

NS0-530 NCIE

Network Appliance NCIE - DataFort Security Exam

Practice Exam: NS0-530 Exams

Exam Number/Code: NS0-530

Exam Name: NCIE - DataFort Security Exam

Questions and Answers: 118 Q&As

([NCIE](#))

Exam : [NS0-530](#)

"NCIE - DataFort Security Exam", also known as NS0-530 exam, is a Network Appliance certification. With the complete collection of questions and answers, TestInside has assembled to take you through 118 Q&As to your NS0-530 Exam preparation. In the NS0-530 exam resources, you will cover every field and category in Network Appliance Certification helping to ready you for your successful Network Appliance Certification.

Quality and Value for the NS0-530 Exam TestInside Practice Exams for Network Appliance **NCIE** Certification NS0-530 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the NS0-530 Exam.

NS0-530 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the NCIE product experts, included the current newest NS0-530 examination questions.

3. 100% Guarantee to Pass Your NCIE exam and get your NCIE Certification.

If you do not pass the Network Appliance Certification NS0-530 exam (NCIE - DataFort Security Exam) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside NS0-530 Q&A ensure you pass the exam at your first try.

TestInside professional provide NCIE NS0-530 the newest Q&A, completely covers NS0-530 test original topic. With our complete NCIE resources, you will minimize your NCIE cost and be ready to pass your NS0-530 tests on Your First Try, 100% Money Back Guarantee included!

[Network Appliance NS0-530](#) Test belongs to one of the NCIE certified test, if needs to obtain the NCIE certificate, you also need to participate in other related test, the details you may visit the [NCIE](#) certified topic, in there, you will see all related NCIE certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about NS0-530 exam

NS0-530 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

NS0-530 exam questions updated on regular basis

Same type as the certification exams, NS0-530 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free NS0-530 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Network Appliance NS0-530

Title : NCIE-DataFort Security Exam

1. What is the purpose of the Key Policy setting for tapes?

- A. It determines whether or not each tape has a unique key.
- B. It determines whether or not tape encryption keys can be shared by DataFort appliances.
- C. It determines whether or not tape encryption keys are written to tape.
- D. It determines how frequently tape keys are backed up.

Answer: A

2. Which two key policies allow for all keys to be pre-generated and replicated to the DR site? (Choose two.)

- A. key per tape
- B. key per pool
- C. Global Pool with single key
- D. periodic disk rekey

Answer: BC

3. In x firmware, how many virtual storage devices (targets) and virtual client hosts (initiators) can be attached to a single FC525 model DataFort?

- A. 1 virtual storage device and 8 virtual client hosts
- B. 7 virtual storage device and 7 virtual client hosts
- C. 8 virtual storage device and 8 virtual client hosts
- D. 8 virtual storage device and 32 virtual client hosts
- E. 16 virtual storage device and 128 virtual client hosts

Answer: B

4. What can the E-Series DataFort net util tcpdump command capture?

- A. network packets going between two arbitrary machines
- B. only network packets going between DataFort client-side NIC and arbitrary machines
- C. only network packets going between DataFort server-side NIC and arbitrary machines
- D. only network packets going between DataFort client-side NIC and server-side NIC
- E. network packets going between DataFort client-side/server-side NIC and arbitrary machines

Answer: E

5. Which procedure is used to move keys between LKM servers or appliances that do not share network connectivity?

- A. clustering
- B. key export and import
- C. Key Translation
- D. tape metadata

Answer: B

6. Which three factors should be considered when assessing the performance impact a DataFort will have on an existing environment? (Choose three.)

- A. the number of devices connected to a specific DataFort
- B. the type of Cryptainer vault created (LUN Mapped versus Port Mapped)
- C. the combined speed of all devices connected to the DataFort

D. the device type, tape or disk, being connected to the DataFort

Answer: ACD

7. In SAN 2.x, how many targets can be virtualized on an FC520?

A. 1

B. 7

C. 8

D. 31

Answer: B

8. During installation of the LKM server software, which configuration options can be specified?

A. database type and schema

B. target directory and license

C. server port number and "using SSL"

D. LKM server IP and hostname

Answer: B

9. If a DataFort 2.x or later appliance fails, which three information sources can be used with the DataFort Wizard to recreate the configuration information on a replacement? (Choose three.)

