your NS0-131 tests on Your First Try, 100% Money Back Guarantee included!

[Network Appliance NS0-131](#) Test belongs to one of the NACP certified test, if needs to obtain the NACP certificate, you also need to participate in other related test, the details you may visit the [NACP](#) certified topic, in there, you will see all related NACP certified subject of examination.

#### **TestInside Testing Engine Features**

Comprehensive questions and answers about NS0-131 exam

NS0-131 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

NS0-131 exam questions updated on regular basis

Same type as the certification exams, NS0-131 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free NS0-131 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Network Appliance NS0-131

Title : Network Appliance Data Protection Exam 7G

1. Where the qtrees are located, the SnapVault secondary system makes a snapshot of its own volume. Choose whether this statement is true or false.

- A. True
- B. False

Answer: A

2. You must execute from the primary to secondary storage system, for each Open Systems platform directory to be backed up to the SnapVault secondary storage system.

- A. a scheduled update copy
- B. an initial baseline copy
- C. a temporary copy
- D. an incremental copy

Answer: B

3. After you use SnapRestore to revert a volume to a specific snapshot \_\_\_\_\_ . Choose the correct answer below.

- A. you must bring the volume back online.
- B. snapshots that are older than the snapshot you used to revert are deleted.
- C. snapshots that are more recent than the snapshot you used to revert are deleted.
- D. the storage appliance automatically performs a snapshot for that volume.

Answer: C

4. Choose one of the following statements that does not apply to SnapLock Compliance volumes.

- A. The volume supports the "trusted administrator" mode of operation.
- B. Administrative interfaces are restricted to protect WORM data.
- C. The volume has the capacity to download indexes and records.
- D. The volume type is set when the volume is created.

Answer: B

5. Choose one of the following steps which is not required for DFM setup on the storage appliance.

- A. Grant NDMP access with the options `ndmpd.access <dfm-host>` command.
- B. Enable SnapVault with the options `snapvault.enable` on command.
- C. Enable NDMP with the options `ndmpd.enable` on command.
- D. Enable DFM with the license add `<dfm-code>` command.

Answer: D

6. Choose from the following statements which one is not true when scheduling DFM backups.

- A. The schedule dictates when transfers occur.
- B. DFM is a single point of failure.
- C. The schedule dictates which snapshot to back up.
- D. Retention policy dictates how long to keep each snapshot.

Answer: C

7. Choose one of the following which is not a replication pre-requisite, when you are setting up SnapMirror?
- A. If you are replicating a volume, you must create a restricted volume to be used as the SnapMirror destination volume.
  - B. SnapMirror must be licensed for each storage appliance.
  - C. The source volume must be offline.
  - D. The capacity of the SnapMirror destination must be greater than or equal to the capacity of the source.

Answer: C

8. Choose from the following which entry in the /etc/snapmirror.conf file would allow you to replicate /vol/flexvol0 on netapp1 (source) to /vol/flexvol2 on netapp2 (destination).

- A. netapp1:flexvol0 netapp1:flexvol2 - \* \* \* \*
- B. netapp2:flexvol2 netapp2:flexvol0 - \* \* \* \*
- C. netapp1:flexvol0 netapp2:flexvol2 - \* \* \* \*
- D. netapp2:flexvol0 netapp1:flexvol0 - \* \* \* \*

Answer: C

9. Choose the correct answer for the following statement by filling in the blank space:

You must specify a authorized through that application, to manage a SnapVault backup through a commercial NDMP application.

- A. directory path
- B. user and password
- C. volume and qtree
- D. SnapVault license

Answer: B

10. In order to add primary directory relationship with the "Add Backup" option on the DFM GUI, you are unable to do this. Choose three of the following conditions which might be the cause of this failure.

- A. Secondary volume is out of space.
- B. Path name contains /vol prefix.
- C. Secondary volume is out of inodes.
- D. Secondary path is a qtree.

Answer: A,B,C

11. Up to snapshots concurrently can a volume contain.

- A. 125
- B. 225
- C. Depends on capacity and number of disk drives
- D. 255

Answer: D

12. Choose which one of the following is not recommended as a secondary system for SnapVault.

- A. F880
- B. NearStore R200
- C. F700 series
- D. FAS900 series

Answer: C

13. Choose one of the following which you would use to change the NDMP password on the Open System SnapVault agent.

- A. svpassword <newpassword>
- B. password <newpassword>
- C. svpasswd

D. password

Answer: A

14. Choose one of the following settings which can improve the performance of synchronous SnapMirror.

A. snap reserve

B. cksum

C. visibilityinterval

D. outstanding

Answer: D

15. To assist in starting or stopping SnapVault, choose which tool is available on a non-NetApp primary system, modifying NDMP settings, enabling debugging, and capturing trace files.

A. None of the above

B. Data Fabric Manager

C. svdebug.exe

D. Svconfigurator GUI

Answer: D

16. Newer snapshots after the baseline will be deleted at the destination. This is one of the results of the snapmirror resync command. Older snapshots before the baseline will be deleted at the source. Is this true or false?

A. False

B. True

Answer: B

17. Choose one of the following commands which allows you to check the size of the source and destination volumes, when you create a restricted volume to be used as the destination for SnapMirror data replication.

A. df

B. vol mirror -v

C. vol status

D. sysconfig -v

Answer: C

18. Choose from the following the user-controllable security mechanism which is built into OSSV.

A. QSM access list modifiable via svconfigurator

B. MD5 based authentication between SnapVault primary and secondary, with changeable password

C. Contents inside a file called access and located in OSSV <installdir>/snapvault/etc

D. Via /etc/hosts.equiv file

Answer: A

19. Choose two of the following NetApp storage appliances which do not support the use of synchronous SnapMirror.

A. FAS960

B. F87

C. F820

D. F825

Answer: B,C

20. Choose one of the following keywords which alone can be used to convert an asynchronous mirror to be synchronous.

A. srccon

B. outstanding

C. cksum

D. sync

Answer: D
