Juniper Networks juniper networks certified internet associate(jncia-fwv)

Practice Exam: jn0-520 Exams

Exam Number/Code: jn0-520

Exam Name: juniper networks certified internet associate(jncia-fwv)

Questions and Answers: 119 Q&As

([JNCIA](#))

Exam : [jn0-520](#)

"juniper networks certified internet associate(jncia-fwv)", also known as jn0-520 exam, is a Juniper Networks certification. With the complete collection of questions and answers, TestInside has assembled to take you through 119 Q&As to your jn0-520 Exam preparation. In the jn0-520 exam resources, you will cover every field and category in Juniper Networks Certification helping to ready you for your successful Juniper Networks Certification.

Quality and Value for the jn0-520 Exam TestInside Practice Exams for Juniper Networks **JNCIA** Certification jn0-520 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the jn0-520 Exam.

jn0-520 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the JNCIA product experts, included the current newest jn0-520 examination questions.

3. 100% Guarantee to Pass Your JNCIA exam and get your JNCIA Certification.

If you do not pass the Juniper Networks Certification jn0-520 exam (juniper networks certified internet associate(jncia-fwv)) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside jn0-520 Q&A ensure you pass the exam at your first try.

TestInside professional provide JNCIA jn0-520 the newest Q&A, completely covers jn0-520 test original topic. With our complete JNCIA resources, you will minimize your JNCIA cost and be ready to pass your jn0-520 tests on Your First Try, 100% Money Back Guarantee included!

[Juniper Networks jn0-520](#) Test belongs to one of the JNCIA certified test, if needs to obtain the JNCIA certificate, you also need to participate in other related test, the details you may visit the [JNCIA](#) certified topic, in there, you will see all related JNCIA certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about jn0-520 exam

jn0-520 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

jn0-520 exam questions updated on regular basis

Same type as the certification exams, jn0-520 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free jn0-520 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Juniper JN0-520

Title : Juniper(r) Networks Certified Internet Associate(Jncia-Fwv)

1. What is the purpose of the 'Manage-IP' address on a NetScreen device?

- A.It defines which range of addresses can access devices connected to the NetScreen
- B.It defines a list of addresses that are trusted to perform management on the NetScreen
- C.It is used in policy rules to determine which device is allowed to manage the NetScreen
- D.It is the address to which an external device connects in order to gain management access to a NetScreen
- E.It defines a list of device addresses that can manage the NetScreen without being authenticated prior to session establishment

Answer: D

2. Which policy action is needed in order to add Deep Packet inspection to a policy?

- A.IDP
- B.Deny
- C.Reject
- D.Permit
- E.Detect

Answer: D

3. What are two (2) benefits of configuring the NetScreen in transparent mode?

- A.There is no need for IP addresses even for remote management
- B.There is no need to reconfigure the IP addresses of routers or protected servers
- C.There is no need to create Mapped or Virtual IPs for incoming traffic to reach protected servers
- D.Policies are easier to create since you do not have to include Source and Destination IP addresses
- E.The product can support more VPNs and obtain greater throughput because there is less overhead to manage

Answer: BC

4. By default, where are changes stored when a "save" command is issued from the CLI during a management session?

- A.NVRAM
- B.Internal Flash
- C.PCMCIA Card
- D.Compact Flash Card

Answer: B

5. By default, from which hardware component is the startup copy of the ScreenOS loaded?

- A.ROM
- B.NVRAM
- C.TFTP server
- D.Internal Flash
- E.PCMCIA Card

Answer: D

6. When managing a NetScreen device via the WebUI and performing an image upgrade, from which hardware

component can the the ScreenOS image be loaded?

- A.TFTP server
- B.PC local disk
- C.Internal Flash
- D.PCMCIA Card
- E.Compact Flash Card

Answer: B

7. Your VPN tunnel does not pass traffic. You run the "get ike cookie" command and discover that there is no cookie.

What two (2) options should you check first?

- A.Routes
- B.Policy configuration
- C.Phase 1 configuration options
- D.Phase 2 configuration options

Answer: AC

8. Which statement best describes the 'config rollback' feature?

- A.Config rollback must be enabled by an administrator. Once enabled, it allows the administrator to re-apply a previously saved configuration file from Flash.
- B.Config rollback is enabled by default; it allows the administrator to re-apply a previously saved configuration file from Flash without rebooting.
- C.Config rollback is enabled by default; it allows the administrator to re-apply a previously saved configuration file from Flash by rebooting and loading a "last known good" configuration.
- D.Config rollback allows the administrator to revert to the prior ScreenOS image in the event an upgrade operation aborts.
- E.Config rollback allows the administrator to revert to the prior ScreenOS image or configuration file in the event an upgrade operation aborts.