A. *.xdf file from LKM software/appliance

B. mysqldump of DataFort configDB

C. *.xdf file from manual backup

D. *.lkm file from LKM software/appliance

E. surviving cluster member

Answer: ACE

10. Which two statements about disk and tape I/O are true? (Choose two.)

A. Disk and tape I/O can be combined through the same standalone DataFort.

B. Disk and tape I/O can be combined through the same cluster but not through the same DataFort.

C. Disk and tape I/O cannot be combined through the same standalone DataFort.

D. Disk and tape I/O cannot be combined through the same cluster.

Answer: CD

11. Which is a correct System Card replacement procedure for SAN 2.x?

A. zeroize DataFort and restore with an initialized System Card and a recent configdb using a quorum of Recovery Cards

B. zeroize DataFort and join an existing cluster with an uninitialized System Card and a quorum of Recovery Cards

C. insert an uninitialized System Card into the DataFort and perform a System Card replacement using a quorum of Recovery Cards

D. insert an initialized System Card from an existing cluster member and perform a System Card replacement using a quorum of Recovery Cards

Answer: B

12. What are three valid forced media type and duplex mode settings on the DataFort? (Choose three.)

A. 1000baseTX, full-duplex

B. 1000baseTX, half-duplex

C. 100baseTX, full-duplex

D. 100baseTX, half-duplex

E. 10baseTX, half-duplex

Answer: ACD

13. If you have an 8-node cluster, how many members must be online in the cluster in order to create Cryptainer vaults?

- A. 1
- B. 4
- C. 5
- D. 8

Answer: C

14. Which two statements are true if a System Card is removed in a functional, fully initialized DataFort? (Choose two.)

- A. Encryption services are disabled after a reboot.
- B. Encryption services halt within five minutes of card removal.
- C. Recovery Card replacement does not work.
- D. DataFort sends SNMP trap and initiates shutdown to protect access to encrypted data.

Answer: AC

15. Which two statements are true about signed DataFort log messages? (Choose two.)

- A. They contain a verifiable digital signature.
- B. They can only be authenticated on the DataFort that generated the log message.
- C. They may not be sent to a syslog server.
- D. They may not be sent to a Windows event log.

Answer: AB

16. How many additional FC-switch ports are required for an inline direct-attached FC-5XX DataFort?

- A. 0
- B. 1
- C. 2
- D. 4
- E. 10

Answer: A

17. When are Recovery Cards required in the trustee key-sharing process?

- A. during the establishment of only the trustee relationship
- B. during the establishment of the trustee relationship and the key export
- C. during the establishment of the trustee relationship, key export, and key import
- D. Recovery Cards are not required in the trustee key-sharing process.

Answer: A

18. Which property must be set to prevent overlapped SCSI commands?

- A. dfc.serialize_storage_cmds
- B. dfc.disable_overlapped_cmds
- C. dfc.disable_host_LIP
- D. dfc.isp.enableTaskMgmtPassUp

Answer: A

19. Which two can authorize Key Translation? (Choose two.)

- A. the source DataFort administrator
- B. the destination DataFort administrator
- C. the LKM administrator
- D. a quorum of Recovery Cards and passwords
- E. a Recovery Key Archive file

Answer: DE

20. California SB1386 requires businesses and government agencies to _____.

- A. encrypt personal information on onsite backup tapes when reasonable alternative methods are not in place

- B. encrypt all personal information on offsite backup tapes when reasonable alternative methods are not in place
- C. encrypt all personal information on both disk and backup tapes, onsite or offsite, when reasonable alternative methods are not in place
- D. notify individuals if their unencrypted personal information is believed to have been disclosed to an unauthorized person
- E. notify the California District Attorney Office if unencrypted personal information is believed to have been disclosed to an unauthorized person

Answer: D
