

NS0-510 NCIE

Network Appliance NCIE - Backup & Recovery Implementation Engineer Exam

Practice Exam: NS0-510 Exams

Exam Number/Code: NS0-510

Exam Name: NCIE - Backup & Recovery Implementation Engineer Exam

Questions and Answers: 102 Q&As

([NCIE](#))

Exam : [NS0-510](#)

"NCIE - Backup & Recovery Implementation Engineer Exam", also known as NS0-510 exam, is a Network Appliance certification. With the complete collection of questions and answers, TestInside has assembled to take you through 102 Q&As to your NS0-510 Exam preparation. In the NS0-510 exam resources, you will cover every field and category in Network Appliance Certification helping to ready you for your successful Network Appliance Certification.

Quality and Value for the NS0-510 Exam TestInside Practice Exams for Network Appliance **NCIE** Certification NS0-510 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the NS0-510 Exam.

NS0-510 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the NCIE product experts, included the current newest NS0-510 examination questions.

3. 100% Guarantee to Pass Your NCIE exam and get your NCIE Certification.

If you do not pass the Network Appliance Certification NS0-510 exam (NCIE - Backup & Recovery Implementation Engineer Exam) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside NS0-510 Q&A ensure you pass the exam at your first try.

TestInside professional provide NCIE NS0-510 the newest Q&A, completely covers NS0-510 test original topic. With our complete NCIE resources, you will minimize your NCIE cost and be ready to pass your NS0-510 tests on Your First Try, 100% Money Back Guarantee included!

[Network Appliance NS0-510](#) Test belongs to one of the NCIE certified test, if needs to obtain the NCIE certificate, you also need to participate in other related test, the details you may visit the [NCIE](#) certified topic, in there, you will see all related NCIE certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about NS0-510 exam

NS0-510 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

NS0-510 exam questions updated on regular basis

Same type as the certification exams, NS0-510 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free NS0-510 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Network Appliance NS0-510

Title : NCIE-Backup & Recovery Implementation Engineer Exam

1. In which two situations is Snapshot the preferred strategy for backup and recovery? (Choose two.)

- A. when file systems or raw partitions consist of a single LUN
- B. when file systems span multiple LUNs via Volume Manager Enterprise or a similar product
- C. when selective restoration of files within the LUN is a requirement
- D. when offloading the majority of backup overhead from the host system is a requirement

Answer: AD

2. SnapVault supports a multi-vendor storage infrastructure environment.

- A. True
- B. False

Answer: B

3. When a SnapVault Secondary requests an incremental backup from the primary, the SnapVault Primary creates a new snapshot and compares it to the most recent ONTAP-scheduled snapshot in order to identify the changed data blocks.

- A. True
- B. False

Answer: B

4. What are three NetApp backup and recovery solutions based on Snapshot technology? (Choose three.)

- A. SnapVault
- B. OSSV
- C. VTL
- D. SnapManager products

Answer: ABD

5. A-SIS optimization can be configured at _____.

- A. the volume level only
- B. the aggregate level only
- C. both the aggregate and volume levels
- D. the qtree level

Answer: A

6. What are two applications that can manage Open Systems SnapVault-based backup environments via NDMP? (Choose two.)

- A. NetApp Protection Manager
- B. Legato Networker
- C. Symantec NetBackup
- D. Syncsort Backup Express

Answer: AD

7. What is RTO?

- A. the amount of time that an organization will NOT have access to lost data while the data is being recovered
- B. the amount of time that an organization will take to recover their data
- C. the time-out period for remote device access
- D. the recorded time of the data outage

Answer: A

8. Tape backups are widely used because they are considered the most secure form of media backup.

- A. True
- B. False

Answer: B

9. Which two events occur when a volume with qtrees is backed up using SnapVault from Primary to Secondary? (Choose two.)

- A. Qtrees in Primary are stored as qtrees on Secondary.
- B. Qtrees in Primary are stored as directories on Secondary.
- C. Restores of original volume from Secondary to Primary are done as a qtree.
- D. Restores of original volume from Secondary to Primary are done as a volume.

Answer: BC

10. From which three platforms does Open Systems SnapVault support backup and restore? (Choose three.)

- A. IBM AIX
- B. SunOS
- C. HP HP-UX
- D. Linux
- E. Windows NT, Windows 2000, and Windows Server 2003
- F. SGI IRIX

Answer: ACD

11. Which two NetApp products support heterogeneous storage environments? (Choose two.)

- A. NearStore VTL
- B. SnapVault
- C. OSSV
- D. StoreVault

Answer: AC

12. SnapVault is a disk-based backup solution that _____. (Choose three.)

- A. enables backup of heterogeneous primary storage systems to a NetApp secondary storage system
- B. enables restoration of data from a SnapVault secondary storage system, with minimum downtime and better reliability than tape-based backup and restore
- C. requires both NetApp primary and secondary storage systems
- D. enables data stored on multiple NetApp storage systems to be backed up to a central secondary system as read-only Snapshot copies

Answer: BCD

13. Which two technologies serve as the basis for SnapVault-based backups? (Choose two.)

- A. QSM
- B. VSM
- C. SyncMirror
- D. Snapshot

Answer: AD

14. Without the nearstore_option license installed, what are the total concurrent SnapVault transfer streams for the FAS3020/3050?

- A. 16 for FC drives and 8 for SATA drives
- B. 8 for FC drives and 16 for SATA drives
- C. 32 for FC drives and 16 for SATA drives
- D. 16 for FC drives and 32 for SATA drives

Answer: A

15. The SnapVault Secondary is configured for user access of qtrees via NAS. How do you restore a file?

- A. by using SnapRestore
- B. by using the SnapVault GUI
- C. by users with sufficient privileges
- D. by only storage administrators with sufficient privileges

Answer: C

16. What are three components of an Open Systems SnapVault (OSSV) installation? (Choose three.)

- A. Primary System
- B. Secondary System
- C. OSSV agent installed on the primary system
- D. OSSV agent installed on the secondary system
- E. NetApp primary system

Answer: ABC

17. SnapVault allows data to be _____.

- A. centralized for enterprise-wide data management and allows backup applications to control native backup and recovery facilities in NetApp storage systems
- B. recovered from a corrupted database, application, or damaged file system in less than a minute, regardless of the size of the volume being restored
- C. backed up via Snapshot and transferred on a scheduled basis to a destination NearStore appliance
- D. virtualized and tightly integrated with Microsoft NTFS, providing a layer of abstraction between application data and its physical storage

Answer: C

18. What is the maximum number of concurrent A-SIS sessions on a NetApp controller?

- A. 2
- B. 4
- C. 8
- D. 16

Answer: C

19. The NearStore VTL provides a masking function to control Host access to virtual devices.

- A. True
- B. False

Answer: A

20. Which NetApp backup and recovery solution is best for backing up remote office heterogeneous data storage?

- A. Snapshot copies
- B. SnapManager
- C. SnapVault
- D. Open System SnapVault

Answer: D