Answer: C

9. Which statement is correct regarding administrator privileges?

- A.Any Administrator can change their privileges on an as-needed basis
- B.Administrator privileges can only be established and changed by the Root Administrator
- C.Administrator privileges can be established and changed by the Root and All-privilege Administrator
- D.Administrator privileges can only be established by the Root and can be changed by the Root and All-privilege Administrator

Answer: B

10. Which cannot be enabled when creating an Access Policy entry?

- A.Setting the tcp-mss size
- B.Applying NAT using DIP pools
- C.Logging all connections that match the Access Policy
- D.Triggering a traffic alarm if traffic goes above 300 Bytes/Sec
- E.Scheduling the policy to take effect between Monday through Friday only

Answer: A

11. Which three (3) statements are correct regarding tasks that can be performed only by the Root administrator?

- A.reset command
- B.unset all command
- C.activate/deactivate asset recovery features
- D.replace configs from remote devices to flash
- E.On-line asset recovery

Answer: BCD

12. What is the purpose of the 'Permitted IP' address on a NetScreen device?

- A.It defines which range of addresses can access devices connected to the NetScreen
- B.It defines a list of addresses that are trusted to perform management on the NetScreen
- C.It is used in policy rules to determine which user traffic is allowed through the NetScreen
- D.It is the address to which an external device connects in order to gain management access to a NetScreen
- E.It defines a list of devices whose traffic can pass through the NetScreen without being authenticated

Answer: B

13. When configuring the Untrust interface with an IP address and enabling Telnet and WebUI management, which sequence of steps must be performed to make the interface operational at the end of the configuration sequence?

- A.Assign the interface to a zone, define the IP address, enable Web and Telnet services
- B.Assign the interface to a zone, define the IP address, accept default management services
- C.Assign the interface to a virtual router, define the IP address, enable Web and Telnet services
- D.Assign the interface to a zone, define the IP address, define a manage IP address, accept default management services
- E.Assign the interface to a virtual router, define the IP address, define a manage IP address, enable Web and Telnet services

Answer: A

14. Assuming factory default settings, which statement describes the minimum requirements for WebUI management access?

- A.Connect a PC addressed on the 192.168.1.0 subnet to any interface, open a browser and access 192.168.1.1
- B.Terminate the bootup sequence from the console device, open a browser on the console device and access 192.168.1.1
- C.Connect a PC addressed on the 192.168.1.0 subnet to the lowest numbered interface, open a browser and access 192.168.1.1
- D.Using the CLI, define an IP address on a physical interface, connect a PC to the interface and open a browser to the interface address
- E.Using the CLI, assign an IP address to the VLAN1 interface, connect a PC to any interface and open a browser to the VLAN interface address

Answer: C

15. When changes are made to the running config during a WebUI management session, to what external hardware component can the changes be saved?

- A.FTP server
- B.LDAP server
- C.TFTP server
- D.PC local disk
- E.Compact Flash Card

Answer: D

16. In the command "save config from tftp 1.1.7.250 abcd.cfg merge", what function does the 'merge' parameter specify?

- A.The config file from the TFTP server will replace the configuration in RAM
- B.The config file from the TFTP server will replace the startup configuration file in Flash
- C.The 'merge' parameter is not valid for TFTP files; it is only valid for configuration files stored in Compact Flash
- D.The config file from the TFTP server will be combined with the configuration file in RAM and the combined result will be saved to Flash
- E.The config file from the TFTP server will be combined with the configuration file in RAM and the startup configuration file will remain unchanged

Answer: D

17. When managing a NetScreen device via the CLI and performing an image upgrade, from which hardware

components can the the ScreenOS image NOT be loaded?

- A.TFTP server
- B.PC local disk
- C.Internal Flash
- D.PCMCIA Card
- E.Compact Flash Card

Answer: B

18. Click the Exhibit button to view the exhibit.

If A initiates a Web browsing session with B, and the Trust interface of the 5XT is in NAT mode, what could be the source address/port of the packet arriving at host B?

- A.10.0.0.5/80
- B.10.0.0.5/1099
- C.10.0.0.1/1024
- D.20.0.0.1/1024
- E.1.1.1.250/1024

Answer: E

19. Using the CLI, if the startup copy of the ScreenOS on a NS-204 is corrupted, from which two (2) alternate locations can an image be loaded?

- A.ROM
- B.TFTP server
- C.Internal Flash
- D.PCMCIA Card
- E.Compact Flash Card

Answer: BE

20. You have one VIP configured on your device, using public address 191.111.222. When you configure the policy, what will you select for the VIP, and where will you select it?

- A.VIP::1 in the NAT-dst public field
- B.VIP::1 as the destination address
- C.VIP(191.111.222.5) in the NAT-dst public field
- D.VIP(191.111.222.5) as the destination address

Answer: B
